Federal Electric Railways Commission,1920 Art, Spirituality and Economics Luk Bouckaert,Knut J. Ims,Peter Rona,2018-03-05 This volume celebrates the work of Laszlo Zsolnai a leading researcher and scholar in the field of the ethical and spiritual aspects of economic life who has made significant contributions to the connection between ethics spirituality aesthetics and economic theory The book offers a selection of essays concerned with the ethical spiritual and aesthetic context within which economics as a social studies discipline should be situated in order to avoid the sort of dehumanising consequences that theories based on utility maximisation and rational choice necessarily entail It presents the economic activities of human beings not as some sort of preordained obedience to universal laws that operate independently of other human concerns but rather as a part of the human desire for the Aristotelian good life It looks at the various considerations moral spiritual and aesthetic that take part in the formation of economic decisions in sharp contrast with theories that purport to explain economic phenomena solely on the basis of utility maximisation *Distant Early Warning* Alex Kitnick,2021-06-29 Marshall McLuhan 1911 1980 is best known as a media theorist many consider him the founder of media studies but he was also an important theorist of art Though a near household name for decades due to magazine interviews and TV specials McLuhan remains an underappreciated yet fascinating figure in art history His connections with the art of his own time were largely unexplored until now In *Distant Early Warning* art historian Alex Kitnick delves into these rich connections and argues both that McLuhan was influenced by art and artists and more surprisingly that McLuhan s work directly influenced the art and artists of his time Kitnick builds the story of McLuhan s entanglement with artists by carefully drawing out the connections among McLuhan his theories and the artists themselves The story is packed with big names Marcel Duchamp Niki de Saint Phalle Jasper Johns Andy Warhol Nam June Paik and others Kitnick masterfully weaves this history with McLuhan s own words and his provocative ideas about what art is and what artists should do revealing McLuhan s influence on the avant garde through the confluence of art and theory The illuminating result sheds light on new aspects of McLuhan showing him not just as a theorist or an influencer but as a richly multifaceted figure who among his many other accolades affected multiple generations of artists and their works The book finishes with Kitnick overlaying McLuhan s ethos onto the state of contemporary and post internet art This final channeling of McLuhan is a swift and

beautiful analysis with a personal touch of art's recent transgressions and what its future may hold Music Technology in Live Performance Tim Canfer, 2023-12-07 Music Technology in Live Performance explores techniques to augment live musical performance and represents a comprehensive guide to best practices in music technology for live performance This book presents a practical and accessible introduction to the theories of liveness and an array of live performance technologies and techniques Areas covered include analogue and digital audio live sound the recording studio and electronic music revealing best professional practices and expert tips alongside an exploration of approaches to increasing the exchange of energy in live performance Music Technology in Live Performance is an ideal introduction for students of music performance music production and music technology and a vital resource for professional musicians producers and technology developers

Cataloging Policy and Support Office, 2009 **The Routledge Research Companion to Electronic Music: Reaching out with Technology** Simon Emmerson, 2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art

Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music      **Electric Railway Journal** ,1914      **Catalog** Sears, Roebuck and Company,1910
