Fanning, Jr.,2015-08-01 Death rays Absurd idea peddled by con artists and amateurs and promoted by a sensationalist press Not quite Government and military leaders and mainstream scientists endorsed the possibility of such a fantastic weapon in the years before World War II A concept born out of research with electricity and other energy sources the death ray or directed energy weapon was widely reported for nearly five decades Claims for its invention appeared as early as 1876 and increased thereafter until the death ray craze of the 1920s and 1930s The idea influenced fiction making its way from newspapers and magazines into novels short stories films theatrical productions and other media This book takes a first ever look at the historical death ray and its impact on fiction and popular culture *Dimensions* ,1935 The Cumulative Daily Digest of Corporation News ,1914 **Built to Move Millions** Craig R. Semsel,2008-04-17 A hobbyist s enthusiasm curiosity and attention to detail exude from this technological history of Ohio s streetcar industry Highly recommended Choice At the beginning of the twentieth century the street railway industry was one of the largest in the nation Once ubiquitously visible on the city streets by mid century the streetcar was nothing more than a distant memory Ohio was home to several large streetcar systems especially in Cleveland and Cincinnati and had more interurban tracks than any other state in the union Thus Ohio served as one of the street railway industry s greatest centers of manufacturing Built to Move Millions examines the manufacture of streetcars and interurbans within the state of Ohio between 1900 and 1940 In addition to discussing the five major car builders that were active in Ohio during this period the book addresses Ohio companies that manufactured the various components that went into these vehicles Includes extensive photos

 ,1888 **Eating the Ocean** Brian Payne,2022-12-02 During the first half of the twentieth century Canadian fisheries
 regularly produced more fish than markets could absorb driving down profits and wages To address this both industry and
 government sought to stimulate domestic consumption via increased advertising In *Eating the Ocean* Brian Payne explores
 how government funded marketing called upon Canadian housewives to prepare more seafood meals to improve family
 health and aid an industry central to Canadian identity and heritage The goal was first to make seafood a central element of a
 wholesome diet as a solution to a perceived nutritional crisis and second to aid industry recovery and growth while
 decreasing Canadian fisheries dependency on foreign markets But fishery managers and policymakers fundamentally
 miscalculated consumer demand wrongly assuming that Canadians could and would eat more seafood Fisheries continued to
 extract more fish than the environment and the market could sustain and the collapse of the nation s fisheries that we are
 now seeing has as much to do with failed assessments of market demand as it does with faulty extraction practices Using
 internal communications between industry leaders and Ottawa bureaucrats as well as advertising and promotional material
 published in the nation s leading magazines national and local newspapers and radio programming *Eating the Ocean* traces
 the flawed understanding of not only supply but demand a misguided gamble that caused fisheries to become the most
 mismanaged resource economy in early twentieth century Canada
