Electric Vehicles Socio Economic Prospects And Technological Challenges:

Electric Vehicles Robin Cowan,Staffan Hultén,2000 *Electric Vehicles* provides a reasoned look at both the history of the choice of automobile technologies and the prospects for changing that choice In particular it addresses the possibility of the electrical vehicle becoming a significant part of the transportation system Its contributors evaluate this question from a variety of perspectives all of which need to be absorbed before a comprehensive understanding of the problems and prospects for the electrical vehicle can be achieved

Electric Vehicles Robin Cowan,Staffan Hulten,2017-12-15 This title was first published in 2000 The electric vehicle is an established technology performing the tasks asked of it in predictable ways and at predictable costs But could expanded use of the electric vehicle have an impact in other areas of concern on the environment noise pollution oil dependency sustainability and so on To do so in a noticeable way the electric vehicle would have to become a significant part of the transportation system The goal of this work is to address that issue Whether or not the electric vehicle has technical properties that do respond effectively to these concerns is not central Rather the focus of this volume is the mechanisms whereby the electric vehicle could become a significant part of the transportation system and the prospects of this happening The chapters in this book address the question from a variety of perspectives

Handbook of Innovation and Standards Richard Hawkins,Knut Blind,Robert Page,2017-08-25 Innovation and standardization might seem polar opposites but over many years various scholars have noted close connections between the two This Handbook assembles a broad range of thinking on this subject with contributions from several disciplinary perspectives by over 30 leading scholars and experienced practitioners Collectively they summarize and synthesize the existing body of knowledge theory and evidence pertaining to standards and innovation and provide insights into how this knowledge can be useful to scholars industrial strategists policy makers and standards practitioners

The Economics of Climate Change and the Change of Climate in Economics Kevin Maréchal,2013-05-02 Climate change is without question the single most important issue the world faces over the next hundred years The most recent scientific data have led to the conclusion that the globally averaged net effect of human activities since 1750 has been one of warming and that continued greenhouse gas emissions at or above current rates would cause this process to continue to the severe detriment of our environment This unequivocal link between climate change and human activity requires an urgent world wide shift towards a low carbon economy and coordinated policies and measures to manage this transition The starting point and core idea of this book is the long held observation that the threat of climate change calls for a change of climate in economics Inherent characteristics of the climate problem including complexity irreversibility and deep uncertainty challenge core economic assumptions and mainstream economic theory appears inappropriately equipped to deal with this crucial issue Kevin Mar chal shows how themes and approaches from evolutionary and ecological economics can be united to provide a theoretical framework that is better suited to tackle the problem

Sustainable Transport for Chinese Cities Roger L. Mackett,Anthony D. May,Masanobu

Kii,Haixiao Pan,2013-01-16 Based on papers presented at a workshop on the green transport agenda and its implications for Chinese cities organised by the World Conference on Transport Research Society in September 2010 this volume reviews the challenges facing urban transport internationally and in China Experimenting for Sustainable Transport Remco Hoogma,Rene Kemp,Johan Schot,Bernhard Truffer,2005-06-29 Technological change is a central feature of modern societies and a powerful source for social change There is an urgent task to direct these new technologies towards sustainability but society lacks perspectives instruments and policies to accomplish this There is no blueprint for a sustainable future and it is necessary to experiment with alternative paths that seem promising Various new transport technologies promise to bring sustainability benefits But as this book shows important lessons are often overlooked because the experiments are not designed to challenge the basic assumptions about established patterns of transport choices Learning how to organise the process of innovation implementation is essential if the maximum impact is to be achieved it is here that strategic niche management offers new perspectives The book uses a series of eight recent experiments with electric vehicles carsharing schemes bicycle pools and fleet management to illustrate the means by which technological change must be closely linked to social change if successful implementation is to take place The basic divide between proponents of technological fixes and those in favour of behavioural change needs to be bridged perhaps indicating a third way *Handbook on New Paradigms in Smart Charging for E-Mobility* Abhishek Kumar,Ramesh C. Bansal,Praveen Kumar,Xiangning He,2025-03-21 Handbook on New Paradigms in Smart Charging for E Mobility Global Trends Policies and Practices provides a complete package for understanding and developing smart chargers for e mobility applications It discusses various concepts required for developing charging infrastructure and usage of different kinds of storage technologies power electronics converters controllers communication requirements grid infrastructure sustainable technologies policy frameworks and all other related crucial aspects of E mobility Each part of the book covers a subdomain of e mobility beginning with an introductory chapter reviewing existing literature the subsequent chapters are arranged to each follow the previous one Other available books focus on specific technical subdomains of e mobility but none provides the wider outlook to meet the requirements of all audiences This book uniquely brings together topics that are not otherwise easily accessible or available to these audiences This book will be beneficial for engineers scientists and researchers providing them with a comprehensive standard benchmark work to explore the evolving aspects of charging infrastructure for e mobility Further it will also help policymakers practitioners and government entities formulate policies for successful implementations of e motility for their masses The techno socio economic focus will serve as standard literature for all Takes a modular approach with each module catering to a different sub domain of e mobility Includes standalone chapters that cover out of the box work related to e mobility Presents the latest advances and detailed technical descriptions of smart charging infrastructures **Handbook of Power Electronics in Autonomous and Electric Vehicles** Muhammad H. The Bhutan Electric Vehicle Initiative Da Zhu, Dominic Pasquale Patella, Roland

Steinmetz, Pajnapa Peamsilpakulchorn, 2016-04-06. As the country that inspires the world with gross national happiness development philosophy, Bhutan is striving to pursue its economic growth while committing to its core values of inclusive and green development. Even with robust economic growth rates, Bhutan's dependence on imports and hydropower revenues drives the country to search for self-reliant options to fuel the economy while further decarbonizing the economy. Electric vehicle is being explored as one of the key policies to introduce green mobility, reduce fossil fuel imports and put the country firmly on a green growth path. Globally, electric vehicles market and technology are still in the nascent stage but are developing rapidly. The automotive industry has adopted electrification as a pillar of future drive train technology. EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market. This report aims to help Bhutan think through various technical and policy issues of introducing electric vehicles in its own context. It analyses a variety of factors that will impact adoption of electric vehicles from technical, market and financial feasibility to consumer awareness and stakeholders capacity. It also addresses several policy questions which are at the heart of public debate, such as affordability of the government to undertake the program, economic costs and benefits, distributional impact, fiscal and macroeconomic implications. Drawing from vast international experiences, the report examines in great technical details how global cutting edge technology like electric vehicles could be pursued in the context of developing economies with different socio-economic characteristics and constraints compared to advanced economies. It will help readers better grasp the technical, financial, economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative.

Transport Development Challenges in the 21st Century Michal Suchanek, 2021-04-27. This proceedings present current trends in the transport growth. It presents transport solutions both at a micro level such as that of a single city or a single company as well as at a macro level of a whole transportation system. The transport decisions made by an

individual in regards to the transport mode and route add up to the structure and efficiency of the whole system Transport systems cannot grow extensively anymore due to lack of space or the amount of additional costs so the authors presents new solutions ones which are innovative and sustainable while also increasing the efficiency of transport operations These solutions are analyzed for performance at a scale of individual cities or companies as well as whole transport systems The researchers who are often also practitioners in the field of transport provide not only the theoretical background for the transport analysis but also empirical data and practical experience **Energy Abstracts for Policy Analysis** ,1982
