What's in a Word-list? Dawn Archer, 2016-02-24 The frequency with which particular words are used in a text can tell us something meaningful both about that text and also about its author because their choice of words is seldom random Focusing on the most frequent lexical items of a number of generated word frequency lists can help us to determine whether all the texts are written by the same author Alternatively they might wish to determine whether the most frequent words of a given text captured by its word frequency list are suggestive of potentially meaningful patterns that could have been overlooked had the text been read manually This edited collection brings together cutting edge research written by leading experts in the field on the construction of word lists for the analysis of both frequency and keyword usage Taken together these papers provide a comprehensive and up to date survey of the most exciting research being conducted in this subject
