Research Handbook on International Energy Law Kim Talus, 2014-04-25 International energy law is an elusive but important concept There is no body of law called international energy law nor is there any universally

accepted definition for it yet many specialised areas of international law have a direct relationship Electricity Reform in Europe Jean-Michel Glachant, 2009-01-01 this volume comes across as one of the most profound sources on the specifics of European electricity market restructuring Competition and Regulation in Network Industries The SESSA study on the Internal Energy Market was an important and influential contribution towards the Commission's proposal for a third package of proposals intending to bring more effective competition and better security of supply to Europe's energy markets This volume based on the results of the study is an important and welcome contribution to the ongoing debate on these proposals Andris Piebalgs Commissioner for Energy at the European Commission The chapters in this book are written by the leading European scholars who have studied the structure behavior and performance of liberalised electricity markets in many European countries as well as in other regions of the world Both the analyses and the policy recommendations contained in this volume are well worth careful consideration by policymakers in Europe as well as by policymakers in other countries that are seeking to adopt successful electricity sector liberalisation programs From the foreword by Paul L Joskow Massachusetts Institute of Technology US Dynamism or dissipation Competition or national champions Will enlargement promote or delay reform Energy economists contemplate the challenges posed by the restless and discontent European Commission Stephen Littlechild University of Birmingham and Judge Institute for Management Studies University of Cambridge UK The challenge of European electricity reform is being met although gradually delays notwithstanding This book provides precious help in spotting where the necessary further efforts should be directed In the US mistakes and delays have occurred no less than in Europe but an aggressive federal regulator absent in Europe is working to overcome them Electricity markets do not happen they have to be built Here are suggestions for a workable European market design No ideology just competence and wisdom from both theory and experience Will Europe learn Pippo Ranci Universit Cattolica del Sacro Cuore Italy The realisation of a European internal market for energy is still a work in progress Written by leading European scholars and discussed with major energy stakeholders this book presents a thorough analysis of the motives and methods needed to achieve a single European energy market The authors discuss the critical issues surrounding an internal European energy market including market design competition and market power sustainable energy versus the market regulation and harmonisation benchmarking and indicators modelling of competition market prices and energy forecasts They provide a multi disciplinary assessment of the best way to build the market base of a future European energy policy Electricity Reform in Europe will be of great interest to decision makers and managers in the energy industry or business sector as they will be able to see the whole European energy policy picture beyond their own corporate interests The book will also appeal to national and European energy administrations regulatory bodies and policy makers providing a synthesis of all relevant policy issues

Ownership Unbundling and Related Measures in the EU Energy Sector Tilman Michael Dralle, 2018-04-24 This book provides the first comprehensive analysis of unbundling and in particular ownership unbundling policies from the perspective

of international economic law It does so by focusing on the prominent example of the EU's energy sector and its Third Energy Package Unbundling has become an increasingly crucial competition instrument in network bound industries worldwide It is designed to ensure access to bottleneck infrastructures on fair and non discriminatory terms and thus to suppress the anti competitive potential deriving from vertical integration in natural monopoly situations While promoting important public policy objectives unbundling policies have also raised a number of legal issues This book analyzes how international economic law limits the adoption and maintenance of unbundling and related measures and also outlines how international trade law can play a positive role in this field As a result it provides a valuable reference for academics practitioners and policy makers

Privatization Experiences in the European Union Marko Köthenbürger, 2006 Experts evaluate the varied outcomes of privatization experiences in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades Privatization is broadly supported by most academic economists but the results of actual privatization efforts seem mixed In the UK for example telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality In this CESifo volume international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economywide influences The studies in this volume meet this methodological challenge by using a well defined set of criteria including reducing consumer prices increasing quantity and improving quality by which to make their assessments
