## **Electrifying Eden Portland General Electric 1889 1965:**

*Electrifying Eden* Craig Wollner, 1990      *Electrifying Eden* Craig Wollner, 1990      The Wired Northwest Paul W. Hirt, 2012-10-18 The Pacific Northwest holds an abundance of resources for energy production from hydroelectric power to coal nuclear power wind turbines and even solar panels But hydropower is king Dams on the Columbia Snake Fraser Kootenay and dozens of other rivers provided the foundation for an expanding regionally integrated power system in the U S Northwest and British Columbia A broad historical synthesis chronicling the region s first century of electrification Paul Hirt s new study reveals how the region s citizens struggled to build a power system that was technologically efficient financially profitable and socially and environmentally responsible Hirt shows that every energy source comes with its share of costs and benefits Because Northwest energy development meant river development the electric power industry collided with the salmon fishing industry and the treaty rights of Northwest indigenous peoples from the 1890s to the present Because U S federal agencies like the Army Corps of Engineers and the U S Bureau of Reclamation built many of the large dams in the region a significant portion of the power supply is publicly owned initiating contentious debates over how that power should best serve the citizens of the region Hirt dissects these ongoing battles evaluating the successes and failures of regional efforts to craft an efficient yet socially just power system Focusing on the dynamics of problem solving governance and the tense relationship between profit seeking and the public interest Hirt s narrative takes in a wide range of players not only on the consumer side where electricity transformed mills mines households commercial districts urban transit factories and farms but also power companies operating at the local and regional level and investment companies that financed and in some cases parasitized the operators His study also straddles the international border It is the first book to compare energy development in the U S Northwest and British Columbia Both engaging and balanced in its treatment of all the actors on this expansive stage *The Wired Northwest* helps us better understand the challenges of the twenty first century as we try to learn from past mistakes and re design an energy grid for a more sustainable future      *General Technical Report PNW-GTR* ,1987

The Human Tradition in Urban America Roger Biles, 2002 Introduces problems and concerns facing different groups of urban Americans at different times through biographical readings      *Northwest Forest Plan, the First 10 Years (1994-2003)* ,2007      *Public Power, Private Dams* Karl Boyd Brooks, 2009-11-17 In the years following World War II the world s biggest dam was almost built in Hells Canyon on the Snake River in Idaho Karl Boyd Brooks tells the story of the dam controversy which became a referendum not only on public power expansion but also on the environmental implications of the New Deal s natural resources and economic policy Private power critics of the Hells Canyon High Dam posed difficult questions about the implications of damming rivers to create power and to grow crops Activists attorneys and scientists pioneered legal tactics and political rhetoric that would help to define the environmental movement in the 1960s The debate however was less about endangered salmon or threatened wild country and more about who would control land and water and whether

state enterprise or private capital would oversee the supply of electricity By thwarting the dam s construction Snake Basin irrigators retained control over water as well as economic and political power in Idaho putting the state on a postwar path that diverged markedly from that of bordering states In the end the opponents of the dam were responsible for preserving high deserts and mountain rivers from radical change With *Public Power Private Dams* Karl Brooks makes an important contribution not only to the history of the Pacific Northwest and the region s anadromous fisheries but also to the environmental history of the United States in the period after World War II *The Organic Machine* Richard White,2011-04-01 The Hill and Wang Critical Issues Series concise affordable works on pivotal topics in American history society and politics In this pioneering study White explores the relationship between the natural history of the Columbia River and the human history of the Pacific Northwest for both whites and Native Americans He concentrates on what brings humans and the river together not only the physical space of the region but also and primarily energy and work For working with the river has been central to Pacific Northwesterners competing ways of life It is in this way that White comes to view the Columbia River as an organic machine with conflicting human and natural claims and to show that whatever separation exists between humans and nature exists to be crossed *The Radical Middle Class* Robert D. Johnston,2013-10-31 America has a long tradition of middle class radicalism albeit one that intellectual orthodoxy has tended to obscure *The Radical Middle Class* seeks to uncover the democratic populist and even anticapitalist legacy of the middle class By examining in particular the independent small business sector or petite bourgeoisie using Progressive Era Portland Oregon as a case study Robert Johnston shows that class still matters in America But it matters only if the politics and culture of the leading player in affairs of class the middle class is dramatically reconceived This book is a powerful combination of intellectual business labor medical and above all political history Its author also humanizes the middle class by describing the lives of four small business owners Harry Lane Will Daly William U Ren and Lora Little Lane was Portland s reform mayor before becoming one of only six senators to vote against U S entry into World War I Daly was Oregon s most prominent labor leader and a onetime Socialist U Ren was the national architect of the direct democracy movement Little was a leading antivaccinationist *The Radical Middle Class* further explores the Portland Ku Klux Klan and concludes with a national overview of the American middle class from the Progressive Era to the present With its engaging narrative conceptual richness and daring argumentation it will be welcomed by all who understand that reexamining the middle class can yield not only better scholarship but firmer grounds for democratic hope ***American Far West in the Twentieth Century*** Earl S. Pomeroy,2008-10-21 In this richly insightful survey that represents the culmination of decades of research a leading western specialist argues that the unique history of the American West did not end in the year 1900 as is commonly assumed but was shaped as much if not more by events and innovations in the twentieth century Earl Pomeroy gathers copious information on economic political social intellectual and business issues thoughtfully evaluates it and draws a new and more nuanced

portrait of the West than has ever been depicted before Pomeroy mines extensive published and unpublished sources to show how the post 1900 West charted a path that was influenced by but separate from the rest of the country and the world He deals not only with the West's transition from an agricultural to an urban region but also with the important contributions of minority racial and ethnic groups and women in that transformation Pomeroy describes a modern West increasingly urban transnational and multicultural that has overcome much of the isolation that challenged it at an earlier time His final book is nothing short of the definitive source on that West

**International Bibliography of Business History** Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years There is less interest in the traditional company centred approach and more concern about the wider business context With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field The Bibliography is a unique volume which covers the depth and breadth of research in business history This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians

**Uncommon Ground: Rethinking the Human Place in Nature** William Cronon, 1996-10-17 A controversial timely reassessment of the environmentalist agenda by outstanding historians scientists and critics In a lead essay that powerfully states the broad argument of the book William Cronon writes that the environmentalist goal of wilderness preservation is conceptually and politically wrongheaded Among the ironies and entanglements resulting from this goal are the sale of nature in our malls through the Nature Company and the disputes between working people and environmentalists over spotted owls and other objects of species preservation The problem is that we haven't learned to live responsibly in nature The environmentalist aim of legislating humans out of the wilderness is no solution People Cronon argues are inextricably tied to nature whether they live in cities or countryside Rather than attempt to exclude humans environmental advocates should help us learn to live in some sustainable relationship with nature It is our home

**Urban History 19:2** Kajal Lahiri, Geoffrey H. Lahiri, 1992-12-10

**Grand Coulee** Paul C. Pitzer, 2021-09-24 Accolades freely and frequently lavished on Grand Coulee Dam and the Columbia Basin Irrigation Project included The Biggest Thing on Earth The Eighth Wonder of the World and The Largest Reclamation Project Ever Undertaken They highlight a monumental construction effort that spanned the 1930s through the 1980s Now for the first time the story of this gigantic undertaking is told in this definitive history When completed the eleven million cubic yard monolith at Grand Coulee on the Columbia River in north central Washington became the largest single block of concrete ever laid and provided an abundance of electricity that helped win World War II Still one of the world's largest energy producing stations it is at the heart of a dynamic power grid that supplies all of the western United States

with energy The product of a long struggle over how to irrigate the Columbia Basin Grand Coulee Dam resulted from the visions of eastern Washington residents people like Wenatchee editor Rufus Woods and members of the Spokane Chamber of Commerce who saw the undertaking as a dynamic plan to bring prosperity to their region Yet today the reclamation enterprise more than half a century after construction began stands only half finished Its future depends on the nation's need for food and the willingness of the public to pay the rapidly spiraling economic and environmental costs associated with such large scale irrigation plans The fight for Grand Coulee Dam and the story of its construction is a vital and animated saga of people striving for dazzling goals and then working often against both each other and nature to build something spectacular They accomplished their goal against the backdrop of the worst economic depression in the nation's history The dam and the extensive irrigation network it supports stands today as a monument to their dreams and their labors

*Ghost industries* Irene Curulli, 2018-08-03 What is the role of water in the conversion of former industrial areas How is water used in engaging the public to experience these sites both as physical and cultural places Can ecological design foster the coexistence of industry and environment The book addresses these core questions by examining the impact of the former Oregonian industry 1830 1940 on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry landscape and water This book is a source of suggestions and ideas for scholars students and professionals in architecture landscape architecture planning and their related fields who want to manage the urban landscapes successfully

*Eden Within Eden* James J. Kopp, 2009 Oregon has been the home of nearly three hundred communal experiments since the Aurora Colony was established in 1856 *Eden Within Eden* is the first book to survey the state's utopian history from religious and Socialist groups of the nineteenth century to ecologically conscious communities of the twenty first century James J Kopp examines Oregon's communal history in the context of the state as a destination for those seeking new beginnings and in the framework of utopian and communal experiences across America *Eden Within Eden* provides rich detail about utopian communities some realized some only planned many of which reflect broader social political economic and cultural aspects of Oregon's history From the dawn of communal groups in Oregon the German Christian colony at Aurora to Oregon's most infamous communal experiment Rajneeshpuram this study examines the range of attempts to establish ideal communities in the state These include the Jewish agrarian colony of New Odessa in the 1880s as well as the new pioneers of the 1960s and later who captured the spirit of the counterculture as well as growing concerns about the environment The book explores other areas of Oregon's utopian heritage as well including literary works and idealistic city planning There has been no comparable book published on Oregon's communal history and few such comprehensive examinations of other states The appendix is a rich compilation that will guide individuals to additional information on the profiled and many other communities *Eden Within Eden* will appeal to students and scholars of communal studies and Pacific Northwest history as well as to general readers interested in these subjects
