

# A History of Electricity/Electrochemistry

- Thales of Miletus (640-546 B.C.) is credited with the discovery that amber when rubbed with cloth or fur acquired the property of attracting light objects.
- The word electricity comes from "elektron" the Greek word for amber.
- Otto von Guericke (1602-1686) invented the first electrostatic generator in 1675. It was made of a sulphur ball which rotated in a wooden cradle. The ball itself was rubbed by hand and the charged sulphur ball had to be transported to the place where the electric experiment was carried out.
