Europe is the name for a scintillating variety of historically emerged concepts constantly developed and discussed over time Its complexity and fuzziness is reflected in a multitude of myths topoi symbols and boundaries which all constitute shared knowledge of the concept of EUROPE and which continue to influence attempts to de and re construct European identity The case studies collected in this volume investigate the competing concepts of Europe in political and public discourses from a wide range of perspectives e g frame semantics discourse linguistics multimodal analysis focusing on the following aspects How is EUROPE conceptualised re negotiated and legitimised by different political actors political bodies and institutions How does the European idea change throughout history and how is the re emerging idea of nationality evaluated

Electrochemistry is a collection of papers presented at the First Australian Conference on Electrochemistry held in Sydney on February 13 15 and in Hobart on February 18 20 1963 jointly sponsored by The Royal Australian Chemical Institute The University of New South Wales and The University of Tasmania This conference highlights the numerous advances in the field of electrochemistry This book is organized into 12 parts encompassing 70 chapters The first parts deal with the solid state reactions and processes in electrochemistry the thermodynamic aspects of electrolytes and the role of electrode in corrosion control The succeeding parts explore the concepts of equilibrium and non equilibrium theory of double layers as well as the various electroanalytical methods used in electrochemistry including polarography potentiometry and coulometry Other parts consider the areas of application of electrochemistry such as in electroplating anodizing fuel cell electrowinning and electrorefining The remaining chapters are devoted to non aqueous electrolytes molten salts and electrode and electrochemical processes Electrochemists and physicists will find this book invaluable
