**Media and the Empire** Ruth Teer-Tomaselli, Donal McCracken, 2017-10-02 This volume on

print and broadcast media in the 19th and 20th centuries highlights the pivotal role that the media played in the establishment and maintenance of imperial power. The media bolstered both the ideological and financial objectives of the empire in a myriad of overt, covert and downright scandalous ways. From jeopardising the introduction of wireless telegraphy in order to maximise the financial gains of the investors of under sea cabling to newspaper proprietors cashing in on the thrilling, wonderful and sometimes fabricated adventures of war correspondents in exotic lands, the media has had a constant background influence in the public's perception of empire. By covering diverse topics from Anthony Lejeune's radio talk show London Letters which supported the Allies by boosting morale and providing a link between soldiers fighting abroad and their families during both World Wars to the complete subversion of imperial influence as in the case of the proliferation of diverse media platforms being used by migrant communities in Britain as a means to promote colonization, in reverse the book hints at the politics, suspense and intrigue of both the print and broadcast sectors. This book was originally published as a special issue of Critical Arts.

Understanding Global News Jaap van Ginneken, 1998-01-23 Using the enormous number of available examples and a range of theoretical perspectives, the author demonstrates the ways in which the news media are able to manipulate an individual's perception of the world.

**Cosmopolitan Communications** Pippa Norris, Ronald Inglehart, 2009-08-31 This book develops a new theoretical framework for understanding cosmopolitan communications and identifies the conditions under which global communications are most likely to endanger cultural diversity.

The original essays are organized around the broad themes of public knowledge, cultural identity, broadcasting, film and pop tech. An introductory section explores the fundamentals of the field and a section on method examines how knowledge is constructed within media studies. Throughout the material is structured into a combination of case studies and integrative essays punctuated at key moments by stop and think advice aimed directly at students. With contributions well known scholars, Formations offers a deep engagement with issues, theories and methods, especially new technologies transforming landscapes of popular culture.

The Politics of Transnational Television Austin Ogunsuyi, 2004-05-29 The central focus of this study is to provide an improved basis for articulating the politics of transnational television and its potentials for improving relations among nations. In this context, the politics of transnational

television means the decision making process that determines the degree of freedom of the press tolerated by individual governments and how that could affect broadcasting mode and attitudes toward other nations The motivation for this research stems from a conviction that the cultural imperialism perspective on the nature and modes of transnational television are erroneous and therefore susceptible to a wide and often misleading theoretical assumption with wide ranged implications In reevaluating the concept of cultural imperialism some fundamental questions are raised to determine to what extent its arguments are true Using the elite theory of power in various societies aided by Johan Galtung s model of a global communication in four worlds we see a pattern of global television that suggests a similar motivation underlying media ownership in all societies We acknowledge with the support of a literature review and other data sources the existence of a global systemic order where technology rich nations dominate technology over poor nations But there is also substantial evidence to prove some of the poorer nations exercise some degree of autonomy This makes it more difficult to explain cultural imperialism simply as a relationship where developed and developing nations are arranged in dominant subordinate or top down order Through a strategy of original intent we are able to show the elite in various societies acquire television mainly to satisfy their political economic or social interest Media attitudes therefore are largely the ideological expression of local elite who determines foreign policy

including commercial and other communication The new technologies raise new questions about legal and social definitions of concepts such as privacy Free expression is explored in this book under the umbrella of a global commercial economy that places importance on legal rights such as copyright even where those rights limit free flow of ideas The Internet places free expression on two tracks On the one hand corporate players are developing cyberspace as a new mass media On the other hand the Internet is virtual space where individuals have the power to connect and communicate with others in ways never before seen This groundbreaking text advancing new media scholarship uses the most current case studies from the Internet to show free expression in practice today Lipshultz presents a relevant and efficacious social communication theory of free expression which critically examines the necessary factors involved in comprehensive policy analysis and enactment

*Al Jazeera English* P. Seib, 2016-04-30 Although Al Jazeera English has yet to receive the attention accorded to its Arabic language elder sibling it is in many ways the more interesting of the two It seeks to redefine global news coverage by focusing on areas that are traditionally neglected by most news organizations and its potential audience is many times larger than that of the Arabic channel This will be the first book to thoroughly examine this channel's coverage methods effects on its audience and its place in the world of mediated geopolitics Al Jazeera recognized that if it was to expand its worldwide influence it could not do so wholly in Arabic And so in 2006 it launched Al Jazeera English the first English language news channel to be headquartered in the Middle East With its principal broadcast centers in Doha Washington London and Kuala Lumpur the channel faced the task of proving itself to be more than a curiosity and just a junior version of the all news English language channels such as the BBC or CNN After several years of operation Al Jazeera English seems well on its way to defining its place in the market The breadth of its coverage particularly its emphasis on reporting from the global South has distinguished it from many of its competitors Thorough coverage from the Middle East and from Africa provides a perspective that other major satellite channels have rarely offered their audiences Initially Al Jazeera English was available to 80 million cable and satellite households It was however accessible by only a small number of viewers in the United States mainly those accessing it through several online providers primarily because of political reasons Whatever the political back story may be gaining access to a larger global market will depend on audience demand If Al Jazeera English does a better job of covering major stories particularly in the Middle East and the global South than other channels do and if its competitors find themselves saying As Al Jazeera English reported today news consumers will eventually demand access This book will examine these political issues and will also analyze the channel's audience base particularly in Africa and South Asia The book will also offer evaluations of Al Jazeera English's defining moments to date its reporting during the 2008 2009 war in Gaza written by Palestinian and Israeli scholars and its coverage of the Ground Zero Mosque controversy in 2010 The volume will also consider Al Jazeera English in the context of public diplomacy and the growing significance of diasporic populations
