Educating for an Ecologically Sustainable Culture C. A. Bowers, 1995-07-01 This book is a wake up call for environmentalists who need to consider how current educational ideals and practices undermine efforts to create a more sustainable future It is also a wake up call for educators who continue to base their reform efforts on the primacy of the individual while ignoring the fact that the individual is nested in culture and culture is nested in and thus dependent upon natural ecosystems Bowers argues that the modern way of understanding moral education creativity intelligence and the role of direct experience in the learning process cannot be supported by evidence from such fields as anthropology cultural linguistics and the sociology of knowledge **Expanding Curriculum Theory** William M. Reynolds, Julie A. Webber, 2016-04-28 Expanding Curriculum Theory Second Edition carries through the major focus of the original volume to reflect on the influence of Deleuze and Guattari s concept of lines of flight and its application to curriculum theorizing What is different is that the lines of flight have since shifted and produced expanded understandings of this concept for curriculum theory and for education in general This edition reflects the impact of events that have contributed to this shift in particular the il logic of school policy changes and reforms in the past decade and the continued explosion of social media and its effect on the collective understanding of how both knowledge and education work as forms of repression The introduction updates the text and puts it into current debates in the field and in the larger socio economic milieu New dis positions are presented that explore central questions circulating within and outside curriculum studies Exciting scholarship on a range of topics includes notions of desire and commodities youth culture and violence new directions in curriculum theory Eco Ethical consciousness new Deleuzian views of normality the diffusion of technology and lines of flight in transnational curriculum **Bioregionalism** Michael Vincent McGinnis, 2005-07-28 Bioregionalism is the first book to explain the theoretical inquiry and practical dimensions of bioregionalism from an interdisciplinary standpoint focusing on the place of bioregional identity within global politics Leading contributors from a broad range of disciplines introduce this exciting new concept as a framework for thinking about indigenous peoples local knowledge globalization science global environmental issues modern

this renewal of outdoor education philosophy and practice the emphasis is upon responding to and empathising with the outdoors as particular places rich in local meaning and significance Current outdoor education theory and practice is influenced by cultural ideas about risk and adventure and by psychological theories of personal and social development. However in recent decades the professional discourse of outdoor education has made a noticeable shift to include education for the environment and nature This has resulted in a mismatch between theory and practice traditional notions of proving oneself against the challenges of the outdoors are antithetical to the development of an empathetic relationship with outdoor places which growing concern with today s environment demands This book is the first of its kind to articulate a renewal of philosophy and practice for outdoor education that is in keeping with the educational needs of today s young people as they grapple with considerable social and ecological changes in a rapidly changing world The authors draw extensively on international national and local literature and provide compelling case studies drawn from the Australian and New Zealand contexts Philosophy of STEM Education Nataly Z. Chesky,Mark R. Wolfmeyer,2015-07-30 Winner of the American Educational Studies Association AESA Critics Choice Book Award for 2016 Philosophy of STEM Education uses philosophical methods to investigate STEM education s purpose and assumptions It details the why axiology the how epistemology and the what ontology of STEM by drawing upon a variety of philosophies of education science mathematics and technology
