International authority control will soon be a reality. Examine the projects that are moving the information science professions in that direction today. In *Authority Control in Organizing and Accessing Information*, Definition and International Experience, international experts examine the state of the art and explore new theoretical perspectives. This essential resource, which has its origins in the International Conference on Authority Control, Italy 2003, addresses standards, exchange formats, and metadata, with sections on authority control for names, works, and subjects. Twenty fascinating case examples show how authority control is practiced at institutions in various nations around the world. *Authority Control in Organizing and Accessing Information* provides an essential definition of authority control and then begins its sharply focused examinations of essential aspects of authority control with a section entitled *State of the Art and New Theoretical Perspectives*. Here you will find chapters focusing on the current state of the art with suggestions for future developments, the importance and current lack of teaching authority control as part of a library information science curriculum, the guidelines and methodology used in the creation of Italy's SBN Authority File, Next Standards Exchange Formats and Metadata, covers Italy's Bibliografia Nazionale Italiana UNIMARC database, which was created using authority control principles, the past and present activities of the International Federation of Library Associations and Institutions (IFLA) and an examination of IFLA's Working Group on Functional Requirements and Numbering of Authority Records (FRANAR), metadata standards as a means for accomplishing authority control in digital libraries, traditional international library standards for bibliographic and authority control, the evolution and current status of authority control tools for art and material culture information, the UNIMARC authorities format, what it is and how to work with it, *Authority Control for Names and Works* brings you useful current information on changes and new features in the new edition of the International Standard Archival Authority Record (Corporate Bodies, Persons, Families, Encoded Archival Context (EAC) and its role in enhancing access to and understanding of records and how it enables repositories to share creator description, the LEAF model for collection harvesting, linking and providing access to existing local national name authority data, national bibliographic control in China, Japan, and Korea, plus suggestions for future cooperation between bibliographic agencies in East Asia, authority control of printers, publishers, and booksellers, how to create up-to-date corporate name authority records, authority control and the lack of it for works, *Authority Control for Subjects* updates you on subject gateways with a look at the differences between the Program for Cooperative Cataloging's SACO program and browsable online subject gateways, MACS, a virtual authority file that crosses language barriers to provide multilingual access, OCLC's FAST project, which strives to retain the rich vocabulary of LCSH while making the schema easier to understand, control, apply, and use the efforts of Italy's National Central Library toward semantic authority control, the interrelationship of subject indexing languages and authority control with a look at the semantics vs. syntax issue, how subject indexing is done in Italy's Servizio Bibliotecario Nazionale, *Authority Control Experiences and Proje*

Functional Future for Bibliographic Control Shawne D. Miksa, 2017-07-05 The quest to evolve bibliographic control to an equal or greater standing within the current information environment is on going As information organizers we are

working in a time where information and communication technology ICT has pushed our status quo to its limits and where innovation often needs the pressure of do or die in order to get started The year 2010 was designated as the Year of Cataloging Research and we made progress on studying the challenges facing metadata and information organization practices However one year of research is merely a drop in the bucket especially given the results of the Resource and Description and Access RDA National Test and the Library of Congress decision to investigate the possibility of transitioning the MARC21 format This book addresses how information professionals can create a functional environment in which we move beyond just representing information resources and into an environment that both represents and connects at a deeper level Most importantly it offers insight on transitioning into new communities of practice and awareness by reassessing our purpose re charting our efforts reasserting our expertise in the areas that information organizer have traditionally claimed but are losing due to stagnation and lack of vision This book was published as a double special issue of the Journal of Library Metadata
