The Colonial Origins of Modern Social Thought George Steinmetz,2025-02-25 A new history of French social thought that connects postwar sociology to colonialism and empire In this provocative and original retelling of the history of French social thought George Steinmetz places the history and development of modern French sociology in the context of the French empire after World War II Connecting the rise of all the social sciences with efforts by France and other imperial powers to consolidate control over their crisis ridden colonies Steinmetz argues that colonial research represented a crucial core of the nascent academic discipline of sociology especially between the late 1930s and the 1960s Sociologists who became favored partners of colonial governments were asked to apply their expertise to such social problems as detribalization urbanization poverty and labor migration This colonial orientation permeated all the major subfields of sociological research Steinmetz contends and is at the center of the work of four influential scholars Raymond Aron Jacques Berque Georges Balandier and Pierre Bourdieu In retelling this history Steinmetz develops and deploys a new methodological approach that combines attention to broadly contextual factors dynamics within the intellectual development of the social sciences and sociology in particular and close readings of sociological texts He moves

gradually toward the postwar sociologists of colonialism and their writings beginning with the most macroscopic contexts which included the postwar reoccupation of the French empire and the turn to developmentalist policies and the resulting demand for new forms of social scientific expertise After exploring the colonial engagement of researchers in sociology and neighboring fields before and after 1945 he turns to detailed examinations of the work of Aron who created a sociology of empires Berque the leading historical sociologist of North Africa Balandier the founder of French Africanist sociology and Bourdieu whose renowned theoretical concepts were forged in war torn late colonial Algeria

Uncharted Depths Kiera Vaclavik, 2017-12-02 The descent to the underworld is one of our oldest stories It recurs in the most influential texts of early European literature the Odyssey the Aeneid the Inferno and no less so in the classics of children's literature Vaclavik shows that retellings for young readers certainly shift emphases working the legend through transformations of all kinds but also that much of the traditional katabasis story remains firmly in place The critical study of children's literature remains a relatively new field in which such fundamental presences have gone largely unnoticed As Vaclavik demonstrates many novels which remain lively and resonant for adult readers richly repay critical attention And if the incomparable explorer's tales of Jules Verne H Rider Haggard Hector Malot and even Lewis Carroll have proved durable beyond all expectations one reason may be that there is no lure like that of the underworld and none harder to escape Kiera Vaclavik is Lecturer in French and Comparative Literature at Queen Mary University of London

[The Origins of Japanese Credentialism](#) Ikuo Amano, 2011 In this English translation of a semi classic study readers have the opportunity to explore the manner in which both credentialism and the various levels of the modern education system have developed in Japan Professor Ikuo Amano the author of extensive works on Japanese education and examination systems takes the reader through a detailed analysis of the process by which education and academic qualifications have become the crucial factors in determining social position Using Japan as a concrete example of an industrial society thoroughly permeated by credentialism Amano's book makes explicit the relationship between social selection and education and in so doing points the way to why credentialism has come to dominate industrial societies The book also includes a comparative consideration of the development of education qualification and selection mechanisms in both Japan and Europe

The University and the Teachers Harry Judge, Michel Lemosse, Lynn Paine, Michael Sedlak, 1994-01-01 Here is a book for our times a study in three countries of the relationship between teacher education and the universities An Englishman looks at France a Frenchman at the USA and two Americans at England with the whole introduced and rounded off by Harry Judge who was also the interlocutor of France It is a notable addition to the Oxford Studies in Comparative Education John Tomlinson Director of the Institute of Education University of Warwick The Times Educational Supplement this is an outstanding book on several levels it is a worthwhile read for audiences well beyond those directly involved in teacher education It will be of particular interest to researchers and students of comparative education At a time when politicians seem bent on importing educational

practices from other countries it reminds us that there are no easy lessons to be learnt through international comparisons and that we cannot suppose that what is identified as good practice in one country can easily be imported elsewhere without taking into account the cultural context within which it is successful Marilyn Osborn University of Bristol Comparative Education The book is beautifully and engagingly written enlivened by the authors efforts to make sense of that which is foreign to their personal educational experiences The narratives are rich in detail and insights about the forms of teacher education and the cultural logic of their suitability The chapters provoke thought experiments of a kind that are suggestive of outcomes for university based teacher education if reforms currently proposed in one nation prove to be similar to long standing practices in the others Frank B Murray University of Delaware Comparative Education Review The work recorded in this book was undertaken over four years with support from the Spencer Foundation of Chicago and under the direction of Harry Judge of the University of Oxford Michel Lemosse teaches at the University of Nice and Lynn Paine Michael Sedlak at Michigan State University
