Combining the best practices of critical analysis and traditional research methods, this professional text offers guidance for using the Action Inquiry Model (AIM), a transformative model that explains how to successfully conduct action-oriented research in a multitude of professional service organizations. The aim of the text is to encourage a new generation of research-based partnerships and reforms that promote equity and access for underserved populations. Topics discussed include the historical precedents for universities engaged in social change, the limitations of current social science theory and methods, the critical empirical approach to social research, the issues relating to social justice within the policy decision process, and the use of social research to integrate an emphasis of social justice into economic and policy decision making. Research Actionable Knowledge and Social Change does not propose different foundations for social research but rather argues that it is necessary to reconsider how to work with theory and research methods to inform change. This text can also be used by students enrolled in graduate and Ed D/Ph D Higher Education Leadership programs and graduate programs across professional fields including K-12 public administration, sociology, health, cultural studies, organizational development, and organizational theory. It further offers students guidance for research design and dissertation research.
