## **Educational Planning:**

**What is Educational Planning?** Philip Hall Coombs, 1970      Educational Planning Jacques Hallak, Francoise Françoise Caillods, 2018-10-24 It was in a context of unprecedented economic growth that educational planning developed in the 1960s. At the time educational planners were entrusted with orchestrating the tremendous expansion of schooling with the aim of both universalizing education and providing national economies with the qualified manpower needed. Such rigid mandatory planning is not suited to today's world but other forms of planning such as policy analysis, policy dialog, labor market analysis and strategic management are still valid. The following is a complete list of reprinted essays collected for this book.

Educational Planning Robert V. Carlson, Gary Awkerman, 1991      Educational Planning and National Development M. R. Kolhatkar, 1997 With reference to India      *WHAT IS EDUCATIONAL PLANNING?*, 1967      *Multigrade Schools* Étienne Brunswic, Jean Valérien, 2004 This book addresses a problem crucial to the implementation of education for all. In sparsely populated or remote areas, classes where a single teacher is responsible for several grades can make a big contribution and countries in Europe and North America were able to achieve universal primary education largely through multigrade schools. Many countries in Latin America and Asia are achieving success with this approach which is increasing enrolment, improving performance and reducing absenteeism in rural areas. In India, two thirds of primary schools are multigrade. However, while multigrade classes could be a solution for educating rural people in many African countries, governments tend to focus on improving conventional schools, often leaving the development of multigrade schools to local initiative. For this reason, multigrade schools in rural Africa tend to show poor results which in turn give them a negative image.

**Educational Planning and Management in Small States** Commonwealth Secretariat, 2002 This collection of papers presents the critical reflections on the management and planning of education of 18 senior officials working in 12 small island nations. The papers are a result of their participation in the Postgraduate Diploma in Educational Planning and Management in Small States program at the University of Malta. The book is divided into two sections. After an introductory essay and two papers on generic management and administration issues in small states, the papers in the first section deal with educational management, addressing the education process from its internal organizational or operational perspective. This section addresses such topics as resource allocation, Total Quality Management, staff recruitment, job satisfaction and the role of principals. The second section of the book discusses educational planning, focusing on education as a tool for national development. This section discusses such topics as school-business linkages, the general role of educational planning and specific developmental challenges facing primary, secondary, vocational and adult education in small countries. Each chapter begins with a brief summary of the key arguments of the paper and ends with a discussion point based on the contents. Contains a subject and author index. WFA
