Geometría para la arquitectura José Manuel Pozo Municio,2002 La geometría de la conciencia Osho,2007-09-12 La mente filosófica no puede ser fanática no puede ser dogmática El tener que estar abierto el tener que investigar el tener que dudar el tener que cuestionar y el tener que permanecer disponible a la verdad en cualquier forma que venga son prerrequisitos de la filosofía Los pecadores son desdichados porque se pierden las bellezas de la virtud las bellezas de la otra parte que han elegido no elegir Y los santos son desdichados porque han reprimido algo que no puede ser destruido porque es una parte esencial de su ser Si observas con atención al santo verás que en alguna parte de su inconsciente hay un santo escondido El consciente del santo es el inconsciente del pecador y el consciente del pecador es el inconsciente del santo El sabio no es ni lo uno ni lo otro l es neti neti ni lo uno ni lo otro l no ha elegido l ha aceptado su totalidad es total tanto de día como noche Ha abandonado el ego que siempre está eligiendo Simplemente acepta lo que venga Vive la verdad en su completa desnudez cualquiera que sea no es asunto suyo interferir en la corriente de la vida El sabio es un fenómeno inmensamente hermoso por su totalidad El sabio es un círculo perfecto Lo contiene todo no rechaza nada Ese era el significado de la palabra sofía era un término hermoso Para Pitágoras la ciencia es la búsqueda de la verdad en el mundo objetivo y la religión es la búsqueda de la verdad en el mundo subjetivo y la filosofía es la búsqueda de la verdad Así que la ciencia y la religión deberían ser sus dos manos sus dos alas No son opuestas sino complementarias Si volviésemos a recordar eso el mundo sería mejor **PSICOGEOMETRIA, GEOMETRIA SAGRADA Y ARQUITECTURA BIOLOGICA** NINON FREGOSO FREGOSO,2009-01-01 Este libro es el primero de una serie de libros sobre el estudio y la exploración científica de cómo la Geometría permite el surgimiento de la vida y la conciencia En este libro se analizan y sintetizan más de ochocientos de investigación y docencia en distintos campos psicología arquitectura física matemática arte y terapia Como resultado años de compartir cursos y talleres por el mundo primordialmente de habla hispana vivimos profundas experiencias de transformación y comprensión del código de la vida Mediante una serie de cursos que estructuran la columna central del programa pedagógico de Psicogeometría surgen esta serie de observaciones reflexiones y propuestas en torno a la Geometría Sustentable La búsqueda está centrada sobre la reflexión en torno a una pregunta central cuál es la dinámica y estructura de la vida Esto nos llevó a indagar en los cuestionamientos sobre cómo surge la vida cómo se mantiene y transforma cómo podemos recrear sus

REVISTA GEOMETRÍA Nº 4-5 / ALHAMBRA - DOCHLANDS JOSÉ SEGUÍ PÉREZ y otros, 1988-01-01

GEOMETRÍA fue una revista técnica e independiente que dirigida por el Arquitecto José Seguí se editó entre los años 1985 y 2000 tratando de recuperar el diálogo profesional entre las prácticas de la arquitectura y del urbanismo desarrollando y entendiendo el proyecto arquitectónico y urbanístico desde la propia estructura urbana que lo soporta y su referencia al proyecto global de la ciudad Esta conjunción de valores estéticos y prácticos que podríamos definirlos como el arte de construir ciudades fue el centro de un debate profesional que construyó la disciplina de la arquitectura y del urbanismo como las dos caras inseparables de una misma moneda GEOMETRÍA busca incorporar al debate profesional y a la investigación disciplinar materiales significativos en la experiencia de intervenir en nuestras ciudades tratando de descubrir en esta práctica profesional los elementos de la actual cultura urbana y arquitectónica

GEOMETRÍA was a technical and independent magazine which directed by the architect José Seguí was published between 1985 and 2000 in an attempt to recover the professional dialogue between the practices of architecture and town planning developing and understanding the architectural and town planning project from the very urban structure that supports it and its reference to the global project of the city This conjunction of aesthetic and practical values which we could define as the art of building cities was at the centre of a professional debate that constructed the discipline of architecture and urban planning as the two inseparable sides of the same coin GEOMETRY thus seeks to incorporate into the professional debate and disciplinary research significant materials in the experience of intervening in our cities trying to discover in this
