Elections And Voters In Postcommunist Rubia Studies Of Communism In Transition:

Elections and Voters in Post-communist Russia Matthew Wyman, Stephen White, Sarah Oates, 1998 This study looks at the various different political structures that underpin elections and voting patterns in post Communist Russia Transitional Citizens Timothy J. COLTON, Timothy J Colton, 2009-06-30 Subjects obey Citizens choose Transitional Citizens looks at the newly empowered citizens of Russia s protodemocracy facing choices at the ballot box that just a few years ago under dictatorial rule they could not have dreamt of The stakes in post Soviet elections are extraordinary While in the West politicians argue over refinements to social systems in basically good working order in the Russian Federation they address graver concerns dysfunctional institutions individual freedom nationhood property rights provision of the basic necessities of life in an unparalleled economic downswing The idiom of Russian campaigns is that of apocalypse and mutual demonization This might give an impression of political chaos However as Timothy Colton finds voting in transitional Russia is highly patterned Despite their unfamiliarity with democracy subjects turned citizens learn about their electoral options from peers and the mass media and make choices that manifest a purposiveness that will surprise many readers Colton reveals that post Communist voting is not driven by a single explanatory factor such as ethnicity charismatic leadership or financial concerns but rather by multiple causes interacting in complex ways He gives us the most sophisticated and insightful account yet of the citizens of the new Russia Embodying Democracy S. Birch, F. Millard, M. Popescu, K. Williams, 2002-10-04 Embodying Democracy analyzes the politics of electoral reform in eight post communist states including Poland Hungary the Czech Republic Slovakia Romania Bulgaria Russia and Ukraine By exploring the multiple factors that shaped the design of electoral institutions during the first ten years of post communist transition it accounts for an important element of the post communist reform process and illuminates general features of institutional design in post transition states *Elections and Democracy after Communism?* E. Herron, 2009-05-25 This book uses elections as a vehicle to explain the unanticipated outcomes of post Soviet politics It assesses how the behavior of voters candidates and government officials is influenced by the Soviet legacy and rational calculations of self interest and is the first to address elections across post Soviet space

Lovell, 2017-11-22 This title was first published in 2002 This useful collection brings together scholars from diverse standpoints to examine the transition from Communism a decade after it began The result is a book that illuminates the changes and particularly the problems that have accompanied attempts to introduce representative democracy and a viable market economy into formerly Communist states Specialist chapters on the Former Soviet Union Russia Poland Azerbaijan and the former East Germany institutional accounts of postcommunist states and conceptual chapters result in this volume being ideally suited to university courses policy makers and NGOs that have an interest in transition countries **Voting and Elections in Post-Communist States** Jon H. Post-communist Regime Change Jørgen Møller, 2009-06-02 This book seeks to explain the divergent political pathways of twenty six post communist states following the breakdown and eventual collapse of communism in 1989 1991 Considering the trajectories of individual states between 1990 2007 this book challenges two central bodies of theory relating to democratization and regime change Through a sustained analysis of global and post communist developments within this time period the author shows that claims of an increasing asymmetry between the electoral and liberal elements of modern democracy have been greatly exaggerated The author goes on to contend that in accounting for the geographical dispersion of post communist regime forms deeper structural factors should be considered as crucial The book is divided into the following parts Part I demonstrates how different conceptualisations of democracy can lead to very different conclusions about the empirical dynamics of democratization Part II contrasts different explanations of post communist political change and provides an integrated framework for explaining the political pathways encountered within the former Eastern Bloc This book will be of interest to students and scholars of post communist studies democratization studies comparative politics and regime change

Electoral Systems and Political Transformation in Post-Communist Europe S. Birch, 2003-01-01 Electoral Systems and Political Transformation in Post Communist Europe assesses the influence of electoral systems on political change in 20 post communist European states The main finding is that electoral institutions have systematic effects on the formation of representative structures Party enabling aspects of electoral laws such as list proportional representation tend to foster popular inclusion in politics and institutionalized party systems whereas politician enabling rules such as single member districts and ballots that allow voters to select individuals often favour the development of weakly structured systems and high levels of popular exclusion from the representative process

Unexpected Outcomes Robert G. Moser, 2001-01-15 Can democratization be promoted by getting the institutions right In Unexpected Outcomes Robert G Moser offers a compelling analysis of the extent to which institutions can be engineered to promote desired political outcomes The introduction of democracy in Eastern Europe and the former USSR has enabled scholars to

bring new perspectives to the debate about electoral systems Russia is arguably the most important of the postcommunist states and its mixed electoral system provides an interesting controlled experiment for testing the impact of different electoral systems Moser examines the effects of electoral systems on political parties and representation in Russia during the 1990s Moser's study is not only a highly original contribution to our understanding of contemporary Russian politics but also a significant step forward in the comparative study of electoral systems Through his comprehensive empirical analysis of Russian elections Moser provides the most detailed examination of a mixed electoral system to date This system was introduced in Russia to encourage party formation and benefit reformist parties allied with President Yeltsin However the effects were contrary to what the creators of the system expected and also defied the most well established hypotheses in electoral studies Parties proliferated under both the PR and plurality halves of the election and patterns of women and minority representation ran counter to prevailing theory and international experience With an epilogue that updates the study through the December 1999 elections Unexpected Outcomes makes an important and timely contribution to the ongoing debate over the ability and inability of elites to fashion preferred political outcomes through institutional design

from the year 2005 in the subject Politics International Politics Region Eastern Europe grade 1 0 University of Tartu Center of Baltic Studies course Post communist transition and Estonian experience 16 entries in the bibliography language English abstract 1 Introduction Die EU braucht eine Pause zur Besinnung zur Selbstfindung zur Konsolidierung By proclaiming that the European Union EU needs a break for reflection and consolidation Egon Bahr who has been an intimate and consultant of the former German chancellor Willy Brandt as well as one of the most important German politicians as far as foreign policy is concerned is pointing at a major problem of the before said institution Since the EU enlargement of 10 new states has taken

place at the 1st of May 2004 the problem which has been addressed before is even more up to date Especially the recent argumentation about a common constitution which is overdue to both providing a proper legal capacity as well as a capability to act has been proving that the EU is still far away from a strong functioning political union But how is it possible to create such a proper union consisting of 25 members and most probably 27 by the year 2007 consisting of basically national states being still heavily occupied with dealing with their own backgrounds especially if one has a closer look the former communist states Is there any strategy of the lowest common denominator of policy advice or do one have to identify the communist past in relation to present developments Facing this problem the main purpose of this analysis will be an evaluation of different political transition theories and rating strategies which have been particularly taken into account by the former states behind the iron curtain Finally this work is aiming at a probably existing connection between a successful political transition and a deeper integration into the European Union For that reason the fir

Elections and Political Order in Russia Peter Lentini,1995 Russia held its first multiparty election in over 75 years in the hope that it would usher in a new democratic political order However the success of right wing populist Vladimir Zhirinovsky s Liberal Democratic Party of Russia and other anti reform forces shocked the world This work analyzes the background events and main players of the elections and looks at their significance for the Russian political system As the first volume length study of the December 1993 voting it provides historical political regional and sociocultural interpretations of the elections and their results Contributions are made by leading scholars as well as by some promising newcomers to the field from the UK Russia Eastern Europe and Australia

Building Trust and Democracy Cynthia Michalski Horne,2017 This volume examines the conditions under which lustration and related transitional justice measures have affected political and social trust building and democratization across twelve countries in Central and Eastern Europe and parts of the Former Soviet Union between 1989 and 2012
