Electoral Systems And Political Transformation In Post Communist Europe:

Electoral Systems and Political Transformation in Post-Communist Europe S. Birch, 2003-11-25 Electoral Systems and Political Transformation in Post Communist Europe assesses the influence of electoral systems on political change in 20 post communist European states The main finding is that electoral institutions have systematic effects on the formation of representative structures Party enabling aspects of electoral laws such as list proportional representation tend to foster popular inclusion in politics and institutionalized party systems whereas politician enabling rules such as single member districts and ballots that allow voters to select individuals often favour the development of weakly structured systems and high levels of popular exclusion from the representative process Developments in Central and East European Politics 4 Stephen White, Judy Batt, Paul G. Lewis, 2007 The face of Central and Eastern Europe has been dramatically transformed since the collapse of communism The region faces new challenges including the needs to find a balance between effective leadership and accountability and to reverse the economic decline of the late communist years Addressing these concerns and others Developments in Central and East European Politics 4 brings together specially commissioned chapters by leading scholars from both sides of the Atlantic The chapters all of which are new to this edition focus on key features of the political systems that have emerged following the transition to postcommunist rule and the enlargement of the European Union through 2006 Full attention is given to the pattern of events in individual nations but the main emphasis is on the framework of politics across the region constitutions leadership parliaments parties and electoral systems and the process of politics as it is revealed in political participation civil society economic change and the quality of democratic government within and beyond the region Clearly written and well supported with references and suggestions for further reading Developments in Central and East European Politics 4 is the ideal guide to the process of change in a group of states that were formerly modeled on the Soviet Union but are now a distinctive and varied presence within a continent that has been redefining its boundaries its values its economic systems and its international allegiances Contributors Judy Batt Dirk Berg Schlosser Sarah Birch Heather Grabbe Tim Haughton Krzysztof Jasiewicz Petr Kopeck Paul G Lewis Frances Millard Cas Mudde D Mario Nuti Mark Pittaway Ray Taras Stephen White Andrew Wilson Kataryna Wolczuk The Politics of Electoral Reform in Central Europe since 1989 Jakub Charvát, 2023-11-06 This book on the politics of electoral reform in Central Europe since 1989 explains by whom why and how the electoral rules were changed in Central Europe in the post Communist period Examining the contextual factors affecting underlying and or initiating these changes the book identifies main actors their motivations and other circumstances surrounding the electoral reform processes It further explores their political consequences particularly on proportionality and personalization Based on a detailed analysis of electoral reform processes in Czechoslovakia Czechia Hungary and Slovakia over the past thirty years the book discusses how the politics of electoral reform in Central Europe is mostly driven controlled and decided by politicians with other actors being either overlooked or

ignored Finally it argues that most of the cases were imposed by an elite majority with the sole exception of the Czech Republic where the politics of electoral reform were influenced by the intervention of the constitutional court as an external actor The book will appeal to students researchers and scholars of political science interested in a better understanding of electoral politics in general as well as democratic transformation processes and electoral reform in Central Europe

Institutional Design and Party Government in Post-communist Europe Csaba Nikolenyi, 2014 This book examines the institutional foundations of coalition government in the ten post communist democracies of Eastern and Central Europe for the 1990-2010 period Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania Slovakia and Slovenia Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi party government across these states The book starts with the premise that electoral systems and constitutional provisions about the powers the structure and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system On the basis of these institutional features three groups of states are distinguished with regard to their degree of power concentration the substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions governments the formation of electoral coalitions government formation and government duration Specifically three comparative chapters assess the impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia

Post-Communist and Post-Soviet Parliaments Philip Norton,David M. Olson,2013-09-13 The sudden collapse of communism stimulated both the rapid emergence of fledgling democracies and scholarly attention to the post communist transition These newly democratized parliaments have been described as parliaments in adolescence This book identifies six parliaments which exemplify the wide range of developments in the new post communist political systems from the stable consolidated democracies to the less stable and more authoritarian states within which their respective parliaments function Finally the post communist parliaments are compared with the presumptively more established west European parliaments This book bridges the usual gap in research between the post communist parliaments and more normal democratic parliaments to develop a common legislative research perspective on both new and established parliaments This book was previously published as a special issue of the Journal of Legislative Studies

Understanding Electoral Reform Reuven Hazan,Monique Leyenaar,2014-06-03 The field of elections and electoral systems and particularly electoral reform has exhibited tremendous growth and cross national appeal over the last two decades However beyond an increased knowledge

of voting rules and their consequences for political representation little attention has been devoted to the question of why electoral systems have recently undergone substantial change in several liberal democracies This book addresses several new approaches to electoral reform First the scope of the study of electoral reform has been expanded Second contrary to previous studies of electoral reform the conviction that the determinants of reform can be explained by one single approach has been replaced by a belief in a more comprehensive framework for analysis Third we move beyond political parties acting in parliament and government as the most significant source of electoral reform Fourth a focus on the determinants of electoral reform allows us to include motivations and objectives of electoral reform A final advancement in the study of electoral reform is the inclusion of countries other than established democracies This book was published as a special issue of West European Politics

Party Transformations in European Democracies André Krouwel, 2012-11-20 Political parties regularly change and adapt in response to ever changing circumstances Until now these changes have frequently prompted both scholars and the media to suggest a whole new type of political party and over time the number of models and types has proliferated to the point of confusion contradiction and a loss of explanatory power In this sophisticated yet accessible study Andr Krouwel rejects this m lange of models as inadequate He utilizes a wide range of data sources to analyze the ideological organizational and electoral change undergone by more than one hundred European parties in fifteen different countries from Scandinavia to the Iberian Peninsula between 1945 and 2010 The result is one of the most comprehensive empirically grounded studies to date of the genesis development and transformation of political parties in advanced democratic states
