The Grid Gretchen Bakke, 2017-07-11 A revelatory look at our national power grid how it developed its current flaws and how it must be completely reimagined for our fast approaching energy future America s electrical grid an engineering triumph of the twentieth century is turning out to be a poor fit for the present It s not just that the grid has grown old and is now in dire need of basic repair Today as we invest great hope in new energy sources solar wind and other alternatives the grid is what stands most firmly in the way of a brighter energy future If we hope to realize this future we need to reimagine the grid according to twenty first century values It s a project which forces visionaries to work with bureaucrats legislators with storm flattened communities moneymen with hippies and the left with the right And though it might not yet be obvious this revolution is already well under way Cultural anthropologist Gretchen Bakke unveils the many facets of America s energy infrastructure its most dynamic moments and its most stable ones and its essential role in personal and national life The grid she argues is an essentially American artifact one which developed with us a product of bold expansion the occasional foolhardy vision some genius technologies and constant improvisation Most of all her focus is on how Americans are changing the grid right now sometimes with gumption and big dreams and sometimes with legislation or the brandishing of

guns The Grid tells entertainingly perceptively the story of what has been called the largest machine in the world its fascinating history its problematic present and its potential role in a brighter cleaner future **The Great Eastern Railway - From the Grouping to the Elizabeth Line 1923-2023** Charles Phillips, 2025-03-06 Explores the transformation of the Great Eastern Section from a backwater to a modernized railway hub from 1923 to 2023 This book is the sequel to the author s two previous volumes on the history of the Great Eastern covering the Early Years from 1811 to 1862 and the Late 19th Century and early 20th Century from 1862 to 1924 This book cover the years 1923 to 2023 describes how the Great Eastern Section of the London and North Eastern Railway was transformed from being something of a backwater during the inter war years to being very much at the forefront of modernisation under British Railways Within the book will be found how the Great Eastern Section coped with the threat of road competition during the inter war years its involvement in the Second World War and how under British Railways it came to be seen the epitome of modernisation beginning with the arrival of the Britannia Class locomotives in 1951 and culminating the complete elimination of steam power in the East of England at the end of 1963 The book describes the impact of the Beeching Report on the former Great Eastern It chronicles the progress of the Section s through the electrification of its two main lines and the construction and opening of the Elizabeth Line Preservation is also mentioned as are possible future developments It is book for anyone who is interested in the history of the railways of the East of England railways in general and the history of the East of England *New York Review of the Telegraph and Telephone and Electrical Journal* ,1906
