*Theory of Rate Processes in Condensed Media* B. Fain, 2012-12-06 A wide range of important physical and chemical phenomena may be named by the same title Rate processes in condensed media They have the same underlying physics and mathematics To these phenomena belong 1 Small polaron motion a 2 Electron transfer between ions in solutions b and in photosynthetic centers c 3 Electronic energy transfer between molecules or ions in solids and in liquids d 4 Enzymatic catalysis e 5 Group transfer in biological systems f 6 Electron hole recombination in semiconductors g 7 Non radiative electronic relaxation in ionic centers h and in impurity states in insulators i 8 Recombination in amorphous solids j 9 Radiationless transitions in large molecules k At present a unified theoretical and conceptual framework exists for description and understanding of all these diverse phenomena Our aim in writing this work is to introduce the student and the research worker in chemical physics to the main aspects of the conceptual framework of

rate processes in condensed media There exists an extensive literature devoted to various rate processes in condensed media Among recent works the books of Levine and Jortner<sup>1</sup> Fong<sup>m</sup> and Ulstrup<sup>n</sup> should be mentioned The existence of this literature enables us to concentrate on the major theoretical aspects omitting description and presentation of experimental data We tried to make our work self contained Almost all the information necessary for reading the book is included

References used in the work by no means cover the literature on the subject      **Interfacial Electrochemistry** Andrzej Wieckowski, 2017-11-22 This text probes topics and reviews progress in interfacial electrochemistry It supplies chapter abstracts to give readers a concise overview of individual subjects and there are more than 1500 drawings photographs micrographs tables and equations The 118 contributors are international scholars who present theory experimentation and applications      **Comprehensive Coordination Chemistry II** J. A. McCleverty, T.J. Meyer, 2003-12-03 Comprehensive Coordination Chemistry II CCC II is the sequel to what has become a classic in the field Comprehensive Coordination Chemistry published in 1987 CCC II builds on the first and surveys new developments authoritatively in over 200 newly commissioned chapters with an emphasis on current trends in biology materials science and other areas of contemporary scientific interest

**Physics of Fast Processes in Scintillators** Mikhail Korzhik, Gintautas Tamulaitis, Andrey N. Vasil'ev, 2020-03-09 This book presents the current advances in understanding of the fast excitation transfer processes in inorganic scintillation materials the discovery of new materials exhibiting excellent time resolution and the results on the evaluation of timing limits for scintillation detectors The book considers in depth basic principles of primary processes in energy relaxation which play a key role in creating scintillating centers to meet a growing demand for knowledge to develop new materials combining high energy and time resolutions The rate of relaxation varies However the goal is to make it extremely fast occurring within the ps domain or even shorter The book focuses on fast processes in scintillation materials This approach enables in depth understanding of fundamental processes in scintillation and supports the efforts to push the time resolution of scintillation detectors towards 10 ps target Sophisticated theoretical and advanced experimental research conducted in the last decade is reviewed Engineering and control of the energy transfer processes in the scintillation materials are addressed The new era in development of instrumentation for detection of ionizing radiation in high energy physics experiments medical imaging and industrial applications is introduced This book reviews modern trends in the description of the scintillation build up processes in inorganic materials transient phenomena and engineering of the scintillation properties It also provides reliable background of scientific and educational information to stimulate new ideas for readers to implement in their research and engineering The book is aimed at providing a coherent updated background of scientific and instructive information to stimulate new ideas for readers in their research and engineering      **Directory of Published Proceedings** ,1999      *Scientific and Technical Aerospace Reports* ,1976      **Nuclear Science Abstracts** ,1976

Solvent Effects and Chemical Reactivity Orlando Tapia, Juan Bertrán, 2003-07-31 This book presents an up to date view of
