

This scanning electron micrograph (SEM) shows a highly textured, porous surface. The surface features a regular, repeating pattern of interconnected, rounded depressions or pores. The pores vary slightly in size and depth, creating a complex, three-dimensional topography. The overall appearance is that of a finely meshed or woven material at a microscopic scale. In the bottom right corner, there is a scale bar consisting of a horizontal line with a vertical end cap, indicating a length of 2 micrometers ($2 \mu\text{m}$). The image is in grayscale, with the pores appearing as dark, shadowed regions against a lighter, textured background.
