Toward the Factory of the Future K. Kornwachs, Hans-Jörg Bullinger, Hans-Jürgen Warnecke, 2013-12-14 The International Conference on Production Research has a good tradition The first Conference was held in Birmingham 1971 with 61 participants With respect to the decision that the Conference should be held every second year by this time the Conference has been held in the following countries Birmingham 1971 UK Copenhagen 1973 Denmark Amhurst 1975 USA Tokyo 1977 Japan Amsterdam 1979 The Netherlands Novi Sad 1981 Yugoslavia Windsor 1983 Canada Stuttgart 1985 Germany and the next Conference will take place in Cincinnati 1987 USA The number of submitted abstracts and papers was continuously increasing such that the Programme Committee of this actual 8th Conference on Production Research has been forced to introduce a further refereeing procedure Each submitted abstract was presented to at least two referees This resulted not only in a reduction of the number of presented full papers and poster contributions but as the Programme Committee and the Editors hope it led also to a considerable increase in the scientific quality of this 8th International Conference on Production Research The preceding conference in Windsor Canada was dedicated to the topic Production Research as a Means of Productivity Improvement We don't believe that this statement has become untrue in the meanwhile

Sustainability in Energy Business and Finance Hasan Dinçer, Serhat Yüksel, 2022-02-20 This edited

volume seeks to identify the sustainability issues currently affecting the energy business and finance For this purpose a broad range of perspectives on sustainability issues in the energy business and finance are taken into consideration in the context of renewable business projects In turn several novel strategies from the energy business and finance are illustrated with regard to sustainable organizational factors technological infrastructure financial facilities economic development and investment potential Comparing and contrasting different sustainability perspectives can help to develop the most appropriate and successful business strategies for the sustainable energy business and finance This book presents multidimensional analyses of sustainability issues with regard to renewable energy projects and identifies the most promising strategies as well as efficient market conditions for the energy business Antimicrobial Strategies in the Food System: Updates, Opportunities, Challenges Dan Li,2025-08-14 In 2023 world hunger and food insecurity looms as present as ever The threat of foodborne illness is also alive and well as 1 in 10 people fall ill each year from the consumption of contaminated food Meanwhile thirty percent of all the food produced on our planet is lost or wasted due in large part to spoilage In the face of these realities as well as those of climate change population growth ecosystem degradation and increasing resource scarcity the dire need for a more sustainable global food system can no longer be ignored Consumers are not only more invested in sustainability than ever but also more health conscious Recent years have thus seen a proliferation of alternative antimicrobial strategies all aiming to mitigate the risks inherent in developing new production systems while striving for longer lasting food products Antimicrobial Strategies in the Food System Updates Opportunities Challenges elucidates the established methods of this rapidly evolving field and introduces cutting edge technologies such as urban indoor agriculture With an emphasis on detailing each step in the chain of food production the text demonstrates how safety begins with primary production from agriculture to aquaculture and remains paramount through to packaging and handling Developing informed and updated definitions of the terms natural and sustainable this book addresses the fragilities of the current food system and establishes possibilities for future research and practice *Rice Research Strategies for the Future* ,1982

Capturing Value in Digital Health Eco-Systems Felix Lena Stephanie,Ravi S. Sharma,2021-11-10 The United Nations Sustainable Development Goals call for the establishment of Good Health and Well being and target a universal digital healthcare ecosystem by 2030 However existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome This book suggests a way forward with fair and efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently underserved Specifically a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits A promising platform for this critical application is cloud technology with its offer of computing as a utility and resource sharing This is an area that has attracted much scholarly attention as it is well suited to foster such a network and bring together diverse players who would

otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation The fundamental premise is that the notion of value in a digital health ecosystem is brought about by the sharing and exchange of digital information However notwithstanding the potential of information and communication technology to transform the healthcare industry for the better there are several barriers to its adoption the most significant one being misaligned incentives for some stakeholders This book suggests among other findings that e health in its true sense can become fair and efficient if and only if a regulatory body concerned assumes responsibility as the custodian of its citizens health information so that collaboration for value will replace competition for revenue as the new axiom in delivering the public good of healthcare through digital networks *The Future of Foreign Direct Investment and the Multinational Enterprise* Ravi Ramamurti, Niron Hashai, 2011-04-27 This Festschrift in honour of Professor Yair Aharoni a pioneer in the field of international business looks at several of these new trends in FDI what they will mean for firms and governments and the opportunities created by these developments to enrich or extend extant theory
