**Predicting Future Oceans** William Cheung, Yoshitaka Ota, Andres Cisneros-Montemayor, 2019-08-17 Predicting Future Oceans Sustainability of Ocean and Human Systems Amidst Global Environmental Change provides a synthesis of our knowledge of the future state of the oceans The editors undertake the challenge of integrating diverse perspectives from oceanography to anthropology to exhibit the changes in ecological conditions and their socioeconomic implications Each contributing author provides a novel perspective with the book as a whole collating scholarly understandings of future oceans and coastal communities across the world The diverse perspectives syntheses and state of the art natural and social sciences contributions are led by past and current research fellows and principal investigators of the Nereus Program network This includes members at 17 leading research institutes addressing themes such as oceanography biodiversity fisheries mariculture production economics pollution public health and marine policy This book is a comprehensive resource for senior undergraduate and postgraduate readers studying social and natural science as well as practitioners working in the field of natural resources management and marine conservation Provides a synthesis of our knowledge on the future state of the oceans Includes recommendations on how to move forwards Highlights key social aspects linked to ocean ecosystems including health equity and sovereignty

*Future Sea* Deborah Rowan Wright, 2020-10-27 A counterintuitive and compelling argument that existing laws already protect the entirety of our oceans and a call to understand and enforce those protections The world's oceans face multiple threats the effects of climate change pollution overfishing plastic waste and more Confronted with the immensity of these challenges and of the oceans themselves we might wonder what more can be done to stop their decline and better protect the sea and marine life Such widespread environmental threats call for a simple but significant shift in reasoning to bring about long overdue elemental change in the way we use ocean resources In *Future Sea* ocean advocate and marine policy researcher Deborah Rowan Wright provides the tools for that shift Questioning the underlying philosophy of established ocean conservation approaches Rowan Wright lays out a radical alternative a bold and far reaching strategy of 100 percent ocean protection that would put an end to destructive industrial activities better safeguard marine biodiversity and enable ocean wildlife to return and thrive along coasts and in seas around the globe *Future Sea* is essentially concerned with the solutions and not the problems Rowan Wright shines a light on existing international laws intended to keep marine environments safe that could underpin this new strategy She gathers inspiring stories of communities and countries using ocean resources wisely as well as of successful conservation projects to build up a cautiously optimistic picture of the future for our oceans counteracting all too prevalent reports of doom and gloom A passionate sweeping and personal account *Future Sea* not only argues for systemic change in how we manage what we do in

the sea but also describes steps that anyone from children to political leaders or indeed any reader of the book can take toward safeguarding the oceans and their extraordinary wildlife

**The Ocean: Our Future** Independent World Commission on the Oceans, 1998-09-17 The Ocean Our Future is the official report of the Independent World Commission on the Oceans chaired by Mario Soares This book is the first to deal holistically in a single volume with the full range of problems confronting our oceans on the eve of the twenty first century In the space of only a few decades our traditional perception of the oceans as a source of wealth opportunity and abundance has changed The oceans have become the setting for a growing list of problems territorial disputes disruptions to global climate overfishing species extinction pollution illegal trafficking and the destruction of coastal communities Based on the deliberations experience and input of some 100 specialists from around the world the book advances innovative ideas for improving governance of the oceans and coastal zones Written in an accessible manner this book will be valued by everyone interested in the future of the oceans
