Future Of The Postal Service:

The Future of the Post Office Peter Robinson, Marcus Rubin, 1999 *The Future of the Universal Postal Service in the UK* Great Britain. Dept. for Business, Enterprise and Regulatory Reform, 2009 This document builds on the review led by Richard Hooper Modernise or decline policies to maintain the universal postal service in the United Kingdom Dec 2008 <http://www.berr.gov.uk/files/file49389.pdf> The Hooper review found deficiencies and problems with performance 40 per cent less efficient than European counterparts the pension deficit one of the largest in Britain pricing increases would not generate enough revenue to offset falling volumes industrial relations 60 per cent of days lost through industrial action in 2007 in the whole economy were accounted for by Royal Mail and the relationship with the regulator Postcomm difficult The Government proposes a new regulatory framework including transferring responsibility for regulation from Postcomm to Ofcom tackling the pension deficit inviting other postal or network operators to come forward with proposals to develop strategic partnerships with Royal Mail but such arrangements would exclude Post Office Ltd responsible for the network of post offices The Postal Services Bill HL Bill 24 ISBN 9780108454530 published alongside this document sets out the proposals placing the universal service as the overriding objective of the regulatory system The Government will continue to provide for financial support for the universal service Royal Mail will remain in the public sector The Government is committed to maintaining a network of around 11 500 post offices Post Office Ltd will become a sister company of Royal Mail Group Ltd with equal status to the letters business within the Royal Mail group of companies **The Future of Mail Delivery in the United States** United States. Congress. Joint Economic Committee. Subcommittee on Economic Goals and Intergovernmental Policy, 1982 **The Future of the Postal Sector in a Digital World** Michael Crew, Timothy J. Brennan, 2015-11-28 Worldwide postal operators have been slow to address the threats from and opportunities created by electronic competition The European Commission and member states are wrestling with these issues while at the same time continuing to deal with the interrelated issues of implementing entry into postal markets and maintaining the universal service obligation The Postal Accountability and Enhancement Act of 2006 in the U S exacerbated financial and managerial problems faced by USPS that result in part from electronic substitution for letter delivery A major aim of this book is to examine policies to address postal operations in a digital world and ways in which postal operators might reinvent themselves to respond to threats and exploit opportunities Potential opportunities examined include parcels e commerce digital delivery regulatory innovations and pricing This book will be of interest to postal operators regulatory commissions consulting firms competitors and customers experts in the postal economics law and business and those charged with the responsibility for designing and implementing postal sector policies Researchers in regulatory economics transportation technology and industrial organization will also find considerable food for thought in this volume *The Future of the Postal Service* Joel L. Fleishman, 1983 *U. S. Postal Service (USPS)* Phillip Herr, 2011-06 The USPS's financial outlook has

deteriorated as customers have shifted to electronic alternatives Mail volumes have declined over 20% since FY 2006 and are expected to continue declining To help its financial outlook in March 2010 USPS presented a detailed proposal to move from a 6 day to a 5 day delivery schedule USPS projected this would save about 3 billion annually and reduce mail volume by less than 1% This proposal factors in widespread changes to USPS s workforce and networks This report assessed 1 USPS s cost and volume estimates and the operational impacts associated with its 5 day delivery proposal and 2 the trade offs and other implications associated with this proposal Illus A print on demand report **Implications of Electronic Mail and Message Systems for the U.S. Postal Service** ,1982 Multi-Modal Competition and the Future of Mail Michael A. Crew,Paul R. Kleindorfer,2012 This compilation of original papers selected from the 19th Conference on Postal and Delivery Economics and authored by an international cast of economists lawyers regulators and industry practitioners addresses perhaps the major problem that has ever faced the postal sector electronic competition from information and communication technologies ICT This has increased significantly over the last few years with a consequent serious drop in mail volume All postal services have been hard hit by ICT but probably the hardest hit is the United States Postal Service which has lost almost a quarter of its mail volume since 2007 The loss of mail volume has a devastating effect on scale economies which now work against post offices forcing up their unit costs Strategies to stem the loss in volume include non linear pricing or volume discounts increased efficiency and the development of new products This loss of mail volume from ICT is one of a number of current problems addressed in this volume The Universal Service Obligation USO continues to be a leading issue and concern that ICT undermines postal services ability to finance the USO is discussed The importance of measuring and forecasting demand and costs take on even greater importance as ICT undermines the foundations of the postal business This thought provoking book brings to bear new analyses of the most serious threat post offices have ever faced and raises fundamental questions as to the future of mail Multi Modal Competition and the Future of Mail is an ideal resource for students researchers in regulation and competition law postal administrations policy makers consulting firms and regulatory bodies Addressing the US Postal Service's Financial Crisis United States.
