Through the Eyes of a Concerned Liberal Earle F. Zeigler, 2004-09-23 Through the Eyes of a Concerned Liberal argues that the socio political position of liberalism is the only one that can get us back on course toward the now vanishing enlightenment ideal This was the vision of the founding fathers looking to a time when all of the conditions of life social political moral and intellectual as well as material would be realized for everyone the American dream Taking a hard look at the present social political situation in North America Dr Zeigler offers a self evaluation test for the reader to determine his her socio political stance on a spectrum from far right to far left Other tests serve to evaluate respectively both one's philosophy of life and or religion and recreational quotient RQ The United States the author asserts simply does not appreciate that its current imperial status will be sorely tried in the 21st century The U S A must now prove that its brand of capitalism and democracy one that purports to offer a maximum of individual freedom within a democratic political system is the best approach for the entire world to emulate However capitalism and ecology have become social forces on a collision course in this evolving cultural matrix The individual citizen in this setting must be fully informed and must serve actively and responsibly to implement a liberal agenda The author offers 49 short essays columns and self evaluation devices that reflect his position In the final analysis each person should choose a life purpose based on 1 a comprehensive philosophy of life 2 a concurring socio political stance and 3 a search for the good life in a hopefully free society

Zeigler, 2011-07-14 I am not against sport and related physical activity What I am arguing is that employed properly and correctly exercise and sport as one of a number of vital social forces e g nationalism ecology could contribute to the improvement of the current situation in human health enormously Additionally in the case of related physical activity i e regular exercise or physical activity education in the developed world I believe humans are too often abusing it by first not understanding it and then by not using it more intelligently Ironically in the undeveloped world people often get too much exercise just to stay alive Moreover I believe that the active use of competitive sport worldwide to

promote what have been called moral values traits or attributes leading to world peace and good will as opposed to so called socio instrumental values that often are overly self serving This would tend to create a social force of such strength and power that humankind might be helped as it confronts the social and physical devastation looming ahead At the very least I believe such active promotion would delay to a considerable degree the onset of what is increasingly becoming a destructive societal situation

The "Big Three's" Takeover of Sport EARLE F. ZEIGLER Ph.D. LL.D. D.Sc., 2011-06-10 In the The BigThrees Takeover of Sport Dr Zeigler argues that such a take over of competitive sport by capitalism nationalism and democracy has become a very serious problem that gradually became a crisis as the twentieth century wore on The main purpose of this book to show that the commandeering or take over of sport by the conglomerate of three enumerated has created a situation where competitive sport has been increasingly degraded to a destructive professional morality espousing a mentality that screams Winning is now not the most important thing in sport it is the only thing If indeed such is the case this means that we must move now to assess the evolving situation more carefully than ever before

**Wisdom, Consciousness, and the Future** Thomas Lombardo, 2011-06-17 Wisdom Consciousness and the Future Collected Essays Thomas Lombardo Ph D Center for Future Consciousness Wisdom Consciousness and the Future is a profound deeply important and timely book that concerned people and change agents everywhere will want to read Copthorne Macdonald The Wisdom Page As a college professor and teacher of psychology philosophy and the future Tom Lombardo's mind has been drawn toward such questions as How will the human mind evolve in the future In fact how should the human mind evolve and improve itself What might be the standards and ideals that guide this evolution And what role does ethical development or evolution play in this process The twenty previously published articles collected together in Wisdom Consciousness and the Future chronicle the development of Dr Lombardo's ideas on these related questions and topics and together constitute a theoretical perspective on the nature of the human mind on how to best educate and evolve the human mind in the future and how to integrate into this vision the central importance of both future consciousness as a key dimension of human consciousness and ethical character virtues True to its title three key themes emerge in this collection wisdom consciousness and the future and all three concepts tie into the author's main contribution to the field of futures studies future consciousness Numerous essays for example Evolving Future Consciousness through the Pursuit of Virtue and The Evolution and Psychology of Future Consciousness address the nature of future consciousness a term Dr Lombardo defines as the complex set of mental capacities all humans possess for imagining conceptualizing and approaching the future Aside from describing the psychological make up of future consciousness which includes emotional motivational cognitive and personal dimensions the author also explains in numerous essays such as Developing Constructive and Creative Attitudes about the Future how to proactively enhance one's future consciousness Other essays deal directly with consciousness and the human mind in the broadest sense as in The Future Evolution of the Ecology of Mind and connect this general area of inquiry with the futurist question of how consciousness and mind might evolve in the future Dr Lombardo proposes that the progressive emergence of cosmic consciousness is the central evolutionary trajectory of the human mind Hence this book contains essays on both consciousness of the future and consciousness in the future While the discussion of consciousness and the future fascinates

in its own right Dr Lombardo is a holistic and deep thinker who searches for connections among myriad philosophical topics A number of essays address the question of ethics and virtue and how such concepts connect with both future consciousness and the evolution of consciousness in the future He then expands on this theme to explore how virtue applies to the goals of higher education in essays such as Ethical Character Development and Personal and Academic Excellence In thinking through the concept of virtue and how it applies to consciousness education and the future Dr Lombardo emphasizes the one key virtue wisdom that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In The Wisdom of Future Consciousness the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argument

**Jazz and Christian Freedom** Bradley K. Broadhead, 2018-12-21 Contemporary Western society has a strange relationship with freedom Unbridled subjective liberty and narrow fundamentalism pull away from each other in mutual loathing while sociological forces seek to manipulate both sides The church needs to recover and reconstruct a theology of freedom to navigate between the perils of both extremes and to avoid being manipulated by these forces Just as biblical figures are taught through parables and metaphors this book uses jazz improvisation as an analogy for Christian freedom Just as jazz improvisation relies on successfully navigating constraints such as the history and traditions of jazz jazz theory and musical instruments so Christian freedom also relies on constraints such as the biblical canon church history theology and the church itself Through understanding the freedom jazz musicians enjoy in making music together we can better understand how Christian freedom might be enacted in daily life If Western churches discover and enact Christian freedom in a meaningful way the songs that they improvise will be as siren calls to people in chains

systems that most often curtail privacy and civil liberties      **What I Have Learned...** Earle F. Zeigler, 2012-09-05 What I Have Learned or Nonagenarian Natterings Trafford 2012 might be considered a sequel to my Through the Eyes of a Concerned Liberal published in 2004 This sequel explains what I believe about various aspects of life and living i e why I believe what I do and what I sought to do about it all It could prove interesting to anyone facing the same or similar life problems in this crazy world that is becoming more scary as I write these words What I say here should be easily intelligible if not agreeable to any reasonably intelligent concerned member of North American society My historical interpretation laced with philosophical under girding led me to a belief that human civilization must be accepted as an adventure How could it be regarded otherwise As a young adult I entered the realm of life assessment by seeking a purpose for my life I accepted the philosophical stance known as pragmatism at this point while seeking to solidify my acceptance of political and social liberalism as guidance throughout my life I soon discovered the ever present need to make defensible ethical decisions based on a wise choice of values This matter was confounded by what I gradually saw as the ever increasing need to counteract Americas value orientation as the world moves along in the 21st century To do this I had to be sure that I was on the right track I did this by finding myself once again through self evaluation of my philosophic and socio political stances Hence I encourage all North Americans to re examine their values while embracing a modified form of postmodernism Finally I can only hope that America will come to its senses America must somehow live up to the values it so glibly espouses
