Futures Of Women Scenarios For The 21st Century:

The Futures Of Women Pamela McCorduck, Nancy Ramsey, 1996 As the 21st century approaches futurists have identified the evolving role of women in the family at work and in society as an area of globally significant inevitable change Using a powerful new way of understanding trends scenario planning the authors explore four dramatically different alternatives for the economic and social future of women

The Futures of Women Pamela McCorduck, 1997

Futures Beyond Dystopia Richard A. Slaughter, 2003-11-13 How can dystopian futures help provide the motivation to change the ways we operate day to day Futures Beyond Dystopia takes the view that the dominant trends in the world suggest a long term decline into unliveable Dystopian futures The human prospect is therefore very challenging yet the perception of dangers and dysfunctions is the first step towards dealing with them The motivation to avoid future dangers is matched by the human need to create plans and move forward These twin motivations can be very powerful and help to stimulate the fields of Futures Studies and Applied Foresight This analysis of current Futures practice is split into six sections The Case Against Hegemony Expanding and Deepening a Futures Frame Futures Studies and the Integral Agenda Social Learning through Applied Foresight Strategies and Outlooks The Dialectic of Foresight and Experience This fascinating book will stimulate anyone involved in Futures work around the world and will challenge practitioners and others to re examine many of their assumptions methodologies and practices

Feminist Futures Kum-Kum Bhavnani, John Foran, Priya A. Kurian, Debashish Munshi, 2016-10-15 Straddling disciplines and continents Feminist Futures interweaves scholarship and social activism to explore the evolving position of women in the South Working at the intersection of cultural studies critical development studies and feminist theory the book s contributors articulate a radical and innovative framework for understanding the linkages between women culture and development applying it to issues ranging from sexuality and the gendered body to the environment technology and the cultural politics of representation This revised and updated edition brings together leading academics as well as a new generation of activists and scholars to provide a fresh perspective on the ways in which women in the South are transforming our understanding of development

Schooling for Tomorrow Think Scenarios, Rethink Education OECD, 2006-04-24 Discusses how to develop scenarios to address the longer term challenges confronting education policy and practice

The Futures Of Women Pamela McCorduck, Nancy Ramsey, 1996 The official future says that women are moving toward equality with men If not in our lifetime we say then in our children s Think again If the rate of change during the last twenty years holds it would be 2270 before women and men were equally likely to be top managers of major corporations In The Futures of Women Pamela McCorduck and Nancy Ramsey explore four dramatically different alternatives for the coming years Using a powerful new way of understanding trends scenario planning the authors paint these vivid landscapes Backlash A Golden Age of Equality Two Steps Forward Two Steps Back and Separate and Doing Fine Thanks Each scenario has its own inner logic firmly grounded in today s events today s

demographic and social trends and in tomorrow's technological promises but each one derives from a different combination of the political, social and economic conditions that could prevail over the next twenty years. The authors report from the recent UN Fourth World Conference on Women in Beijing further supports their scenarios. The book began as a project for the Global Business Network, a unique consulting firm whose scenario planning methods have helped governments, policymakers and business leaders create effective strategies for the future. Decisions take on new meaning when we can live for awhile in the world that would result from a course of action we're now considering. Imagine a world where as many women as men are elected to the U.S. Congress. Or a world where fear for personal safety causes women to don the Muslim chador on Western streets. Or imagine a national economic policy influenced by giant pension funds whose managers and clients are mainly women. Or a world where exclusive resorts cater to the sexual needs of busy women executives. Are any of these worlds in our future? Any one of them could be. Only by understanding how we could move from here to there, how the choices we make today could actually play out, can we hope to influence which future comes to pass. The official future won't happen, but one of these four scenarios could. The compelling stories of women living in these futures give women today the reasons and the inspiration to shape their own.

Writing on the Wall Philip Van Notten, 2005. Although the significance of 9/11 is subject to debate, it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events. Recent catalysts of this sentiment are eye-catching developments such as the SARS/Severe Acute Respiratory Syndrome and bird flu outbreaks, the Enron and Parmalat scandals, political assassinations in Sweden and the Netherlands, regime changes in Iraq and Afghanistan and terrorist attacks in Bali, Istanbul, Madrid and various parts of the Middle East. However, recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before. Looking back in history, we see that disruptive processes are common. For example, 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent: the collapse of communism, Berlin as the capital of a reunited Germany, the wars in the former Yugoslavia, the single European currency and the near doubling of the number of European Union member states. Changes elsewhere have been no less discontinuous and unforeseen: the fall of the Asian tigers, the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela. Societal discontinuity is a relatively new area of concern in policy development. Since the 1970s, the consideration of change and discontinuity has gained some ground over predictive forecasting, which tended to reason from continuous developments and linear processes. Rather than making forecasts of the future, it has become popular to use scenarios as a manner to consider several possible futures. Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past, present and future developments, which can serve as a basis for action. Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks. Scenario development assumes that the future is uncertain and the directions in which current

developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

Foresight in Action Marjolein van Asselt, Susan van 't Klooster, Philip van Notten, Livia A. Smits, 2012-06-25 Assessing the future is vital in informing public policy decisions One of the most widespread approaches is the development of scenarios which are alternative hypothetical futures Research has indicated however that the reality of how professionals go about employing scenarios is often starkly at odds with the theory a finding that has important ramifications for how the resulting images of the future should be interpreted It also shows the need for rewriting and updating theory This book based on an intensive five year study of how experts actually go about assessing the future provides a groundbreaking examination of foresighting in action Obtained via ethnographic techniques the results lay bare for the first time the real processes by which scenarios are made It is also the first book to examine foresighting for public policy which is so often overlooked in favour of business practice From handling of discontinuity to historical determinism the analysis reveals and explains why foresight is difficult and what the major pitfalls are Each chapter ends with a toolkit of recommendations for practice The book aims to help readers to reflect on their own practices of public oriented foresight and thus to foster a deeper understanding of the key principles and challenges Ultimately this will lead to better informed decision making

A Short History of the Future W. Warren Wagar, 1999-08 Narrated by a far future historian Peter Jensen leaves an account of the world from the 1990s to the opening of the 23rd century as a gift to his granddaughter A combination of fiction and scholarship this third edition of Wagar's speculative history of the future alternates between descriptions of world events and intimate glimpses of this historian's family into the first centuries of the new millennium

Academic Anthropology and the Museum Mary Bouquet, 2001-12-01 The museum boom with its accompanying objectification and politicization of culture finds its

counterpart in the growing interest by social scientists in material culture much of which is to be found in museums Not surprisingly anthropologists in particular are turning their attention again to museums after decades of neglect during which fieldwork became the hallmark of modern anthropology so much so that the social and the material parted company so radically as to produce a kind of knowledge gap between historical collections and the intellectuals who might have benefitted from working on these material representations of culture Moreover it was forgotten that museums do not only present the pastness of things A great deal of what goes on in contemporary museums is literally about planning the shape of the future making culture materialize involves mixing things from the past taking into account current visions and knowing that the scenes constructed will shape the perspectives of future generations However the re invention of museum anthropology presents a series of challenges for academic teaching and research as well as for the work of cultural production in contemporary museums issues that are explored in this volume **U.S. National Interests and the Western Hemisphere** Frances Scott,1998

Kimono in the Boardroom Jean R. Renshaw,1999-09-23 Japanese women who comprise more than 40% of their country s workforce are essential to the Japanese economy Yet they are not typically thought of as managers at home or abroad Jean Renshaw challenges that perception in this pathbreaking book showing readers where and how an invisible evolution is occurring in Japanese business Traditional norms of lifetime employment the seniority system and the bureaucratic tightly knit nature of Japanese industry all restrict women s entry into management Despite these enormous barriers the number of Japanese women managers has almost doubled in the last ten years In an effort to discover the secrets of their success Renshaw interviewed over 150 successful Japanese women managers She explored family backgrounds personal characteristics socialization professional experiences and corporate cultures This book presents her sometimes surprising discoveries Renshaw completes the picture by surveying the history of Japanese women in management and discussing the even newer phenomenon of Japanese women who own their own businesses An eye opening work for managers of international firms and scholars of business and women s studies Kimono in the Boardroom reveals the potential of the rising female managerial class to profoundly change the male dominated culture of modern Japan Value Management In Professions: Present Scenario, Future Strategies Nalin K. Managing Development E. Frankel,2005-04-19 This book presents a critical view of economic development in the last 50 years and evaluates different approaches taken that led to success or failure It covers development policies methods procedures as well as development project selection and how the one size fits all approach taken by major players in development resulted in huge waste and disappointments Global examples and comparisons are used to identify the need for selective strategies and new ways to assure development effectiveness Women in Action

,2001 **"A" is for Abductive** Leonard I. Sweet,Brian D. McLaren,Jerry Haselmayer,2003 A playful witty but substantive postmodern ministry for dummies type book that fills the huge and getting huger hunger for something in one volume that

introduces basic concepts and vernacular of postmodern ministry Work-Lifestyle Choices in the 21st Century Catherine Hakim, 2000-11-02 In this book Hakim presents a new multi disciplinary theory for explaining and predicting current and future patterns of women s choice between employment and family work Preference theory is the first theory developed specifically to explain women s behaviour and choices As such it constitutes a major break from male centred theorizing to date in sociology and economics Preference theory is grounded on the substantial body of new research on women s work and fertility that has flourished within feminist scholarship It identifies five major historical changes that collectively are producing a qualitatively new scenario for women in prosperous societies in the 21st century Throughout the analysis the USA and Britain illustrate what the new scenario means for women how it alters their preferences and work lifestyles choices Hakim also reviews research evidence on contemporary developments across Europe Canada Australia Japan and the far East to develop a new theory that is genuine international in perspective
