Fuzzy Thinking A Series Of Challenging Editorials:

Fuzzy Thinking Ernest E. Behn, 2002-02 Sometimes as a nation when everything is prospering apathy sets in and society wants to take it easy They choose security over opportunity in the pursuit of happiness The author believes this is not what made the country great He explains the need to choose opportunity again and become less dependent upon the government

Focus Groups Richard A. Krueger, 2014-08-14 This updated edition of Focus Groups A Practical Guide for Applied Research walks readers step by step through the how tos of conducting focus group research Using an engaging straightforward writing style authors Richard A Krueger and Mary Anne Casey draw on their many years of hands on experience in the field to cut through theory and offer practical guidance on every facet of the focus group process including tips for avoiding problems and pitfalls The Fifth Edition is updated with the latest research and technological innovations and includes new coverage on planning with analysis in mind creating conversational questions that have the potential for producing unique and valuable insights the art of hosting a focus group common sense thinking about reporting more efficient strategies for planning the study and emerging areas of focus group research such as conducting cross cultural international and Internet focus groups Krueger and Casey s book does a magnificent job of incorporating both theoretical and practical approaches to the study of focus groups It is the only hands on book which explores the process of focus group research Theresa Carilli Purdue University Calumet

Reliable Decision-Making for Sustainable Transportation Gholamreza Haseli, Mostafa Hajiaghahi-Keshteli, Sarbast Moslem, 2025-08-22 Reliable Decision Making for Sustainable Transportation explores decision making methods that incorporate expert and decision maker opinions for improved reliability The book examines fuzzy sets that capture ambiguity and enable a more comprehensive analysis of stakeholder perspectives focusing on transportation case studies to demonstrate techniques for weighing criteria ranking alternatives and selecting optimal and reliable decisions It seeks to advance transportation planning traffic engineering road safety and sustainability by integrating state of the art decision support systems that leverage AI and multiple stakeholder viewpoints This approach will benefit researchers and professionals across transportation decision sciences supply chain management and operations looking for innovative ways to model uncertainty and decision maker reliability and providing methodologies and frameworks for more robust group decisions Introduces reliability concepts in decision making providing insights into the robustness of strategic choices for sustainable transportation Presents practical case studies within the transportation sector to illustrate the application of reliability principles in decision making offering tangible solutions to everyday challenges Provides reliable strategies for existing public transportation systems considering the unique challenges faced by investment departments and engineers in the planning process

Brain Vs Computer: The Challenge Of The Century Jean-pierre Fillard, 2016-12-12 It is well

known that every animal species obeys Darwin's law of evolution which requires permanent adaptation of animals to their environment. To be precise every species except man who behaves exactly contrariwise adapting the workplace to himself in order to survive. For that he generally enjoys a particular gift of nature intelligence. That reverse adaptation which accumulated over centuries led to what we call progress. This was enhanced by the development of machines which began to be also intelligent and now compete fiercely with humans through the development of an artificial intelligence. Some famous people in the world of science and technology recently sounded the alarm about the threats which these improvements are posing. They invoked a possible domination by the machines due to their uncontrolled superior intelligence potentially leading us into a certain kind of slavery. In this book we take a look at this new challenge of the human brain versus the computer. The brain is a very complex organ and we are just beginning to understand how it works; many things remain mysterious and can lead to surprises. We will see how current investigations bring new information about this strange organ. We will also see how the artificial challenger plans to win the battle; how computers are getting more and more powerful and subtle as the AI advances. Would a transfer of minds in a machine be possible? Would the computer be capable of a self nonneuromorphic intelligence? These questions are now open. Who will win? We do not know yet. But it is certain that many things are going to change in our lives in the very near future.

Collections of Articles Dr. Henry Garrett, 2023-02-01

In this research book there are some research chapters on Collections of Articles. With researches on the basic properties the research book starts to make Collections of Articles more understandable. Some studies and researches about neutrosophic graphs are proposed as book in the following by Henry Garrett 2022 which is indexed by Google Scholar and has more than 2498 readers in Scribd. It is titled *Beyond Neutrosophic Graphs* and published by Ohio E publishing Educational Publisher 1091 West 1st Ave Grandview Heights Ohio 43212 United State. This research book covers different types of notions and settings in neutrosophic graph theory and neutrosophic SuperHyperGraph theory. Surgically Shaping Children Erik Parens, 2006-05-06 Winner of an Honorable Mention in the Clinical Medicine category of the Professional and Scholarly Publishing Awards given by the Association of American Publishers At a time when medical technologies make it ever easier to enhance our minds and bodies a debate has arisen about whether such efforts promote a process of normalization which makes it ever harder to tolerate the natural anatomical differences among us The debate becomes especially complicated when it addresses the surgical alteration or shaping of children This volume explores the ethical and social issues raised by the recent proliferation of surgeries designed to make children born with physical differences look more normal Using three cases surgeries to eliminate craniofacial abnormalities such as cleft lip and palate surgeries to correct ambiguous genitalia and surgeries to lengthen the limbs of children born with dwarfism the contributors consider the tensions parents experience when making such life altering decisions on behalf of or with their children The essays in this volume offer in depth examinations of the significance and limits of surgical alteration through personal narratives theoretical reflections and concrete suggestions about how to improve the decision making process Written from the perspectives of affected children and their parents health care providers and leading scholars in philosophy sociology history law and medicine this collection provides an

integrated and comprehensive foundation from which to consider a complex and controversial issue It takes the reader on a journey from reflections on the particulars of current medical practices to reflections on one of the deepest and most complex of human desires the desire for normality Contributors Priscilla Alderson Adrienne Asch Cassandra Aspinall Alice Domurat Dreger James C Edwards Todd C Edwards Ellen K Feder Arthur W Frank Lisa Abelow Hedley Eva Fedder Kittay Hilde Lindemann Jeffery L Marsh Paul Steven Miller Sherri G Morris Wendy E Mouradian Donald L Patrick Nichola Rumsey Emily Sullivan Sanford Tari D Topolski Resources in Education ,1996 **Social Work Practice** Eileen D.
