Campbell,2017-09-29 The goal of the twelve essays in this volume contributed by scholars in the fields of history literature art history and medicine is to enrich our understanding of cultural discourses on ageing in early modern Europe While a number of books examine old age in other eras and a few touch on the early modern period this is the first to focus explicitly on representations of ageing in Europe from 1350 1700 These studies invite the reader to take a closer look at images of ageing they show that representations are embedded in specific communities life situations and structures of power As well the book explores how representations of old age function in various and often surprising ways as repositories of socio cultural anxieties as strategies of self fashioning and as instruments of ideology capable of disciplining the body and the body politic Since this book is about how old age as a cultural category was produced and maintained through representation the essays in this volume are organised thematically across geographic disciplinary and media boundaries to foreground the politics and poetics of representational strategies The contributors to this collection show that our understanding not only of ageing but also of power subjectivity gender sexuality and the body is enriched by the study of cultural representations of old age Through sensitive and sophisticated readings of a wide range of sources these papers collectively demonstrate the formative influence and generative force of images of old age within early modern European culture **Aging Gracefully**

From Literacy to Literature: England, 1300-1400 Christopher Cannon, 2016-10-06 The first lessons we learn in school can stay with us all our lives but this was nowhere more true than in the last decades of the fourteenth century when grammar school students were not only learning to read and write but understanding for the first time that their mother tongue English was grammatical The efflorescence of Ricardian poetry was not a direct result of this change but it was everywhere shaped by it This book characterizes this close connection between literacy training and literature as it is manifest in the fine and ambitious poetry by Gower Langland and Chaucer at this transitional moment This is also a book about the way medieval training in grammar or grammatica shaped the poetic arts in the Middle Ages fully as much as rhetorical training It answers the curious question of what language was used to teach Latin grammar to the illiterate It reveals for the first time what the surviving schoolbooks from the period actually contain It describes what form a grammar school took in a period from which no school buildings or detailed descriptions survive And it scrutinizes the processes of

elementary learning with sufficient care to show that for the grown medieval schoolboy well learned books functioned not only as a touchstone for wisdom but as a knowledge so personal and familiar that it was equivalent to what we would now call experience
