Gaia I Journey Into Vanish Worlds:

Gaia I, 1999 Photographer Paige Deponte and writer Mark Berry traveled to the remote tropical rainforest of Madagascar Peru Costa Rica Brazil Hawaii and South Africa to gather material for the extraordinary book documenting several key hotspots of biodiversity These are botanically rich and unique places in the world that not only hold the greatest diversity of life but are also the most endangered Journey into Vanishing Worlds blends scattered poetry with toned black and white photographs of lush natural landscapes endemic species of animals and plants and native people This haunting imagery offers a compelling yet unsentimental portrait of these rare and beautiful ecosystems and the environmental degradation brought about the human activity Striking nudes in the wilderness are ment to remind us of our natural connection to the Earth *Gaia's Revenge* Krista Larson, **Gaia's Hidden Life** Shirley J. southern Atlantic a translucent blue butterfly fluttered its delicate gossamer wings while dancing its whimsical way through fragrant flowers and ferns in sleepy woodland waking up to a glorious brand new day Sunlight shone through twisted thick gnarly branches of trees older than time itself Standing there the timeless trees stood like megalithic statues greeting the solar dawn The Wizardly Journey is a colourful and diverse escapist fantasy novel which is full of interesting characters each of whom represent the extremes and duality of human nature Some are dedicated to saving precious lives and fragile eco systems living authentically with kindness and courage while others are selfish and hide a dark agenda This book will take the reader on a magical journey through different cultures myths legends and exotic locations As well as opening the reader s eyes to an amazing fairytale The Wizardly Journey explores very real human issues such as conserving the planet protecting animals marine and avian life and the environment A kaleidoscopic journey through the light and dark energies of humankind this book will appeal to readers aged 13 and over Written with the aim to giving animals a voice The Wizardly Journey draws attention to animals concerns and addressed them with an open mind The Destined Warrior Mr. Jonathan

Burrell, 2010-01-19 Centuries ago in realm unlike our own a realm where mythical creatures resides a war was being held between all creatures vampires sorcerers werewolves etc all fighting for the mythical realm As the war went to Gaia mother of the earth and earth mother to all realms was really furious so she appeared from the ground in the middle of the battle field and said That s it I ve sat along side and watched you fight for centuries and I m sick of it Since you can t share this land I will have to separate you and put you on your own separate lands So Gaia waved her hands in the air and closed her eyes and from her hand magic came out and the land started to magically separate and transporting them all to the land meant for each of them **The Publishers Weekly**, 2002 *Gaia's Web* Karen Bakker, 2024-04-16 A riveting exploration of one of

the most important dilemmas of our time will digital technology accelerate environmental degradation or could it play a role in ecological regeneration At the uncanny edge of the scientific frontier Gaia's Web explores the promise and pitfalls the Digital Age holds for the future of our planet Instead of the Internet of Things environmental scientist and tech entrepreneur Karen Bakker asks why not consider the Internet of Living Things At the surprising and inspiring confluence of our digital and ecological futures Bakker explores how the tools of the Digital Age could be mobilized to address our most pressing environmental challenges from climate change to biodiversity loss Interspersed with ten elegiac enigmatic parables each of which is based on an existing technology Gaia's Web evokes the conundrums we face as the World Wide Web intertwines with the Web of Life A new generation of innovators is deploying digital technology to come to the aid of the planet using spy satellites to track down environmental criminals inviting animals to the Metaverse and biohacking Frankenstein like biobots as environmental sentinels But will they end up doing more harm than good In an engaging take on conservation technology Bakker looks at the digital tech applications to environmental issues from predatory harvesting of environmental data to human bycatch and eco surveillance capitalism If we address these issues and mobilize digitally mediated forms of citizen science she argues digital tech could help reverse environmental harms and advance environmental sustainability And in the process Big Tech might be transformed for the better With its uniquely broad scope combining insights from computer science ecology engineering environmental science and environmental law Gaia's Web introduces profoundly novel ways of addressing our most pressing environmental challenges mitigating climate change protecting endangered species and creating new possibilities for ecological justice by empowering nonhumans to participate in environmental regulation

Gaia I, 1999-01-01 **A World Scientific Encyclopedia Of Business Storytelling, Set 1: Corporate And Business Strategies Of Business Storytelling (A 5-volume Set)**, 2023-08-17 This set of multi reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh Who will wear the shoes is a question long debated in art history and philosophy If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing a new and impressive dialogue for the reader This set is presented as a new way to lace up the laces of business storytelling Volume 1 aims to recount narratives in a variety of ways so that the precepts of entrepreneurial storytelling can be made accessible to a variety of audiences academic practitioner student and community member Entrepreneurship has a long history and tradition but there are disputed ways of doing business storytelling in entrepreneurship that the next four volumes articulate Volume 2 provides insights into stories fostering the idea of business and not necessarily business itself It focuses specifically on history contributing to the current debates within management and organizational history around the idea of the historic turn It reflects on the idea of business and beyond could there be more to history and business storytelling than what has previously been accepted in the field This book sets out to explore a diverse array of alternative modes and multiple ways of storying

organizations The editors intentionally sought to involve an international network of authors with diverse storytelling accounts of history as a way of helping build out this new storytelling paradigm in a diverse and inclusive ethic As a result this volume showcases a broad spectrum of critical storytelling from geographically diverse authors working in universities small businesses and public service throughout Brazil Canada Finland the United Kingdom and the United States To reflect these dynamics and for the stories in this volume to fit together chapters were organized into three themes stories of processing history tales of history as method and narratives of history through a business opportunity Volume 3 features stories that reflect the exacerbated inequalities of race gender and income across the world These inequalities and power relations remain continuously contested particularly in these trying times despite being captive to a particular economic ideology built on the premise of exploitation and subjugation The stories told in this volume tell against the orthodoxy the colonizer and the seemingly powerful They are organized as stories of resistance emancipation and transformation They invite us to rethink the multiple ways to restructure power relations between the colonizer and the colonized and open up spaces for the marginalized underprivileged voices Volume 4 is designed to create a new business storytelling paradigm that critically approaches business narratives that have historically privileged a corporate agenda It explores the various ways that images of the other in business are developed presented and accounted for through powerful and dominant narratives The stories in this volume collectively help readers to understand resist and provide strategies for change through various analyses of how business narratives come to develop get written are legitimized are challenged and get changed over time Volume 5 brings together the practices specific to the socioeconomic approach to management SEAM SEAM is a method of change management developed through research interventions carried out in more than 2 000 companies and organizations since 1975 This method is systemic it considers the whole company and tends to simultaneously increase social and economic performance by focusing mainly on the development of human skills and behaviors making it possible to reduce dysfunctions and recycle hidden costs into added value

Fictionalizing Anthropology Stuart J. McLean,2017-11-22 What might become of anthropology if it were to suspend its sometime claims to be a social science What if it were to turn instead to exploring its affinities with art and literature as a mode of engaged creative practice carried forward in a world heterogeneously composed of humans and other than humans Stuart McLean claims that anthropology stands to learn most from art and literature not as evidence to support explanations based on an appeal to social context or history but as modes of engagement with the materiality of expressive media including language that always retain the capacity to disrupt or exceed the human projects enacted through them At once comparative in scope and ethnographically informed Fictionalizing Anthropology draws on an eclectic range of sources including ancient Mesopotamian myth Norse saga literature Hesiod Lucretius Joyce Artaud and Lispector as well as film multimedia and performance art along with the concept of fabulation the making of fictions capable of intervening in and

transforming reality developed in the writings of Bergson and Deleuze Sharing with proponents of anthropology s recent ontological turn McLean insists that experiments with language and form are a performative means of exploring alternative possibilities of collective existence new ways of being human and other than human and that such experiments must therefore be indispensable to anthropology s engagement with the contemporary world **Vesik: The Dufri Years** Eric R. Mulligan,2024-02-29 After the cradle was lost humankind expanded across the Orion Arm of the Milky Way Centuries of conflict followed but peace returned under the rule of the Commonwealth Now the enormous world settling starships of the past have been recommissioned and the Astraeus has set sail to find new worlds at the centre of the galaxy Not long into the journey Lizabeth Denning witnesses a horrific murder and sees the wrong man framed And to make matters worse the ship begins to experience violent tremors In a race against time the passengers must find the killer and repair the ship before
