Gaining A Foothold Womens Transitions Through Work And College:

Gaining a Foothold ,1999 Explores how and why women make educational transitions focusing on factors that influence women as they move from school to work and back to school Identity Construction and Science Education Research Maria Varelas,2012-12-17 In this edited volume science education scholars engage with the constructs of identity and identity construction of learners teachers and practitioners of science Reports on empirical studies and commentaries serve to extend theoretical understandings related to identity and identity development vis vis science education link them to empirical evidence derived from a range of participants educational settings and analytic foci examine methodological issues in identity studies and project fruitful directions for research in this area Using anthropological sociological and socio cultural perspectives chapter authors depict and discuss the complexity messiness but also potential of identity work in science education and show how critical constructs such as power privilege and dominant views access and participation positionality agency structure dialectic and inequities are integrally intertwined with identity construction and trajectories Chapter authors examine issues of identity with participants ranging from first graders to pre service and in service teachers to physics doctoral students to show ways in which identity work is a vital albeit still underemphasized dimension of learning and participating in science in and out of academic institutions Moreover the research presented in this book mostly concerns students or teachers with racial ethno linguistic class academic status and gender affiliations that have been long excluded from or underrepresented in scientific practice science fields and science related professions and linked with science achievement gaps This book contributes to the growing scholarship that seeks to problematize various dominant views regarding for example what counts as science and scientific competence who does science and what resources can be fruitful for doing science **Reformed American Dreams** Sheila M. Katz,2019-07-12 Reformed American Dreams explores the experiences of low income single mothers who pursued higher education while on welfare after the 1996 welfare reforms This research occurred in an area where grassroots activism by and for mothers on welfare in higher education was directly able to affect the implementation of public policy Half of the participants in Sheila M Katz s research were activists with the grassroots welfare rights organization LIFETIME trying to change welfare policy and to advocate for better access to higher education Reformed American Dreams takes up their struggle to raise families attend school and become student activists all while trying to escape poverty Katz highlights mothers experiences as they pursued higher education on welfare and became grassroots activists during the Great Recession Strategies for Managing IS/IT Personnel ,2004-01-01 This title collects and presents key research articles focused on identifying defining and measuring accomplishment in knowledge management A significant collection of the latest international findings within the field this book provides a strong reference for students researchers and practitioners involved with organizational knowledge management **College Students and Their Environments** Cathy Akens,Raquel Wright-Mair,Joseph Martin Stevenson,2019-07-24 The best value that the reader will

take from this book is the knowledge skills and wisdom offered by the editors and 26 chapter authors The book offers many unique features on how to create a college environment that fosters student learning growth development and supports student success The book approaches the college environment issue from a philosophical foundation and shows the reader what has made student affairs work increasingly complex By identifying some major shifts of student affairs work in history the text demonstrates how student affairs service providers became student affairs educators who actively shape the environment instead of being shaped or reactionary The book provides insights and implications on how the environmental theories might inform practice and also recommends how to study campus environments Furthermore the text clarifies what student access is explores the primary frameworks used to boost student success and suggest what student affairs educators should consider when implementing student success initiatives Additionally the book addresses the intersection of professional competency areas through campus environment cultivation with social justice and inclusion for diverse student populations Particularly the book provides useful and practical examples of how faculty can work with graduate students in training to conduct an assessment of student needs and success This book is purposely written for those who are training to become student affairs educators and those who are newer in the profession It not only provides the reader with a theoretical framework but also some direction on how to create a college environment that is socially justice and inclusive

Resources in Education ,2000 Getting There Cynthia Lee A. Pemberton,Rima Karami Akkary,Donna M.

Beegle,Eileen Casey White,Wangeci M. Gatimu,2012-10-13 This book chronicles the lived experience educational journeys of women who found themselves moving forward together pursuing doctoral degrees in Educational Leadership Grounded in the realities of women s lives these inspirational first person narratives have the potential to raise awareness regarding women s socialization expectations and the role interpersonal and community connections play in the lived female experience This book provides a potential resource for those considering how relationships and support groups impact life s journey and their importance in overcoming barriers to educational attainment and success In her book Flux Peggy Orenstein encourages women to share their experiences and talk across lines of age and circumstance p 292 This book does that bringing into focus the complicated and convoluted knotty thorny messy realities of women s lives Seeing clearly the forest and the trees the grass the shrubs and dirt the fully fleshed out realities we as educators can more fully and accurately see and appreciate the conflicting competing chaos that characterizes and often monopolizes women s lives and from there establish a foundation of understanding from which to begin retooling higher education to better meet the life and learning needs of all our students In the end Orenstein says there is no single path to a textured satisfying life nor should there be p 293 and indeed as this book reveals there is not Despite geographical and generational differences these women s independent and intersecting lives created and even today supports and sustains their ongoing connection empowerment and achievements and as such not only leaves a legacy for others but a blueprint of and for hope **Understanding Girls** Dale Rose Baker,2016-07-25

Understanding Girls Quantitative and Qualitative Research is a retrospective of the author's research that led to receiving the 2013 Distinguished Contributions Award to Science Education through Research. This book includes selected articles that document changes in her research approaches and theoretical frameworks. The articles represent the evolution of her thinking about the issue of girls in science as well as her impact on science education. The author's work is placed in the context of science education research at the time of publication, research in education and psychology, and the culture of the times. She pulls back the curtain that often makes the messy work of research seem straightforward and linear to reveal why she did the research and the methodological decisions she faced. She describes the serendipitous nature of some of the work as well as her frustrations in trying to understand data and struggles to insure that she accurately and respectfully presented the voices of girls and their teachers. The book also includes some of the earliest research in engineering education preceding the focus on engineering practices found in the Next Generation Science and Engineering Standards. Understanding Girls provides insights into why girls may or may not decide to participate in science and engineering and what can be done to increase their participation. It provides evidence that we have increased girls' participation and the challenges that remain to insure that every girl who wants to become a scientist or engineer has the opportunity to do so.

Women at Work American Association of University Women. Educational Foundation, 2003 Combines interview and survey data with recent U.S. census statistics to explore how women are faring in today's work force and what their prospects are for future job success and security. P. 53

The Career Mystique Phyllis Moen, Patricia Roehling, 2005 The Career Mystique shows that most Americans men and women continue to embrace the myth that hard work, long hours, and continuous employment pay off even though it is out of date and out of place in twenty-first century America. Phyllis Moen and Patricia Roehling argue that the lock-step arrangements around education, work, family, and retirement no longer fit the realities and risks of contemporary living yet the roles, rules, and regulations spawned by the career mystique remain in place. This book shows that ambiguities and uncertainties about the future abound in boardrooms, in offices, and on factory floors as Americans face the realities of corporate restructuring, chronic job insecurity, and double demands at work and at home. Moen and Roehling show the career mystique for what it is: a false myth standing in the way of creating new alternative workplaces and career flexibilities. Based on research funded by the Alfred P. Sloan Foundation and the National Institute on Aging.
