That Synching Feeling Michelle Levigne, 2021-04-27 Rover Pilot Nureen Keala Rhianni Day s best friend is on patrol on the other side of the galaxy from Mallachrom She would rather be supporting

Rhianni's mission but the bureaucrats aren't cooperating. Responding to a distress call puts Nureen in the wrong place at the wrong time. She falls through a vortex into another universe that has never heard of the Rovers or the war against the Talroqi. On a space station belonging to the Trefarian Empire, Tedrin Creed has been waiting for the vortex to open again. Five years ago, Talroqi ships attacked his ship. After sending his crew away to safety, he defeated the Talroqi before the vortex sucked down his ship. He has been lying to the Empire's people ever since, waiting for the vortex to open so he can go home. When a ship and a pilot claiming to be a Rover fall through, his chance has finally come. Problem: This ship is like no Rover ship he has ever seen, and the pilot doesn't like him or believe he is who he says he is. Nureen has every reason to distrust this man who claims to be Tedrin Creed. She knows all about him. He was her grandfather's best friend and died a hero fifty years ago. Time is the problem in several ways. The vortex and the way home will only be open for a short period of time. Can they learn to trust each other and escape the dangers of the Empire before time runs out.

Star Trek Robert Greenberger, 2012-11-08

This is the first book to combine an authoritative history of the Star Trek franchise including all six television series and eleven feature films with anecdotes about the show from those who helped shape it from the outside. In the fans' Star Trek expert Robert Greenberger covers everything from show creator Gene Roddenberry's initial plans for a series combining science fiction and Western elements, the premiere of the original series in 1966, its cancellation, the franchise's return in an animated series, and its subsequent history on television and film up to expectations for the 2013 J.J. Abrams film. Along the way, Greenberger analyzes Star Trek's unique cultural impact and tremendous cult following, including the famous and first-ever save-the-show mail campaign. But this isn't a sugarcoated history; this book chronicles the missteps as well as the achievements of Roddenberry and others behind the franchise. Approximately two dozen sidebars provide personal experiences of dedicated Trekkies who influenced or became a part of the franchise. Star Trek fandom is unparalleled in the effects it has had on the franchise itself. The book is illustrated with a large collection of photographs of memorabilia, many of which have never been seen before in print.

Scripture Versus Science : Reconciling God's Ancient Wisdom with a Modern World View Robert D. Harter, PhD, 2015-07-12 With trepidation Dr Robert D Harter approached the subject of Earth origins and human development from the position of a lifelong Christian who is also a scientist He grew up in a rural Ohio Christian family and thoroughly understands the position of those who believe the Earth and everything in it was created a few thousand years ago At the same time he is a university professor

who understands the basis upon which the Earth is claimed to be millions of years old Both positions cannot be correct and it is probable that neither is completely wrong Using a scientist s analytical approach Dr Harter evaluated and compared biblical anthropological and geological records In Scripture Versus Science he proposes a resolution to the increasingly heated argument about evolution While unlikely to provide a clear and definitive answer this book begins to thin the fog that has developed around it He states There has been a lot of fog associated with whether God created the universe and everything in it or whether it just happened by chance In writing this book I attempt to show that the ideas supporting the two views are not necessarily mutually exclusive In other words I hope I have allowed a bit of sun to shine through the fog
