

A large multi-masted sailing ship, likely a schooner, is shown from a side profile, sailing on a calm blue sea under a clear sky. The ship's white sails are partially deployed, and its dark hull is visible. The ship is positioned on the left side of the frame, with its masts and rigging extending towards the right.

Although the basic principles in marine firefighting have not changed, this study guide offers up to date information for a better understanding of the principles and methodologies involved. It also utilizes current day examples, equipment and techniques, breaking down the text into twelve easy to follow lessons: basic shipboard firefighting organization and safety, causes of fires and methods of prevention, theories of fire, combating fire, extinguishing agents, extinguishing appliances, fire detection systems, fixed fire extinguishing systems, safety and firefighting equipment and respirators, and the self-contained breathing apparatus.
