Richard A. Schroeder,1999-10-01 Shady Practices is a revealing analysis of the gendered political ecology brought about by
conflicting local interests and changing developmental initiatives in a West African village Between 1975 and 1985 while
much of Africa suffered devastating drought conditions Gambian women farmers succeeded in establishing hundreds of
lucrative communal market gardens In less than a decade the women s incomes began outstripping their husbands in many
areas until a shift in development policy away from gender equity and toward environmental concerns threatened to do away
with the social and economic gains of the garden boom Male landholders joined forestry personnel in attempts to displace the
gardens and capture women s labor for the irrigation of male controlled tree crops This carefully documented microhistory
draws on field experience spanning more than two decades and the insights of disciplines ranging from critical human
geography to development studies Schroeder combines the success story of the market gardens with a cautionary tale about
the aggressive pursuit of natural resource management objectives however well intentioned He shows that questions of
power and social justice at the community level need to enter the debates of policymakers and specialists in environment and
development planning **Country Environmental Profile** ,1995 **The Small Country that Can** Gambia. Department
