### Abstract

This paper was written to review the literature on the historical relationship between gambling and organized crime (OC) in the 19th, 20th, and 21st centuries; examine the current state of affairs; point out gaps in the knowledge; and above all draw attention to this understudied topic. The paper begins with an examination of the different sources of information examined, including law enforcement reports, participant observation studies, psychological and economic studies of the links between gambling and crime, historical studies of gambling and crime, and a number of commission reports. The paper then provides an overview of OC and definitions of OC and gambling. This is followed by a discussion of the history of OC and its historic links to gambling. The paper ends with a discussion of the contemporary setting and directions for future research. Our literature review was written in part to facilitate further research and thereby help rectify a shortcoming in overall efforts to understand and document gambling-related issues.

**Keywords:** organized crime, gambling, literature review, history.

### Introduction

This project began when a colleague asked the second author for an academic reference on the relationship between problem gambling and organized crime (OC). He could think of several films, but not of any academic paper that explicitly examined the topic. This paper is the result of an attempt to answer that request.

Under Canadian law, only the government (and its licensed agents), charities, and the horse-racing industry are legally entitled to offer gambling to the public. Privately run sports books, card rooms, numbers games (lotteries), and unlicensed casinos are therefore illegal. In the United States, legal gambling is often run privately but operates under license by the state. In Canada, Australia, the United States, and the United Kingdom, the laws regulating gambling deal
