Garbage In The Cities Refuse Reform And The Environment 1880-1980 Environmental History Series Number 4:

Environmental Inequalities Andrew Hurley, 2009-11-30 By examining environmental change through the lens of conflicting social agendas Andrew Hurley uncovers the historical roots of environmental inequality in contemporary urban America Hurley's study focuses on the steel mill community of Gary Indiana a city that was sacrificed like a thousand other American places to industrial priorities in the decades following World War II Although this period witnessed the emergence of a powerful environmental crusade and a resilient quest for equality and social justice among blue collar workers and African Americans such efforts often conflicted with the needs of industry To secure their own interests manufacturers and affluent white suburbanites exploited divisions of race and class and the poor frequently found themselves trapped in deteriorating neighborhoods and exposed to dangerous levels of industrial pollution In telling the story of Gary Hurley reveals liberal capitalism's difficulties in reconciling concerns about social justice and quality of life with the imperatives of economic growth He also shows that the power to mold the urban landscape was intertwined with the ability to govern social relations

Measuring and Improving Infrastructure Performance National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Measuring and Improving Infrastructure Performance, 1995-01-01 The nation's physical infrastructure facilitates movement of people and goods provides safe water provides energy when and where needed removes wastes enables rapid communications and generally supports our economy and quality of life Developing a framework for guiding attempts at measuring the performance of infrastructure systems and grappling with the concept of defining good performance are the major themes of this book Focusing on urban regions within a context of national policy the volume provides the basis for further in depth analysis and application at the local regional state and national levels

Housing and Planning References, 1982 **Bibliography of the History of Medicine**, 1984 **A Companion to the Gilded Age and Progressive Era** Christopher McKnight Nichols, Nancy C. Unger, 2022-06-15 A Companion to the Gilded Age and Progressive Era presents a collection of new historiographic essays covering the years between 1877 and 1920 a period which saw the U S emerge from the ashes of Reconstruction to become a world power The single definitive resource for the latest state of knowledge relating to the history and historiography of the Gilded Age and Progressive Era Features contributions by leading scholars in a wide range of relevant specialties Coverage of the period includes geographic social cultural economic political diplomatic ethnic racial gendered religious global and ecological themes and approaches In today's era often referred to as a second Gilded Age this book offers relevant historical analysis of the factors that helped create contemporary society Fills an important chronological gap in period based American history collections **Animal Cities** Peter Atkins, 2016-04-15 Animal Cities builds upon a recent surge of interest about animals in the urban context Considering animals in urban settings is now a firmly established area of study and this book presents a number of valuable case studies that illustrate some of the

perspectives that may be adopted Having an urban history flavour the book follows a fourfold agenda First the opening chapters look at working and productive animals that lived and died in nineteenth century cities such as London Edinburgh and Paris The argument here is that their presence yields insights into evolving understandings of the category urban and what made a good city Second there is a consideration of nineteenth century animal spectacles which influenced contemporary interpretations of the urban experience Third the theme of contested animal spaces in the city is explored further with regard to backyard chickens in suburban Australia Finally there is discussion of the problem of the public companion animal and its role in changing attitudes to public space illustrated with a chapter on dog walking in Victorian and Edwardian London Animal Cities makes a significant contribution to animal studies and is of interest to historical geographers urban cultural social and economic historians and historians of policy and planning

Why Do We Recycle?

Frank Ackerman, 2013-04-15 The earnest warnings of an impending solid waste crisis that permeated the 1980s provided the impetus for the widespread adoption of municipal recycling programs Since that time America has witnessed a remarkable rise in public participation in recycling activities including curbside collection drop off centers and commercial and office programs Recently however a backlash against these programs has developed A vocal group of anti recyclers has appeared arguing that recycling is not an economically efficient strategy for addressing waste management problems In Why Do We Recycle Frank Ackerman examines the arguments for and against recycling focusing on the debate surrounding the use of economic mechanisms to determine the value of recycling Based on previously unpublished research conducted by the Tellus Institute a nonprofit environmental research group in Boston Massachusetts Ackerman presents an alternative view of the theory of market incentives challenging the notion that setting appropriate prices and allowing unfettered competition will result in the most efficient level of recycling Among the topics he considers are externality issues unit pricing for waste disposal effluent taxes virgin materials subsidies advance disposal fees the landfill crisis and disposal facility siting container deposit bottle bill legislation environmental issues that fall outside of market theory calculating costs and benefits of municipal recycling programs life cycle analysis and packaging policy Germany's Green Dot packaging system and producer responsibility the impacts of production in extractive and manufacturing industries composting and organic waste management economics of conservation and material use and long term sustainability Ackerman explains why purely economic approaches to recycling are incomplete and argues for a different kind of decisionmaking one that addresses social issues future as well as present resource needs and non economic values that cannot be translated into dollars and cents Backed by empirical data and replete with specific examples the book offers valuable guidance for municipal planners environmental managers and policymakers responsible for establishing and implementing recycling programs It is also an accessible introduction to the subject for faculty students and concerned citizens interested in the social economic and ethical underpinnings of recycling efforts

Car Country Christopher W. Wells, 2013-05-15 For most people in the United

States going almost anywhere begins with reaching for the car keys This is true Christopher Wells argues because the United States is Car Country a nation dominated by landscapes that are difficult inconvenient and often unsafe to navigate by those who are not sitting behind the wheel of a car The prevalence of car dependent landscapes seems perfectly natural to us today but it is in fact a relatively new historical development In Car Country Wells rejects the idea that the nation's automotive status quo can be explained as a simple byproduct of an ardent love affair with the automobile Instead he takes readers on a tour of the evolving American landscape charting the ways that transportation policies and land use practices have combined to reshape nearly every element of the built environment around the easy movement of automobiles Wells untangles the complicated relationships between automobiles and the environment allowing readers to see the everyday world in a completely new way The result is a history that is essential for understanding American transportation and land use issues today Watch the book trailer <http://www.youtube.com/watch?v=48LTKOxxrXQ>

Down to Earth Theodore Steinberg, 2019 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of the United States a history that places the environment at the very center of the narrative Now in a new edition *Down to Earth* reenvisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists' attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good he reminds readers that many critical episodes in U.S. history were in fact environmental events The text highlights the ways in which Americans have attempted to reshape and control nature from Thomas Jefferson's surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities

The City Natural Shen Hou, 2010-11-23 The weekly magazine *Garden and Forest* existed for only nine years 1888-1897 Yet in that brief span it brought to light many of the issues that would influence the future of American environmentalism In *The City Natural* Shen Hou presents the first biography of this important but largely overlooked vehicle for individuals with the common goal of preserving nature in American civilization As Hou's study reveals *Garden and Forest* was instrumental in redefining the fields of botany and horticulture while also helping to shape the fledgling professions of landscape architecture and forestry The publication actively called for reform in government policy urban design and future planning for the preservation and inclusion of nature in cities It also attempted to shape public opinion on these issues through a democratic ideal that every citizen had the right and need to access nature These notions would anticipate the conservation and city beautiful movements that followed in the early twentieth century Hou explains the social and environmental conditions that led to the rise of reform efforts organizations and publications such as *Garden and Forest* She reveals the intellectual core and vision of the magazine as a proponent of the city natural movement that sought to relate nature and

civilization through the arts and sciences Garden and Forest was a staunch advocate of urban living made better through careful planning and design As Hou shows the publication also promoted forest management and preservation not only as a natural resource but as an economic one She also profiles the editors and contributors who set the magazine s tone and follows their efforts to expand America s environmental expertise Through the pages of Garden and Forest the early period of environmentalism was especially fruitful and optimistic many individuals joined forces for the benefit of humankind and helped lay the foundation for a coherent national movement Shen Hou s study gives Garden and Forest its due and adds an important new chapter to the early history of American environmentalism Managing the Environment, Managing Ourselves Richard N. L. Andrews,2020-03-17 In the third edition of this definitive book Richard N L Andrews looks back at four centuries of American environmental policy showing how these policies affect contemporary environmental issues and public policy decisions and identifying key policy challenges for the future Andrews crafts a detailed and contextualized narrative of the historical development of American environmental policies and institutions This volume presents an extensively revised text with increased detail on the 50 year history of the modern environmental policy era and updated through the Obama and Trump administrations **American Literature in Transition, 1876-1910: Volume 4** Lindsay V. Reckson,2022-08-18 Addressing US literature from 1876 to 1910 this volume aims to account for the period s immense transformations while troubling the ideology of progress that underwrote much of its self understanding This volume queries the various forms and formations of post Reconstruction American literature It contends that the literature of this period most often referred to as turn of the century might be more productively oriented by the end of Reconstruction and the haunting aftermath of its emancipatory potential than by the logic of temporal and social advance that underwrote the end of the century and the beginning of the Progressive Era Acknowledging that nearly all US literature after 1876 might be described as post Reconstruction the volume invites readers to reframe this period by asking under what terms did post Reconstruction American literature challenge or re consolidate the nation as an affective political and discursive phenomenon And what kind of alternative pasts and futures did it write into existence **The Evolution of American Urban Society** Howard P. Chudacoff,Judith Smith,Peter Baldwin,2016-05-23 This interesting and informative book shows how different groups of urban residents with different social economic and political power cope with the urban environment struggle to make a living participate in communal institutions and influence the direction of cities and urban life An absorbing book The Evolution of American Urban Society surveys the dynamics of American urbanization from the sixteenth century to the present skillfully blending historical perspectives on society economics politics and policy and focusing on the ways in which diverse peoples have inhabited and interacted in cities Key topics Broad coverage includes the Colonial Age commercialization and urban expansion life in the walking city industrialization newcomers city politics the social and physical environment the 1920s and 1930s the growth of suburbanization and the future of modern cities Market An

interesting and necessary read for anyone involved in urban sociology including urban planners city managers and those in the urban political arena
