Confronting security challenges      **Ending War** Chiara De Franco, Anders Engberg-Pedersen, Martin Mennecke, 2021-11-29  
**Ending War** A Dialogue across Disciplines examines how wars end from a multidisciplinary perspective and includes enquiries into the politics of war the laws of war and the military and intellectual history of war In recent years the changes in the character of contemporary warfare have created uncertainties across different disciplines about how to identify and conceptualise the end of war A whole constellation of questions arises from such uncertainties How do philosophers define ethical responsibilities in bello and post bellum if the boundary between war and peace is ever so blurred How do strategists define their objectives if the teleology of action becomes uncertain How do historians bracket the known endings of war and delve into the arguments that preceded them Which answers can international law provide for the ending of wars and which challenges remain or have recently arisen This volume addresses these questions and enables both an understanding of how the end as a concept informs the understanding of war in international relations in international law and in history as well as a reconsideration of the nature of scientific method in the field of war studies as such The chapters in this book were originally published as a special issue of The Journal of Strategic Studies      **Edinburgh Companion to Twentieth-Century British and American War Literature** Adam Piette, 2012-03-07 The first reference book to deal so fully and incisively with the cultural representations of war in 20th century English and US literature and film The volume covers the two World Wars as well as specific conflicts that generated literary and imaginativ      **Emerging Technologies for Economic Development** Dirk Meissner, Leonid Gokhberg, Ozcan Saritas, 2019-03-28 This book provides an impressive overview of emerging technologies especially nanotechnologies and biotechnologies and their prospective applications It identifies and describes existing and potential markets for emerging technology based applications and projects scenarios for macroeconomic development based on these technologies Integrated roadmaps for the development of a nano and bioindustry are shown and policy measures and corporate strategies developed to advance these technologies These measures are illustrated using roadmaps and policy case studies The book combines a practical comprehensive overview of the technical side of emerging technologies and their applications in various fields with an analysis of market developments and characteristics      Terror and Consent Philip Bobbitt, 2009-05-05 Philip Bobbitt follows his magisterial Shield of Achilles with an equally provocative analysis of the West s struggle against terror Boldly stating that the primary driver of terrorism is not Islam but the emergence of market states like the U S and the E U Bobbitt warns of an era where weapons of mass destruction will be commodified and the wealthiest societies even more vulnerable to destabilizing demoralizing terror Unflinching in his analysis Bobbitt addresses the deepest themes of history law and strategy      Wired for War P. W. Singer, 2009-01-22 Singer s enthusiasm becomes infectious Wired for War is a book of its time this is strategy for the Facebook generation Foreign Affairs An engrossing picture of a new class of weapon that may revolutionize future wars Kirkus Reviews P W Singer explores the great est revolution in military affairs since the atom bomb the dawn of robotic

warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of I Robot and The Terminator Blending historical evidence with interviews of an amazing cast of characters Singer shows how technology is changing not just how wars are fought but also the politics economics laws and the ethics that surround war itself Travelling from the battlefields of Iraq and Afghanistan to modern day skunk works in the midst of suburbia Wired for War will tantalise a wide readership from military buffs to policy wonks to gearheads

*War as Business* Armin Krishnan, 2016-03-03 The privatization of defence assets and the outsourcing of military services from the armed forces to the private sector is an increasing trend This book approaches the issue of military privatization by linking it to the transformation of the defence industries since the early 1990s and shows the extent to which many military functions and activities ranging from military research to military consulting training to operational support services have already been outsourced in the US and in Europe This detailed study provides new and updated information on the ongoing privatization of the defence sector and offers an original theoretical explanation as to why the most modern armed forces throughout the world have come increasingly to rely on private companies for nearly everything they do Contributing to a better understanding of military privatization and its close connection to technological change the book explains the complexity of the whole phenomenon and discusses its implications for national and international security

*Military Thought of Asia* Kaushik Roy, 2020-11-04 Military Thought of Asia challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions The book considers the systematic and tight representation of ideas by famous figures including Kautsky and Sun Tzu At the same time it also highlights publications on military affairs by small men like mid ranking officers and scattered ideas regarding the

origin nature and societal impact of organised violence present in miscellaneous sources like coins inscriptions paintings and fictional literature In so doing the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age It is essential reading for those interested in the evolution of military thought throughout history particularly in Asia

*Network Centric Warfare and Coalition Operations* Paul T. Mitchell, 2009-02-05 This book argues that Network Centric Warfare NCW influences how developed militaries operate in the same fashion that an operating system influences the development of computer software It examines three inter related issues the overwhelming military power of the United States the growing influence of NCW on military thinking and the centrality of coalition operations in modern military endeavours Irrespective of terrorist threats and local insurgencies the present international structure is remarkably stable none of the major powers seeks to alter the system from its present liberal character as demonstrated by the lack of a military response to US military primacy This primacy privileges the American military doctrine and thus the importance of NCW which promises a future of rapid precise and highly efficient operations but also a future predicated on the digitization of the battle space Participation in future American led military endeavours will require coalition partners to be networked interoperability will therefore be a key consideration of a partner s strategic worth *Network Centric Warfare and Coalition Operations* will be of great interest to students of strategic studies international security US foreign policy and international relations in general

**War, Armed Force, and the People** Walter C. Opello Jr., 2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people

**US Taiwan Policy** Øystein Tunsjø, 2008-02-18 The relationship between the United States and China is one of the

most important issues in the twenty first century and is ultimately hostage to conditions across the Taiwan Strait This book is the first to attempt to trace the historical origin of what is known as the Taiwan issue in US China relations from a constructivist perspective based on detailed archival research The analysis used supplements the mainstream rationalist approach by developing a new theoretical perspective on US Taiwan policy that incorporates constructivism s emphasis on identity norms and discourse analysis Scholars have never previously developed or elaborated upon this approach to any significant extent The book re examines the protection of Taiwan by military means following the outbreak of the Korean War and the establishment of the one China policy in relation to the process of rapprochement during President Nixon s first term in office It also considers the contemporary challenges posed to the one China policy by the increased importance of promoting human rights and democracy in US foreign policy arguing that the current US China policy is guided by a new strategy based on engagement plus hedging
