## **Future Of War The Reenchantment Of War In The Twentyfirst Century:**

**The Future of War** Christopher Coker,2004      **Reimagining War in the 21st Century** Manabrata Guha,2010-09-13

This book interrogates the philosophical backdrop of Clausewitzian notions of war and asks whether modern network centric militaries can still be said to serve the political In light of the emerging theories and doctrines of Network Centric War NCW this book traces the philosophical backdrop against which the more common theorizations of war and its conduct take place Tracing the historical and philosophical roots of modern war from the 17th Century through to the present day this book reveals that far from paralyzing the project of re problematisating war the emergence of NCW affords us an opportunity to rethink war in new and philosophically challenging ways This book will be of much interest to students of critical security studies social theory war studies and political theory IR Manabrata Guha is Assistant Professor ISSSP at the National Institute of Advanced Studies Bangalore India      **The Future of War** Christopher Coker,2008-04-30 In this book Professor Christopher Coker presents an original and controversial thesis about the future of war Argues that the biotechnology revolution has given war a new lease of life Draws on thinkers from Hegel and Nietzsche to the postmodernists Refers to modern fiction and films Part of the prestigious Blackwell Manifestos series      [America's War against Global Jihad](#) William R. Nester,2018-03-06 A specter haunts America the specter of Global Jihad Islamic Holy War This specter was never more horrific than on September 11 2001 when nineteen fanatics hijacked four jetliners and used them as guided missiles to destroy the twin World Trade Towers damage the Pentagon murder nearly 3 000 people and cause as much as several hundred billion dollars worth of direct and indirect damage to New York City and the national economy But Jihadists have periodically attacked Americans ever since November 1979 when mobs shouting death to America overran the American embassy in Tehran and held 52 officials hostage for 444 days President George W Bush responded to the September 11 atrocities by declaring a global war on terror Now in its second decade that war has cost the United States thousands of lives and trillions of dollars Americans are haunted by horrific televised images from across a swath of the Muslim world of bomb blasted cities hundreds of slaughtered bodies thousands of refugees huddled in squalid camps and American journalists in orange jump suits kneeling in the desert before the black robed and masked men who will behead them Americans increasingly question whether the global war on terror has been worth those costs for their own nation and the lands where it is fought This book analyzes America s crusade against Jihadism The key related questions it addresses are these Looking back what were the successes and failures of Washington s counter Jihadist strategy before and after September 11 Looking ahead should Americans stay the course or cut their losses in Iraq Afghanistan and elsewhere Was the catastrophic September 11 attack a one time event or could its equivalent or worse in death and destruction happen again Renowned Harvard professor Samuel Huntington asserted that The underlying problem for the West is not Islamic fundamentalism it is Islam a different civilization whose people are convinced of the superiority of their culture and are obsessed with the

inferiority of their power Is that true Just what of Muhammad s words and deeds if any justifies the barbarism of al Qaeda Islamic State and other Jihadists Finally just how corporeal is that specter of global Jihad to the United States A startling surprise awaits the reader in the final chapter as acclaimed expert William Nester weighs the specter of global Jihad against an array of other national security threats

**War of Time** Jan Hanska,2020-07-08 This book examines the meaning and management of time as a facet of the art of war in general but especially operational art While force time place has for a long time been considered to be the essential trinity of warfare the aspect of time remains largely under researched Relying on classic texts on art of war the author engages with some of the top theorists and practitioners of art of war from the age of Sun Tzu to the network centric warfare about the role of time and its management in operational art Relying on Alvin Toffler s theory of the three waves the volume follows research into development of operational art through cycles from the agrarian age to the industrial age and into the information age

**Recent Themes in Military History** Donald A. Yerxa,2008 Described as the New York Review of Books for history Historically Speaking has emerged as one of the most distinctive historical publications in recent years actively seeking out contributions from a pantheon of leading voices in historical discourse from both inside and outside academia Recent Themes in Military History represents some of the best writing on military history to appear in the past five years This collection of forums interviews and individual essays drawn from Historically Speaking provides contrasting views on such topics in military history as the existence and function of military revolutions in the past and present the experience of soldiering and combat the particularly violent and gruesome nature of twentieth century warfare and projections of the nature of future wars The ebb and flow of discourse between contributors also illustrates how the study of history is an ongoing conversation wherein discovery and debate lead to deeper understanding and development of fresh opportunities for further inquiry

**Ending War** Chiara De Franco,Anders Engberg-Pedersen,Martin Mennecke,2021-11-29 Ending War A Dialogue across Disciplines examines how wars end from a multidisciplinary perspective and includes enquiries into the politics of war the laws of war and the military and intellectual history of war In recent years the changes in the character of contemporary warfare have created uncertainties across different disciplines about how to identify and conceptualise the end of war A whole constellation of questions arises from such uncertainties How do philosophers define ethical responsibilities in bello and post bellum if the boundary between war and peace is ever so blurred How do strategists define their objectives if the teleology of action becomes uncertain How do historians bracket the known endings of war and delve into the arguments that preceded them Which answers can international law provide for the ending of wars and which challenges remain or have recently arisen This volume addresses these questions and enables both an understanding of how the end as a concept

informs the understanding of war in international relations in international law and in history as well as a reconsideration of the nature of scientific method in the field of war studies as such The chapters in this book were originally published as a special issue of The Journal of Strategic Studies      **Edinburgh Companion to Twentieth-Century British and American War Literature** Adam Piette, 2012-03-07 The first reference book to deal so fully and incisively with the cultural representations of war in 20th century English and US literature and film The volume covers the two World Wars as well as specific conflicts that generated literary and imaginativ      **Emerging Technologies for Economic Development** Dirk Meissner, Leonid Gokhberg, Ozcan Saritas, 2019-03-28 This book provides an impressive overview of emerging technologies especially nanotechnologies and biotechnologies and their prospective applications It identifies and describes existing and potential markets for emerging technology based applications and projects scenarios for macroeconomic development based on these technologies Integrated roadmaps for the development of a nano and bioindustry are shown and policy measures and corporate strategies developed to advance these technologies These measures are illustrated using roadmaps and policy case studies The book combines a practical comprehensive overview of the technical side of emerging technologies and their applications in various fields with an analysis of market developments and characteristics      *Terror and Consent* Philip Bobbitt, 2009-05-05 Philip Bobbitt follows his magisterial *Shield of Achilles* with an equally provocative analysis of the West's struggle against terror Boldly stating that the primary driver of terrorism is not Islam but the emergence of market states like the U S and the E U Bobbitt warns of an era where weapons of mass destruction will be commodified and the wealthiest societies even more vulnerable to destabilizing demoralizing terror Unflinching in his analysis Bobbitt addresses the deepest themes of history law and strategy      *Wired for War* P. W. Singer, 2009-01-22 Singer's enthusiasm becomes infectious *Wired for War* is a book of its time this is strategy for the Facebook generation Foreign Affairs An engrossing picture of a new class of weapon that may revolutionize future wars Kirkus Reviews P W Singer explores the great est revolution in military affairs since the atom bomb the dawn of robotic warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of *I Robot* and *The Terminator* Blending historical evidence with interviews of an amaz ing cast of characters Singer shows how technology is changing not just how wars are fought but also the politics economics laws and the ethics that surround war itself Travelling from the battlefields of Iraq and Afghanistan to modern day skunk works in the midst of suburbia *Wired for War* will tantalise a wide readership from military buffs to policy wonks to gearheads      *War and the Body* Kevin McSorley, 2013-01-25 This edited volume places the body at the centre of critical thinking about war and its consequences War is fundamentally embodied The reality of war is not just politics by any other means but politics incarnate politics written on and experienced through the thinking feeling bodies of men and women From steeled combatants to abject victims war occupies innumerable bodies in a multitude of ways profoundly shaping lives and ways of being human Giving the body an analytic recognition that it warrants and has often been denied in conventional war studies

this book brings together new interdisciplinary scholarship that explores the numerous affective sensory and embodied practices through which war lives and breeds. It focuses on how war is prepared, enacted and reproduced through embodied action, suffering and memory. As such, the book promotes new directions in theorising war and transformations in warfare via an explicit focus on the body. This book will be of much interest to students and scholars of war studies, security studies, sociology, anthropology, military studies, politics and IR in general.

**War as Business** Armin Krishnan, 2016-03-03  
 The privatization of defence assets and the outsourcing of military services from the armed forces to the private sector is an increasing trend. This book approaches the issue of military privatization by linking it to the transformation of the defence industries since the early 1990s and shows the extent to which many military functions and activities ranging from military research to military consulting, training to operational support services have already been outsourced in the US and in Europe. This detailed study provides new and updated information on the ongoing privatization of the defence sector and offers an original theoretical explanation as to why the most modern armed forces throughout the world have come increasingly to rely on private companies for nearly everything they do. Contributing to a better understanding of military privatization and its close connection to technological change, the book explains the complexity of the whole phenomenon and discusses its implications for national and international security.

Military Thought of Asia Kaushik Roy, 2020-11-04  
 Military Thought of Asia challenges the assertion that the generation of rational, secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present. The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia. The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions. The book considers the systematic and tight representation of ideas by famous figures including Kautilya and Sun Tzu. At the same time, it also highlights publications on military affairs by small men like mid-ranking officers and scattered ideas regarding the origin, nature and societal impact of organised violence present in miscellaneous sources like coins, inscriptions, paintings and fictional literature. In so doing, the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of a cameo and historicises the evolution of theory and the praxis of warfare. The volume shows that the East has a long, unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age. It is essential reading for those interested in the evolution of military thought throughout history, particularly in Asia.

*Encyclopedia of Conflicts Since World War II* James Ciment, 2015-03-27  
 Thoroughly revised to include 25 conflicts not covered in the previous edition, as well as expanded and updated information on previous coverage, this illustrated reference presents descriptions and analyses of more than 170 significant post-World War II conflicts around the globe. Organized by region for ease of access, *Encyclopedia of Conflicts Since World War II*, Second Edition, provides clear, in-depth explanations of events not covered in such detail in any other reference source. Including

more than 180 detailed maps and 150 photos the set highlights the conflicts that dominate today's headlines and the events that changed the course of late twentieth century history      *War, Armed Force, and the People* Walter C. Opello

Jr.,2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people      **Network Centric Warfare and Coalition Operations** Paul T. Mitchell,2009-02-05

This book argues that Network Centric Warfare NCW influences how developed militaries operate in the same fashion that an operating system influences the development of computer software It examines three inter related issues the overwhelming military power of the United States the growing influence of NCW on military thinking and the centrality of coalition operations in modern military endeavours Irrespective of terrorist threats and local insurgencies the present international structure is remarkably stable none of the major powers seeks to alter the system from its present liberal character as demonstrated by the lack of a military response to US military primacy This primacy privileges the American military doctrine and thus the importance of NCW which promises a future of rapid precise and highly efficient operations but also a future predicated on the digitization of the battle space Participation in future American led military endeavours will require coalition partners to be networked interoperability will therefore be a key consideration of a partner's strategic worth Network Centric Warfare and Coalition Operations will be of great interest to students of strategic studies international security US foreign policy and international relations in general      US Taiwan Policy Øystein

Tunsjø,2008-02-18 The relationship between the United States and China is one of the most important issues in the twenty first century and is ultimately hostage to conditions across the Taiwan Strait This book is the first to attempt to trace the historical origin of what is known as the Taiwan issue in US China relations from a constructivist perspective based on detailed archival research The analysis used supplements the mainstream rationalist approach by developing a new theoretical perspective on US Taiwan policy that incorporates constructivism's emphasis on identity norms and discourse analysis Scholars have never previously developed or elaborated upon this approach to any significant extent The book re examines the protection of Taiwan by military means following the outbreak of the Korean War and the establishment of the one China policy in relation to the process of rapprochement during President Nixon's first term in office It also considers the contemporary challenges posed to the one China policy by the increased importance of promoting human rights and democracy in US foreign policy arguing that the current US China policy is guided by a new strategy based on engagement
