**Challenging Time in DOPMA** Peter Schirmer, 2006 Many of the laws and policies that govern officer career management often collectively referred to as DOPMA after the Defense Officer Personnel Management Act of 1980 have been in place for decades DOPMA has served the needs of the services reasonably well but the current system may not meet the requirements of the future operating environment One criticism of DOPMA is that it does not allow for much variety in officers career paths because it is time driven Alternatively officers competencies are now emerging as the basis for career management In this monograph the authors demonstrate how a competency based officer personnel management system could provide more flexibility in preparing military officers for the wide range of roles and missions of the U S military in the 21st century This analysis focuses on practices governing promotions for military officers and closely related assignment and retirement policies Rand web site *OPNAV N14 Quick Reference* Roland J. Congress. Senate. Committee on Armed Services,2015      General and Flag Officer Careers Harry Thie,2001 Congress has recently expressed concern that the current tenure system for developing general and flag officers does not effectively prepare them for handling increasing levels of responsibility and for performing with maximum efficiency at each level of assignment This report assesses the continued appropriateness of mandatory retirement of general and flag officers after 35 years It focuses on the value of extending tenure specifically examining promotions number of assignment and career length The study discusses two types of consequences resulting from such an extension Systemic results of longer service lead to fewer promotions and fewer rising to the highest grades but increased stability and experience Career path consequences indicate more depth or breadth of experience could result for officers The appropriateness of continued mandatory retirement after 35 years depends finally on objectives If the objective is rapid career path movement to positions of responsibility the 35 year limit accomplishes this If the goal is more experienced officers and greater stability removing the limit seems best Decision makers will need to decide which objective is most important      **Navy Management Review**

Italy's All-volunteer Army Michele Zanini,2002 This dissertation builds an analytical framework for understanding the key policy issues and tradeoffs for the Italian Army during its transition toward an All Volunteer Force The analysis specifically focuses on the management of the enlisted and noncommissioned officer force in order to 1 assist the army in identifying transition paths most likely to lead to a balanced force taking costs into account where the balanced force objective is related to how personnel are distributed by grade and years of service YOS and 2 provide guidance on force management processes such as recruitment and identify areas for improvement The author uses a simulation model of army personnel dynamics to identify alternative strategies designed to improve outcomes Performance is tracked for multiple measures of effectiveness and costs strategies were then ranked on the basis of their aggregate cost and effectiveness The performance of a given alternative is ultimately judged on its robustness across a different set of assumptions of how much policymakers would value an outcome measure or set of measures over the rest      **The Air Force Comptroller** ,1967      **Newsletter** ,1970
