Politics In An Age Of Economic Limits* Bruce Shefrin,2019-07-18 This study of the future of U S politics begins with an in depth examination of the political social and economic dynamics of the present Dr Shefrin demonstrates that economic growth has been a key element in maintaining political stability by diverting the attention of materially deprived groups away from disruptive political activity Examining the interaction of technological and political forces in the physical and social environment he argues that an expectation of economic limits is reasonable and perhaps undeniable and focuses on the changes in the political system that can be anticipated in a no growth or slow growth society Dr Shefrin employs a nondeterministic social choice approach to reach the conclusion that because the shape of the future is of major political significance it will be the focus of intense political conflict The four scenarios he presents reflect the major alternative directions possible for U S society according to current social theory Dr Shefrin feels that the conflict among supporters of these alternatives will constitute the politics of the future      **Women in midlife, security and fulfillment** ,1978 This compendium presents the findings of 29 scholars on public policy issues affecting midlife women
