Future Of Us Japan Relations A Conference Report:

The Future of U.S.-Japan Relations Francis McNeil, Seizaburō Satō, 1989 **The JET Program and the US-Japan Relationship** Emily T. Metzgar, 2017-07-14 Since 1987 the Japan Exchange and Teaching JET Program has recruited thousands of young college graduates from more than sixty countries including the United States to work in Japan for up to five years Now thirty years after the program's founding there are more than 60 000 JET Program alumni worldwide more than half of them hailing from the United States The JET Program and the US Japan Relationship Goodwill Goldmine argues that JET functions as much more than an opportunity for young people to spend a year or more teaching in Japanese schools or working in municipal offices across the Japanese archipelago This study examines the JET program as a form of public diplomacy and soft power Through original survey data and extensive interviews with alumni the author provides a quantitative analysis of the program's effects and argues that it has been highly useful in shaping interactions between Japan and the United States Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1985 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index *U.S.-Japan Relations in a Changing World* Steven Vogel, 2004-05-13 September 2001 marked the fiftieth anniversary of the signing of the San Francisco Treaty formally ending the Second World War In signing this treaty Japan fundamentally transformed its position on the world stage It established itself in the vanguard of the burgeoning cold war bulwark against the Soviet Union and its communist satellites and wed itself to the United States through economic political and security ties that persist today The half century since the establishment of the San Francisco system has seen highs and lows in the relations between the two countries continuing even into the current war on terrorism This new book evaluates the changing relationship between the two great powers providing in depth analysis on a variety of topics It scrutinizes the historical context providing the reader with predictive tools for understanding events as they unfold Instead of looking at the U S Japan relationship one issue at a time this book examines specific trends and then analyzes how these trends affect the relationship as a whole This innovative approach allows the reader to view several perspectives simultaneously and it compels the contributors to assemble clear causal arguments that detail what each factor can and cannot explain The result is a cogent and convincing appraisal of the status and future of U S Japan relations after fifty years of peaceful coexistence

Congressional Record United States. Congress, 2005 *Scientific and Technical Aerospace Reports* , 1992 **Monthly Catalogue, United States Public Documents** , 1981 The EU-Japan Partnership in the Shadow of China Axel Berkofsky, Christopher W. Hughes, Paul Midford, Marie Söderberg, 2018-06-27 Both the European Union and Japan have been

major beneficiaries and supporters of the liberal international order first led by the United States since the end of World War II. During this period they have emerged as global powers; however, the very order that nurtured their rise is now facing twin threats: first through authoritarian China's promotion of alternative models of global governance and second from a crisis of liberalism manifested in the policies of President Donald Trump and Brexit. This book explores these challenges faced by both the EU and Japan, providing a multidisciplinary approach to studying the relationship between the two. It analyses their cooperation in terms of security, defence and trade and examines how their shared normative values are ultimately implemented. Having recently concluded an Economic Partnership Agreement and with a Strategic Partnership Agreement in the pipeline, this book asks whether they can convert their latent and modest cooperation into an alternative form of leadership and an antidote to the illiberal tide sweeping the developed world. As the first book to shed light on the new Economic Partnership Agreement between the EU and Japan, this book will be useful to students and scholars of Japanese Studies as well as European Union politics and international political economy more generally.

Survey of Activities, 94th Congress United States. Congress. House. Committee on International Relations, 1976 **Survey of Activities** United States. Congress. House. Committee on Foreign Affairs, 1976 *Chinese Foreign Relations* Robert G. Sutter, 2008

This comprehensive introduction to Chinese foreign relations explores the opportunities and limits China faces as it seeks growing international influence. Tracing the record of twists and turns in Chinese foreign relations since the end of the Cold War, Robert G. Sutter provides a nuanced analysis that shows that despite popular perceptions of its growing power, Beijing is hampered by both domestic and international constraints. This text's balanced and thorough assessment shows China's leaders exerting more influence in world affairs but remaining far from dominant. Facing numerous contradictions and tradeoffs, they move cautiously as they deal with a complex global environment.

The Future of Korea-Japan Relations Robert Dujarric, 2001

On December 5, 1997, Hudson Institute and the East Asian Security Study Group held a conference on Japan and Korea's future. The focus of the conference was to survey the state of Japanese-Korean relations and analyze how they would evolve in the future. In the two and a half years since the symposium took place, the pace of the improvement of Korean-Japanese relations has been dramatic. Very few observers in late 1997, even the most optimistic ones, would have predicted that relations between the two nations would improve as rapidly as they did. Though much remains to be done, the trend line has been very impressive. Funded by the Center for Global Partnership of the Japan Foundation, these essays will help scholars and policy makers gain a better understanding of the issues surrounding ties between Japan and Korea.
