m **The Future of Psychoanalysis** Richard D. Chessick, 2012-02-01 The Future of Psychoanalysis explores the contemporary problem of multiple theories of psychoanalysis and argues for a return to a more classical position based on Freud's work. Using his training in psychiatry, psychoanalysis, and philosophy, Richard D. Chessick examines the special combination of hermeneutics and natural science that characterizes Freud's psychoanalysis and investigates what goes on in the mind of the psychoanalyst during the psychoanalytic process. He maintains that while relativistic and intersubjective theories of psychoanalysis have value, they have gone too far and generated a plurality of theories removed from Freud, which has led to chaos in the field. The Future of Psychoanalysis challenges these trends and places this debate in the context of current mind-brain controversies and unresolved questions about human nature. **Books-in-Brief: The Postnormal Times Reader** Ziauddin Sardar, 2020-01-01 IIIT Books In Brief Series is a valuable collection of the Institute's key publications written in condensed form to give readers a core understanding of the main contents of the original. Postnormal times are best defined as an in-between period where old orthodoxies are dying, new ones have yet to be born, and very few things seem to make sense, or as Ezio Mauro puts it, we are hanging between the no longer and the not yet, and thus we are necessarily unstable. Nothing around us is fixed, not even our direction of travel. The postnormal times theory attempts to make sense of a rapidly changing world where uncertainty is the dominant theme, and ignorance has become a valuable community. The Postnormal Times Reader is a pioneering anthology of writings on the contradictory, complex, and chaotic nature of our era. It covers the origins, theory, and methods of postnormal times and examines a host of issues ranging from climate change, governance, Middle East, to religion and science from the perspective of postnormal times. By mapping some of the key local and global issues of our transitional age, the Reader suggests a way of navigating our turbulent futures. **Books-in-Brief: Teaching Children** Ann El-Moslimany, 2020-01-01 IIIT Books In Brief Series is a valuable collection of the Institute's key publications written in condensed form to give readers a core understanding of the main contents of the original. The author explores education from the essential principles of Tawhid (Oneness of God), humanity, knowledge, fitrah, concept of human nature, and the role of humans as vicegerents of God on earth, responsibility, and stewardship. The current education system dates back a hundred years or more and is in desperate need of a reboot. In developing the industrialized society, the education system itself became like a factory, the end product being pupils who merely regurgitate facts and themselves end up as cogs in the machine that is the wider industrial complex. The legacy of this is a soulless, functional educational system that fails to develop pupils to meet the present and future needs of individuals and their expectations. This failure inevitably impacts on society and humanity at large. Society has long since moved beyond the industrial revolution and into an age of global connectedness where the sum of human knowledge is freely available via the internet. It is an age where people are generally more well-informed and on a variety of issues. An effective holistic educational philosophy is required, one that gives full spiritual meaning to all that a child learns. It should equip children with spiritual awareness, morals, and values, social
