Futuristic Notes:

Notes on the Parables according to literal and futurist principles of interpretation Helen Maclachlan, 1873 **Futurist Conditions** David Mather, 2020-10-29 Italian futurism visualized diverse types of motion which had been rooted in pervasive kinetic and vehicular forces generated during a period of dramatic modernization in the early 20th century Yet as David Mather's sweeping intellectual and art historical scholarship demonstrates it was the camera not the engine that proved to be the primary invention against which many futurist ideas and practices were measured Overturning several misconceptions about Italian futurism's interest in the disruptive and destructive effects of technology Futurist Conditions provides a refreshing update to the historical narrative by arguing that the formal and conceptual approaches by futurist visual artists reoriented the possibly dehumanizing effects of mechanized imagery toward more humanizing spiritual aims Through its sustained analysis of the artworks and writings of Umberto Boccioni Giacomo Balla and the Bragaglia brothers dating to the first decade after the movement's founding in 1909 Mather's account of their obsession with kinetic motion pivots around a 1913 debate on the place and relative import of photography among traditional artistic mediums a debate culminating in the expulsion of the Bragaglias but one that also prompted a range of productive responses by other futurist artists to world changing social political and economic conditions *Ethical Futures and Global Science Fiction* Zachary Kendal, Aisling Smith, Giulia Champion, Andrew Milner, 2020-01-27 Ethical Futures and Global Science Fiction explores the ethical concerns and dimensions of representations of the future of global science fiction focusing on the issues that dominate utopian dystopian and science fiction literature The essays examine recent visions of the future in science fiction and re-examine earlier texts through contemporary lenses Across fourteen chapters the collection considers authors from Algeria Australia Canada China Egypt France Germany Haiti India Jamaica Macedonia Mexico Russia South Africa the UK and USA The volume delves into a range of ethical questions of immediate contemporary relevance including environmental ethics postcolonial ethics social justice animal ethics and the ethics of alterity *Food in the USA* Carole Counihan, 2013-10-18 From Thanksgiving to fast food to the Passover seder Food in the USA brings together the essential readings on these topics and is the only substantial collection of essays on food and culture in the United States Essay topics include the globalization of U.S. food the dangers of the meatpacking industry the rise of Italian American food the meaning of Soul food the anorexia epidemic the omnipotence of Coca Cola and the invention of Thanksgiving Together the collection provides a fascinating look at how and why we Americans are what we eat *Wired for Thought* Jeffrey M. Stibel, 2009-09-16 In this age of hypercompetition the Internet constitutes a powerful tool for inventing radical new business models that will leave your rivals scrambling But as brain scientist and entrepreneur Jeffrey Stibel explains in Wired for Thought you have to understand its true nature The Internet is more than just a series of interconnected computer networks it's the first real replication of the human brain outside the human body To leverage its power you first need to understand how the Internet has evolved to

take on similarities to the brain This engaging and provocative book provides the answer Stibel lays out How networks have changed and what that implies for how people connect and form communities What the Internet and online business opportunities will look like in the future What the next stage of artificial intelligence will be and what opportunities it will present for businesses Stibel shows how exceptional companies are using their understanding of the Internet's brainlike powers to create competitive advantage such as building more effective Web sites predicting consumer behavior leveraging social media and creating a collective consciousness

Foresight in Action Marjolein van Asselt, Susan van 't Klooster, Philip van Notten, Livia A. Smits, 2012-06-25 Assessing the future is vital in informing public policy decisions One of the most widespread approaches is the development of scenarios which are alternative hypothetical futures Research has indicated however that the reality of how professionals go about employing scenarios is often starkly at odds with the theory a finding that has important ramifications for how the resulting images of the future should be interpreted It also shows the need for rewriting and updating theory This book based on an intensive five year study of how experts actually go about assessing the future provides a groundbreaking examination of foresighting in action Obtained via ethnographic techniques the results lay bare for the first time the real processes by which scenarios are made It is also the first book to examine foresighting for public policy which is so often overlooked in favour of business practice From handling of discontinuity to historical determinism the analysis reveals and explains why foresight is difficult and what the major pitfalls are Each chapter ends with a toolkit of recommendations for practice The book aims to help readers to reflect on their own practices of public oriented foresight and thus to foster a deeper understanding of the key principles and challenges Ultimately this will lead to better informed decision making

Style and the Future of Composition Studies Paul Butler, Brian Ray, Star Medzerian Vanguri, 2020-11-02 Style and the Future of Composition Studies explores style's potential for informing how students are taught to write well and its power as a tool for analyzing the language and discourse practices of writers and speakers in a range of contexts Many college writing teachers operate under the belief that style still refers primarily to the kinds of issues discussed in Strunk and White's popular but outdated book The Elements of Style This work not only challenges this view but also offers theories and pedagogies from diverse perspectives that help teachers and students develop strategic habits and mindsets to negotiate languages genres and discourse conventions The chapters explore the ways in which style directly affects and is affected by multiple sources of shifting disciplinary inquiry contributing new insights by drawing on research in cultural studies sociolinguistics discourse studies translanguaging and writing across the curriculum as well as new approaches to classical rhetorical theory The reemergence of stylistic inquiry can be used dynamically to produce new insights not only about emerging disciplinary interests but also about the study of style as a kind of language in and of itself Style and the Future of Composition Studies demonstrates that style deserves to be a central focus of writing teaching More than just the next style collection the book advocates for style's larger prominence in

composition discussions generally It will be of interest to a broad range of students and scholars of writing studies as well as a wider set of readers in academe Contributors Cydney Alexis Laura Aull Anthony Box Jimmy Butts Mike Duncan William FitzGerald Melissa Goldthwaite Eric House TR Johnson Almas Khan Zak Lancaster Eric Leake Andrea Olinger Thomas Pace Jarron Slater Jonathan Udelson

Contemporary Futurist Thought

Thomas Lombardo, 2006-06-23 Contemporary Futurist Thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead There are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity Psychologist and futurist Tom Lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future The book begins with an in depth examination of the highly influential literary genre of science fiction which Dr Lombardo identifies as the mythology of the future He next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future Social and technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world Given the powerful and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise Where are we potentially heading and perhaps more importantly where should we be heading The final chapter provides an extensive review of different answers to these questions Describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future In the conclusion Dr Lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future This book completes the study of future consciousness begun in its companion volume *The Evolution of Future Consciousness* These two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future

Lessons for the Future Dr David Hicks, David Hicks, 2003-08-27 Drawing on the latest research in futures studies this book provides new insights into ways of helping both students and teachers think more critically and creatively about their own future and that of wider society It acknowledges the crucial role of education in helping young people understand the nature of local and global change and the social and environmental impacts such change will have on their future Setting out a clear educational rationale for promoting global and futures perspective in

education it provides helpful and stimulating examples of futures orientated classroom activities It also includes fascinating research into children s views of the future *Back to the Postindustrial Future* Felix Ringel,2018-03-26 How does an urban community come to terms with the loss of its future The former socialist model city of Hoyerswerda is an extreme case of a declining postindustrial city Built to serve the GDR coal industry it lost over half its population to outmigration after German reunification and the coal industry crisis leading to the large scale deconstruction of its cityscape This book tells the story of its inhabitants now forced to reconsider their futures Building on recent theoretical work it advances a new anthropological approach to time allowing us to investigate the postindustrial era and the futures it has supposedly lost *Ethics and Future Generations* Rahul Kumar,2018-10-18 Existing human beings stand in a unique relationship of asymmetrical influence over future generations Our choices now can settle whether there are any human beings in the further future how many will exist what capacities and abilities they might have and what the character of the natural world they inhabit is like This volume with contributions from both new voices and prominent established figures in moral and political philosophy examines three generally underexplored themes concerning morality and our relationship to future generations First would it be morally wrong to allow humanity to go extinct Or do we have moral reasons to try and ensure that humanity continues into the indefinite future Second if humanity is to continue into the future how many people should there be And is it morally important whether they have lives that are of high quality or are just barely worth living And third how can we best make sense of the intuitive idea that by not taking action on climate change and preserving natural resources we are in some way wronging future generations This book was originally published as a special issue of the Canadian Journal of Philosophy

Rogers,Benjamin Eldon Stevens,2018-12-27 In 15 all new essays this volume explores how science fiction and fantasy draw on materials from ancient Greece and Rome displacing them from their original settings in time and space in points of origins and genre and encouraging readers to consider similar displacements in the modern world Modern examples from a wide range of media and genres including Philip Pullman s His Dark Materials and the novels of Helen Oyeyemi the Rocky Horror Picture Show and Hayao Miyazaki s Spirited Away and the role playing games Dungeons and Dragons and Warhammer 40K are brought alongside episodes from ancient myth important moments from history and more All together these multifaceted studies add to our understanding of how science fiction and fantasy form important areas of classical reception not only transmitting but also transmuting images of antiquity The volume concludes with an inspiring personal reflection from the New York Times bestselling author of speculative fiction Catherynne M Valente offering her perspective on the limitless

potential of the classical world to resonate with experience today Predicting the Future in Science, Economics, and Politics Frank Whelon Wayman, The Late Paul R. Williamson, Solomon Polachek, Bruce Bueno de Mesquita, 2014-08-29 It is a puzzle that while academic research has increased in specialization the important and complex problems facing humans urgently require a synthesis of understanding This unique collaboration attempts to address such a problem by bringing together *Forecasting China's Future* Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction this book will be of particular interest to students and scholars of political economic environmental and international relations issues in China and Asia as well as to readers in business and government **Our Hopes, Our Future** Andreas M. Krafft, 2023-01-31 How can we overcome crises and shape our common future Since the beginning of the Corona pandemic we have all been put to an immense test This shows how humanity can successfully and constructively deal with such situations and make the best of them And we learn that the future is not something that happens to us but that we can actively and constructively shape it The basic prerequisite for this is an attitude of openness mutual helpfulness and hope This non fiction book vividly reports on the currently prevailing images of the future and the common longings as well as on people's capacity for hope and action It reveals the power of desirable images of the future and of a collective hope as the opposite of general helplessness or of blind and naive optimism The central statements of this book are based on the experiences of thousands of people in more than ten countries who participated in the scientific study of the Hope Barometer in 2019 and 2020 In a unique way this combines lived practice with the latest findings of social science futurology positive psychology and pragmatic philosophy Target groups This book is for anyone who wants to look to the future with hope It offers concrete answers to key questions and shows how crises can be overcome while shaping a better future for individuals and society as a whole About the author Dr Andreas M Krafft teaches at the University of St Gallen and at the Free University of Berlin As co president of swissfuture the

Swiss Association for Futures Research and as a board member of the Swiss Society for Positive Psychology he leads the international research network of the Hope Barometer
