the term to stand in most recently as a synonym for untruth and brazen manipulation Propaganda analysis of the 1950s to 1989 too often took the form of empirical studies about the efficacy of specific methods with larger questions about the purposes and patterns of mass persuasion remaining unanswered In the present moment where globalization and transnationality are arguably as important as older nation forms when media enjoy near ubiquity throughout the globe when various fundamentalisms are ascendant and when debates rage about neoliberalism it is urgent that we have an up to date resource that considers propaganda as a force of culture writ large The handbook will include twenty two essays by leading scholars from a variety of disciplines divided into three sections In addition to dealing with the thorny question of definition the handbook will take up an expansive set of assumptions and a full range of approaches that move propaganda beyond political campaigns and warfare to examine a wide array of cultural contexts and practices
