Priller,2013-12-20 Few developments in the recent history of Central Europe have been more momentous than the
emergence or more precisely the re emergence of civil society of organized citizen activity outside the boundaries of the state
and the market Indeed the re emergence of civil society was the key to all the other momentous developments that have
characterized the extraordinary past two decades of Central European history the fall of the Berlin Wall the disintegration of
the Soviet empire the re emergence of the market the appearance of democratic government and now the re integration of
Europe More than that the re emergence of civil society in Central Europe has revolutionized the position of civil society on
the world stage more generally boosting its visibility enhancing its credibility and transforming its repu tation from that of
ineffectual supplicant to powerful instrument of social economic and political change Despite its achievements however the
Central European civil society sector remains at least in its Visegrad segments a fragile organism under capitalized under
staffed and still not fully integrated into the prevailing political and economic order It is as if these countries have not yet
decided how to reconcile their new civil society institutions with their recent history of extensive state provision of social

welfare services not to mention their earlier rich histories of civil society organization and voluntary action Indeed this earlier history has been largely lost from view Wiley CPA Exam Review 2009 O.
