Russia's Contribution to China's Surface Warfare Capabilities Paul Schwartz, 2015-08-25 The provision of advanced Russian military technology has been critical for the development of China's anti access area denial A2AD capability This study focuses on one aspect of the relationship namely Russia's contribution to the PLA Navy's surface and anti surface warfare capabilities Following a discussion of the role of the fleet in China's A2AD strategy the author examines in depth the specific warships anti ship missile systems and air defense systems that Russia has been providing Next he considers specifically how Russian technology has translated into new military capability for China's maritime forces Finally he offers a projection of the likely future direction of Russian assistance in this area While China has made enormous progress in developing its indigenous defense production capability this report makes the case that Russian defense assistance has been is and will likely continue to be important for the development of China's surface warfare capabilities and its A2AD project more broadly **The Lion and the Gadfly** Paul van der Veur, 2021-12-28 This political biography reveals the turbulent life

of Ernest François Eugène Douwes Dekker son of a Dutch father and a German Javanese mother born on Java in 1879 Vignettes flow in novel like fashion from the battle fields of South Africa and internment camp in Sri Lanka to a career in journalism in Java Radical thoughts then enter Douwes Dekker's mind such as demands for racial equality and national independence These made him write presciently that this road might take him to the executioner's hand or to the victory of revolution In exile from 1913 on his bravado allowed him to enter a doctoral program at the University of Zurich but also to entanglement with Indian revolutionaries operating from Berlin Returning to Java at the end of World War I he once again propagated the virtues of nationalism but soon was forced to relinquish his efforts and start a teaching career Even here constant surveillance and eventual internment in Surinam were his lot Within a decade the Republic of Indonesia had been proclaimed and Douwes Dekker emerged to acclaim as a close friend and political adviser to President Soekarno China's Soviet Dream Yan Li, 2017-09-05 This book examines the introduction of Soviet socialist culture in the People's Republic of China with a focus on the period of Sino Soviet friendship in the 1950s The vast state initiative to transplant Soviet culture into Chinese soil has conventionally been dismissed as a tool of propaganda and political indoctrination However this book

demonstrates that this transnational engagement not only facilitated China's broader transition to socialist modernity but also generated unintended consequences that outlasted the propaganda. Drawing on archival findings, newspapers, magazines, media productions, and oral interview, the book delves into changes in Chinese popular imagination and everyday aesthetics contingent upon Soviet influence. It proposes a revisionist view of the Soviet impact on China, revealing that Soviet culture offered Chinese people the language and imagery to conceive of their future as a dream about material abundance, self-determination, and the pleasures of leisure and cultural enrichment. Written with a transnational interdisciplinary and thematic approach, this book is aimed at scholars and students in the fields of Sino-Soviet relations, international socialism, modern Chinese history, cultural studies, and mass communication. It will also be of interest to researchers seeking to understand the nature, significance, and repercussions of Sino-Soviet cultural engagement.

Introduction to Medio-Translatology Xie Tianzhen, 2023-07-20 This book offers a comprehensive introduction to medio translatology, including its historical and literary setting, its core concept, and its practice and theory. Medio translatology, inspired by scholarship in comparative literature and the cultural turn in Western translation studies, has tackled many issues which previously went unnoticed or were ignored in traditional translation studies in China. It falls within the scope of literary studies and cultural studies, extending beyond the confines of language and treating literary translations and translating as historical facts. Emerging from comparative literature, medio translatology looks at literary translation from a new and broader perspective and explains, with illustrative and compelling examples, that literary translation is an act of creative treason. The originality of this approach is also evident in its distinguishing between the history of translated literature and the history of literary translation, as well as in its addressing the nature and status of translated literature. The Chinese edition of this book, being the first of its kind and well received in China, has been hailed as a milestone in exploring translation studies in the context of comparative literature in Chinese academia, and it introduces to students and researchers alike a wide range of new thoughts and ideas.

The Gadfly E. L. Voynich, 2019-11-20 In E. L. Voynich's novel *The Gadfly*, the narrative unfolds against the backdrop of 19th-century Italy, intertwining themes of revolution, faith, and personal identity. The story centers on a charismatic young man named Arthur Burton, whose path transforms from an idealistic Catholic to a figure of dissent against the oppressive structures of society. Voynich employs a rich lyrical style interspersed with philosophical discourse, echoing the Romantic literary movement as well as the tension of historical turmoil that defined Italy in this era. The novel's exploration of political and existential struggles provides an engaging platform for readers interested in both historical fiction and profound ideological debates. E. L. Voynich, born in the Russian Empire and later residing in England, was a fervent advocate for social justice and permeated her writing with her own experiences of idealism and disillusionment. Her travels and deep engagements with revolutionary movements, especially in Italy, initialized her profound understanding of the psychological landscapes of her characters. This background infuses *The Gadfly* with authenticity, effectively situating the

protagonist's journey amidst the greater societal upheaval of the time. Readers seeking an immersive blend of historical context and rich character development will find *The Gadfly* exemplary. Voynich's profound exploration of the struggles between ideologies, personal conviction, and societal expectations renders this novel a compelling read for those interested in the complexities of freedom and the spirit of revolution. *The Gadfly* Ethel Voynich, 2017-03-26T04:39:04Z. *The Gadfly* is set in 1840s Italy at a time when the country was chafing under Austrian rule. The titular character is a charming, witty writer of pointed political satires who finds himself running with a crowd of revolutionaries. The plot develops as the revolutionaries struggle against the government and as the *Gadfly* struggles with a mysterious hatred of the Church and of a certain Cardinal. The novel, with its complex themes of loyalty, romance, revolution, and struggle against both establishment and religion, was very popular in its day both in its native Ireland and other countries like Russia and China. In Russia, the book was so popular that it became required reading. Since its publication, it has also been adapted into film, opera, theater, and ballet, and its popularity spurred Voynich to write sequels and prequels. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Translating Foreign Otherness Yifeng Sun, 2017-09-01. This book explores the deep-rooted anxiety about foreign otherness manifest through translation in modern China in its endeavours to engage in cross-cultural exchanges. It offers to theorize and contextualize a related range of issues concerning translation practice in response to foreign otherness. The book also introduces new vistas to some of the under-explored aspects of translation practice concerning ideology and cultural politics from the late Qing dynasty to the present day. Largely as a result of translation, ethnocentric beliefs and feelings have given way to a more open and liberal way to approach and appropriate foreign otherness. However, the fear of Westernization, seen as a threat to Chinese cultural integrity and social stability, is still shown sporadically through the state's ideological control over translation. The book interprets questions and reformulates a number of the key theoretical issues in Translation Studies and also demonstrates their ramifications in a bid to shed light on Chinese translation practice.

[Milestones on a Golden Road](#) Richard King, 2013-01-15. In *Milestones on a Golden Road*, Richard King presents pivotal works of fiction produced in four key periods of Chinese revolutionary history: the civil war 1945-49, the Great Leap Forward 1958-60, the Cultural Revolution 1966-76, and the post-Mao catharsis 1979-80. Taking its cues from the Soviet Union's optimistic depictions of a society liberated by Communism, the official Chinese literature of this era is characterized by grand narratives of progress. Addressing questions of literary production, King looks at how writers dealt with shifting ideological demands, what indigenous and imported traditions inspired them, and how they were able to depict a utopian Communist future to their readers even as the present took a very different turn. Early red classics were followed by works featuring increasingly lurid images of joyful socialism, and later by fiction exposing the Mao era as an age of irrationality, arbitrary rule, and suffering. A *Golden Road* that had led to nowhere.
