Ridiculous Destiny Frank Simcoe, 2004 Depressed out of work out of confidence political lawyer E Everton is walking in a restricted forested area in Virginia when he encounters three objects he can only describe as moving statues In an overpowering almost comically loud voice they begin telling him preposterous things That within a few years most of humanity will be dead that they would like to offer everyone a dying wish that he should tell others Though they prove that in an odd way they can grant wishes they are not remotely interested in explaining who they are what their motive is how they operate or how mankind is supposed to perish As E reluctantly takes on the task of spreading the word he is unwillingly drawn into the halls of power tapped by the forces of would be revolution and enmeshed in an impossible romance As E s journey progresses thousands of lives begin to change and even the ancient concepts of death and salvation take a strange twisted turn

Crap Wendy A. Woloson, 2020-10-05 *Crap* We all have it Filling drawers Overflowing bins and baskets Proudly displayed or stuffed in boxes in basements and garages Big and small Metal fabric and a whole lot of plastic So much crap Abundant cheap stuff is about as American as it gets And it turns out these seemingly unimportant consumer goods offer unique insights into ourselves our values and our desires In *Crap A History of Cheap Stuff in America* Wendy A Woloson takes seriously the history of objects that are often cynically made and easy to dismiss things not made to last things we don t really need things we often don t even really want Woloson does not mock these ordinary everyday possessions but seeks to understand them as a way to understand aspects of ourselves socially culturally and economically Why do we as

individuals and as a culture possess these things Where do they come from Why do we want them And what is the true cost of owning them Woloson tells the history of crap from the late eighteenth century up through today exploring its many categories gadgets knickknacks novelty goods mass produced collectibles giftware variety store merchandise As Woloson shows not all crap is crappy in the same way bric a brac is crappy in a different way from say advertising giveaways which are differently crappy from commemorative plates Taking on the full brilliant and depressing array of crappy material goods the book explores the overlooked corners of the American market and mindset revealing the complexity of our relationship with commodity culture over time By studying crap rather than finely made material objects Woloson shows us a new way to truly understand ourselves our national character and our collective psyche For all its problems and despite its disposability our crap is us

Absurd Patent Inventions James Carter,AI,2025-04-03 Absurd Patent Inventions explores the fascinating world of documented yet ultimately unsuccessful inventions It delves into the intersection of science and history showcasing the creative yet often impractical ideas that have been granted patents The book examines why these inventions ranging from overly complex household gadgets to outlandish personal care contraptions failed to achieve commercial success One intriguing fact is how many inventions were conceived to solve problems that didn't really exist highlighting the importance of understanding consumer needs The book's approach analyzes the inventive spirit historical context and reasons for failure behind each invention By studying these forgotten patents the book reveals unique insights into the evolution of technology It emphasizes that understanding these shortcomings is as valuable as studying successful innovations The chapters progress chronologically guiding readers through various categories of failed inventions complete with original patent diagrams and historical context culminating in a discussion of lessons learned The book's value lies in its accessible narrative non-fiction style making complex concepts understandable for a broad audience It offers valuable lessons for inventors entrepreneurs and anyone interested in business innovation engineering design and the unpredictable nature of technological progress It also offers a healthy dose of humor while maintaining accuracy

You Are Not a Gadget Jaron Lanier, 2010-01-12 A NATIONAL BESTSELLER A programmer musician and father of virtual reality technology Jaron Lanier was a pioneer in digital media and among the first to predict the revolutionary changes it would bring to our commerce and culture Now with the Web influencing virtually every aspect of our lives he offers this provocative critique of how digital design is shaping society for better and for worse Informed by

Lanier's experience and expertise as a computer scientist *You Are Not a Gadget* discusses the technical and cultural problems that have unwittingly risen from programming choices such as the nature of user identity that were locked in at the birth of digital media and considers what a future based on current design philosophies will bring. With the proliferation of social networks, cloud-based data storage systems and Web 2.0 designs that elevate the wisdom of mobs and computer algorithms over the intelligence and wisdom of individuals, his message has never been more urgent. *Exchange for the Flower, Nursery and Garden Center Trade*, 1965

What Have I Done? Mark Clifton, 2020-05-21 One of the most literary and innovative science-fiction writers of the early 1950s, Mark Clifton introduced sophisticated psychological insights into the characters who populated his tales of alien encounters, expanding technology revolution against political theocracy and space colonization. The title tale, centering on a psychologist who uncovers a hidden colony of otherworldly invaders and craftily orchestrates their doom, is accompanied by nine other perceptive and witty stories.

Just How Stupid Are We? Richard Shenkman, Rick Shenkman, 2010-07 Fifty percent of Americans can name four characters from *The Simpsons*, but only two out of five can name all three branches of the federal government. No more than one in seven can find Iraq on a map. Just how stupid are we? Pretty stupid. In *Just How Stupid Are We*, best-selling author Rick Shenkman takes aim at our great national piety: the wisdom of the American people, American democracy is as direct as it's ever been, but voters are misusing, abusing and abdicating their political power. At once a powerful indictment of voter apathy and political indifference, *Just How Stupid Are We* also provides concrete proposals for reforming our institutions: the government, the media, civic organizations, political parties, to make them work better for the American people. But first, Shenkman argues, we must reform ourselves.

Cassell's Dictionary of Slang Jonathon Green, 2005 With its unparalleled coverage of English slang of all types from 18th-century cant to contemporary gay slang and its uncluttered editorial apparatus, *Cassell's Dictionary of Slang* was warmly received when its first edition appeared in 1998. Brilliant, said Mark Lawson on BBC2's *The Late Review*. This is a terrific piece of work, learned, entertaining, funny, stimulating, said Jonathan Meades in *The Evening Standard*. But now the world's best single-volume dictionary of English slang is about to get even better. Jonathon Green has spent the last seven years on a vast project to research in depth the English slang vocabulary and to hunt down and record written instances of

the use of as many slang words as possible This has entailed trawling through more than 4000 books plus song lyrics TV and movie scripts and many newspapers and magazines for relevant material The research has thrown up some fascinating results
