Gaia Connections An Introduction To Ecology Ecoethics And Economics:

Gaia Connections Alan S. Miller, 1991 Miller's writing style makes the book easy to pick up and difficult to put down. Written at a level appropriate for advanced undergraduates, it is an important and valuable acquisition for academic libraries.

s CHOICE **Gaia Connections** Alan S. Miller, 2003 *Gaia Connections* addresses several arenas of concern as humankind faces an escalating ecological and moral crisis in this new millennium. Beginning with an overview of the history of philosophy and the importance of traditional thinking on modern day ethical reflection, the book then looks at the development of theories of justice, the problems of equity in global human relations, the inability of existing economic systems to resolve our human and environmental dilemmas, the unnatural connections now obtaining between genuine human need and the technological drift of science, the new genetics and reproductive technologies, and the nature of modern war. The study concludes with some historical perspectives on American environmental history and the urgent need for change in our ecoethical, social, and value systems. The principal focal areas of the original edition are continued: the actual state of the global environment today, the imperative for the development of sustainable economic and resource systems, the movement within much of science toward an almost universal biological determinism, and the need for a reaffirmation of an ethical value system which places the needs of people before the needs of property and profits. The revised edition not only updates these data and the concerns of the original book but also visits a number of new issues: the movement for environmental justice, the connections between global poverty and the now almost universal allegiance to a new world market and free trade system, the progress and the dilemmas of molecular biology and genetic engineering, and the growing disarray within the global systems of political economy.

Radical Ecology Carolyn Merchant, 2012-10-02 This is a new edition of the classic examination of major philosophical, ethical, scientific, and economic roots of environmental problems, which examines the ways that radical ecologists can transform science and society in order to sustain life on this planet. It features a new Introduction from the author, a thorough updating of chapters, and two entirely new chapters on recent Global Movements and Globalization and the Environment.

Natural Resource Economics Barry C. Field, 2015-12-10 Decisions about the conservation and use of natural resources are made every day by individuals, communities, and nations. The latest edition of Field's acclaimed text highlights the incentives and trade-offs embedded in such decisions, providing a lucid introduction to natural resource issues using the analytical framework of economics. Employing a logical structure and easy-to-understand descriptions, Field covers fundamental economic principles and their general application to natural resource use. These principles are further developed in chapters devoted to specific resources. Moreover, this up-to-date volume addresses the challenge of achieving socially beneficial utilization rates in the twenty-first century amid continuing population growth, urbanization, and global climate change. Topics new to the Third Edition include implications of climate change on resources, fracking, energy intensity, and the energy efficiency gap, reducing fossil energy, forests, and carbon, international water issues.

globalization and trade in natural resources **Ethical Challenges to Business as Usual - Second Edition** Shari Collins, 2022-06-17 This anthology offers a fresh approach to the ethics of business casting a critical eye on entrenched assumptions and practices It includes central works from such thinkers as John Locke Karl Marx Milton Friedman Naomi Klein and Thomas Piketty while also introducing new voices on a range of pressing practical topics including racial discrimination in the workplace factory farming climate change affirmative action and whistleblowing A truly applied anthology this book encourages students to see the real world applications of the theories at issue and to examine the consequences of business as usual **Reinventing Eden** Carolyn Merchant, 2013 Visionary quests to return to the Garden of Eden have shaped Western culture from Columbus voyages to today's tropical island retreats Few narratives are so powerful and as Carolyn Merchant shows so misguided and destructive as the dream of recapturing a lost paradise A sweeping account of these quixotic endeavors by one of America's leading environmentalists Reinventing Eden traces the idea of rebuilding the primeval garden from its origins to its latest incarnations in shopping malls theme parks and gated communities With eloquence and insight Merchant shows how the drive to conquer nature and to explore and settle the globe springs from this utopian pastoral impulse throughout Western history Time and again human manipulation of the environment is our downfall Eden is achieved by fencing off pristine beauty in national parks and wildlife preserves while leaving the majority of the earth in ruins Challenging both narratives Merchant argues that the green veneer of city park conservation has become a cover for the corruption of the earth and the neglect of its environment Reinventing Eden is a bold new way to think about the earth that includes green political parties sustainable development and a partnership between humans and earth that is nothing short of an ecological revolution **A Feminist Companion to the Apocalypse of John** Amy-Jill Levine, Maria Mayo Robbins, 2010-07-05 An examination of New Testament Apocalyptic literature through the categories of post colonial thought deconstruction ethics Roman social discourse masculinisation virginity and violence *Redeeming the Time* Stephen Bede Scharper, 1998-06-01 A thoughtful and interesting contribution to environmental theology literature Choice Richly informative and provocative Review for Religious Stephen Bede Scharper has added a significant new book to the growing collection of Christian ecotheological offerings an admirable job of summarizing the main strands of Christian environmental theologies and highlighting the most valuable contributions of each heartfelt There is much to celebrate in this book presents a comprehensible and accessible guide to the major varieties of what Scharper calls Christian ecological theology In this book he succeeds not just in coherently summarizing a number of the most important voices in ecotheology but also in giving us a blueprint for the changed consciousness necessary to motivate a conversion from our destructive earth damaging behavior to a more earth friendly way of living Worldviews Valuation of Ecological Resources Ralph G. Stahl Jr., Lawrence A. Kapustka, Wayne R. Munns Jr., Randall J. F. Bruins, 2007-11-19 Choosing the optimal management option requires environmental risk managers and decision makers to evaluate diverse and not

always congruent needs and interests of multiple stakeholders Understanding the trade offs of different options as well as their legal economic scientific and technological implications is critical to performing accurate *Contemporary Paganism* C. Barner-Barry,2005-03-01 This book explores the legal bias in the United States against Paganism and other non Christian religions Despite being one of the most religiously diverse countries in the world the U S legal system developed when the population was predominantly Christian Built into the law is the tacit assumption that all religions and religious practices resemble Christianity Using the Pagans as a case study Barner Barry shows how their experiences demonstrate that both the law affecting nondominant religions and the judiciary that interprets this law are significantly biased in favor of the dominant religion Christianity This creates legal problems as well as problems of intolerance for religions with significantly different practices Special attention is given to a series of Supreme Court decisions interpreting the Freedom of Religion Clause in terms of neutrality and interpreting the Establishment Clause loosely and its impact on nondominant religions in the US

Caring for Creation Max Oelschlaeger,1996-01-01 Argues that religion blamed for contributing to the ecological crisis provides an ethical context that will help solve the problem The approach suggests that the environmentally positive aspects in various Western creation stories demonstrate religion **To Be As God** R. J. Rushdoony,2003 This monumental work is a series of essays on the influential thinkers and ideas in modern times The author begins with De Sade who self consciously broke with any Christian basis for morality and law Enlightenment thinking began with nature as the only reality and Christianity was reduced to one option among many It was then in turn attacked as anti democratic and anti freedom for its dogmatic assertion of the supernatural Literary figures such as Shelly Byron Whitman and more are also examined for the Enlightenment presented both the intellectual and the artist as replacement for the theologian and his church Ideas such as the spirit of the age truth reason Romanticism persona and Gnosticism are related to the desire to negate God and Christian ethics Reading this book will help you understand the need to avoid the syncretistic blending of humanistic philosophy with the Christian faith After the Death of Nature Kenneth Worthy,Elizabeth Allison,Whitney Bauman,2018-11-09 Carolyn

Merchant s foundational 1980 book *The Death of Nature* Women Ecology and the Scientific Revolution established her as a pioneering researcher of human nature relations Her subsequent groundbreaking writing in a dozen books and over one hundred peer reviewed articles have only fortified her position as one of the most influential scholars of the environment This book examines and builds upon her decades long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women as well as her systematic taxonomies of environmental thought and action Seventeen scholars and activists assess praise criticize and extend Merchant s work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future Their contributions offer personal observations of Merchant s influence on the teaching research and careers of other environmentalists Practical And Professional Ethics (vol. 2 : Environmental Ethics

Debashis Guha,2007 **Management by Ethics** Richard H. Guerrette,2014-12-19 Management by Ethics MBE is a reformation study of the renowned paradigm management by objectives MBO by Peter Drucker This book re focuses on how to manage companies by ethical principles with a morally developed workforce The benefit of this ethically practical paradigm MBE is that all business operations function with the total moral performance of the whole workforce from board room deliberations to work floor associations Through the operational strategies of moral development learning offered in this book the company becomes a team The marketplace changes with the interpersonal caring of managers workers and customers enjoying the MBE spirit of a trusting caring global community *Ecosociocentrism* Gopi Upreti,2023-11-30 This book on the subject of global environmental crisis and climate change that has threatened the very existence of humankind and the living system on planet Earth claims that the current Anthropocene is the most dangerous era of environmental and ecological crisis the planet Earth has ever witnessed This book not only insightfully reflects upon the crisis manifested by climate change breakdown of planetary ecosystem extinction and annihilation of millions of species acidification of oceans desertification of productive lands and toxic pollution attributing to the current dominant neoliberal economic model but also presents a new ethical development framework that recognizes and promotes the instrumental relational and intrinsic values in the Earth system which form the basis for social and environmental sustainability This is a useful book for all stakeholders involved in environmental protection UN and development agencies INGOs civil societies NGOs governments officials and professionals media personnel universities faculties students and researchers Green Justice Thomas M Hoban,Richard O Brooks,2018-02-20 In the nine years since Green Justice first appeared the field we have come to identify as environmental law has taken a number of twists and turns few of which were foreseen by the authors or so far as they know by anyone else Although this edition attempts to account for many of these changes it continues to emphasize what we believed then and continue to believe to be paramount not only for the study of environmental law but for common law based jurisprudence in general Despite the immediacy and crush of daily events closely reasoned analyses of the difficulties and conflicts arising from environmental conflicts as embodied in major cases or key decisions such as we present here provide a stabilizing core around which the swirl of daily events takes place and against which those events must be evaluated We believed then and believe even more strongly now that this is true not only for legal specialists and scholars but for an educated populace as well Thus this casebook Critical Issues in Ecotourism James E. S. Higham,2007 Identifies and addresses critical issues in ecotourism This book provides the reader with contributions from international scholars that address issues of relevance incorporating scientific insights in specialised fields of research for example identifying and protecting critical habitats where tourists engage with endangered species Historical Dictionary of North American Environmentalism Edward Robert Wells,Alan M. Schwartz,1997 An attempt to capture the people places and events which have contributed to the development of environmentalism around the world attempting to place each term used in the context of a developing movement Although

the focus of this volume is the history of North American environmentalism entries that are not purely North American in scope have been included because they somehow helped to shape environmentalism on this continent **A World of Many**

Norbert Ross, 2023-01-13 *A World of Many* explores the world making efforts of Tzotzil Maya children from two different localities within the municipality of Chenalh Chiapas The research demonstrates children s agency in creating their worlds while also investigating the role played by the surrounding social and physical environment Different experiences with schooling parenting goals and values but also with climate change water scarcity as well as racism and settler colonialism form part of the reason children create their emerging worlds These worlds are not make believe or anything less than the ontological products of their parents Instead Norbert Ross argues that by creating different worlds the children ultimately fashion themselves into different human beings quite literally being different in the world *A World of Many* combines experimental research from the cognitive sciences with critical theory exploring children s agency in devising their own ontologies Rather than treating children as somewhat incomplete humans it understands children as tinkerers and thinkers makers of their worlds amidst complex relations It regards being as a constant ontological production where life and living constitutes activism Using experimental paradigms the book shows that children locate themselves differently in these emerging worlds they create becoming different human beings in the process
