Gaining Ground Tailoring Social Pr:

Gaining Ground Charles Lockhart, 2023-04-28 This book examines the challenges of aligning American social programs with the nation's deeply ingrained values of individualism, self-reliance, and responsibility, particularly when addressing poverty and other social hazards. Public social provision in the United States faces a paradox: while the necessity of programs like social security is broadly accepted, there is widespread skepticism toward initiatives that appear to relieve individuals of personal accountability. Influential critics such as Charles Murray in *Losing Ground* argue that many programs since the 1960s have undermined personal responsibility and discipline, fostering dependency rather than self-improvement. This criticism reflects broader cultural tensions as Americans simultaneously recognize the need for collective action to mitigate risks like aging or illness while clinging to ideals of independence and merit-based rewards. The thesis presented here is that social programs in the United States can gain broader acceptance and effectiveness by being tailored to resonate with these core values. Using the successful example of social security, which links benefits to individual contributions, the book proposes an investments model that ties public assistance to recipients' constructive efforts. This approach, emphasizing earned benefits rather than handouts, offers a framework for redesigning social programs to better address poverty while respecting cultural ideals. By examining key programs such as Aid to Families with Dependent Children (AFDC), Medicare, and social security, the analysis highlights opportunities for reform that balance the fulfillment of socioeconomic rights with the political and cultural realities of American society. While this approach cannot eliminate systemic inequities or transform dreary jobs into fulfilling work, it provides a pathway for reducing suffering and fostering greater alignment between public policy and American values. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1989. *The Employment of Women in the Sewing Trades of Connecticut* Borghild Eleanor Johnson, Caroline Manning, Ethel Lombard Best, Marie Correll, Harriet Anne Byrne, United States. Women's Bureau, 1932

The Tailor, 1894 *The Municipal Year Book 1991*, 1991 *Journal of Theoretical Politics*, 1998 **The Routledge Companion to Military Research Methods** Alison J. Williams, Neil Jenkins, Rachel Woodward, Matthew F. Rech, 2016-04-28 This new handbook is about the practices of conducting research on military issues. As an edited collection, it brings together an extensive group of authors from a range of disciplinary perspectives whose chapters engage with the conceptual, practical, and political questions raised when doing military research. The book considers a wide range of questions around research about on and with military organizations, personnel, and activities from diverse starting points across the social sciences, arts, and humanities. Each chapter in this volume describes the nature of the military research topic under scrutiny and explains what research practices were undertaken and why. Discusses the author's research activities.

addressing the nature of their engagement with their subjects and explaining how the method or approach under scrutiny was distinctive because of the military context or subject of the research. Reflects on the author's research experiences and the specific often unique negotiations with the politics and practices of military institutions and military personnel before during and after their research fieldwork. The book provides a focussed overview of methodological approaches to critical studies of military personnel and institutions and processes and practices of militarisation and militarism. In particular it engages with the growth in qualitative approaches to military research particularly research carried out on military topics outside military research institutions. The handbook provides the reader with a comprehensive guide to how critical military research is being undertaken by social scientists and humanities scholars today and sets out suggestions for future approaches to military research. This book will be of much interest to students of military studies war and conflict studies and research methods in general.

Choice, 1989 **The ^AColor of Welfare** Jill Quadagno, 1996-04-11

Thirty years after Lyndon Johnson declared a War on Poverty the United States still lags behind most Western democracies in national welfare systems lacking such basic programs as national health insurance and child care support. Some critics have explained the failure of social programs by citing our tradition of individual freedom and libertarian values while others point to weaknesses within the working class. In *The Color of Welfare* Jill Quadagno takes exception to these claims placing race at the center of the American Dilemma as Swedish economist Gunnar Myrdal did half a century ago. The American creed of liberty justice and equality clashed with a history of active racial discrimination says Quadagno. It is racism that has undermined the War on Poverty and America must come to terms with this history if there is to be any hope of addressing welfare reform today. From Reconstruction to Lyndon Johnson and beyond Quadagno reveals how American social policy has continually foundered on issues of race. Drawing on extensive primary research Quadagno shows for instance how Roosevelt in need of support from southern congressmen excluded African Americans from the core programs of the Social Security Act. Turning to Lyndon Johnson's unconditional war on poverty she contends that though anti poverty programs for job training community action health care housing and education have accomplished much they have not been fully realized because they became inextricably intertwined with the civil rights movement of the 1960s which triggered a white backlash. Job training programs for instance became affirmative action programs programs to improve housing became programs to integrate housing programs that began as community action to upgrade the quality of life in the cities were taken over by local civil rights groups. This shift of emphasis eventually alienated white working class Americans who had some of the same needs for health care subsidized housing and job training opportunities but who got very little from these programs. At the same time affirmative action clashed openly with organized labor and equal housing raised protests from the white suburban middle class who didn't want their neighborhoods integrated. Quadagno shows that Nixon who initially supported many of Johnson's programs eventually caught on that the white middle class was disenchanted. He realized that his grand plan for welfare

reform the Family Assistance Plan threatened to undermine wages in the South and alienate the Republican party's new constituency white southern Democrats and therefore dropped it In the 1960s the United States embarked on a journey to resolve the American dilemma Yet instead of finally instituting full democratic rights for all its citizens the policies enacted in that turbulent decade failed dismally The Color of Welfare reveals the root cause of this failure the inability to address racial inequality
