*Galapagos* Irenäus Eibl-Eibesfeldt, 1961 A modern scientist's superb observations of the wildlife still inhabiting Darwin's living laboratory of evolution dust jacket      **Galápagos** Randy Moore, 2021-01-13 Winner 2022 RUSA Outstanding Reference Source This encyclopedia provides readers with a comprehensive look at the Galapagos Islands from the wildlife and scientists that made them famous to the challenges and issues the islands face today In the mid 1800s the Galapagos Islands served as Charles Darwin's playground a volcanic archipelago where he famously worked on his theories of evolution and natural selection But who actually discovered the islands Why didn't any country claim them for more than 200 years And is ecotourism hurting or helping these mysterious islands This volume explores the history science and culture of the Galapagos Islands A preface introduction chronology and Galapagos at a Glance primer introduce readers to the islands that are so famously associated with Charles Darwin Twelve thematic essays allow readers to explore such topics as evolution the geology of the islands invasive species and tourism in depth Topical entries follow covering key individuals and organizations as well as other important concepts and ideas Thirteen primary document excerpts allow readers to study firsthand accounts from explorers and visitors to the islands Appendices a glossary a bibliography and sidebars round out the text Students of history geography and science will find this volume informative while general readers will be intrigued to learn about these unique islands      **The Galapagos** Robert I. Bowman, 1966      **Galapagos** Irenäus Eibl-Eibesfeldt, 1960      **Galapagos** Michael Hume Jackson, 1993 This book details the natural history of the plants and animals found in the Galapagos Islands A list of the dominant plants according to vegetation zone is included Of particular note is the discussion of the problems of colonisation by founding populations biological evolution and ecology and of the evolutionary processes bringing about species diversity      Iguanas Dr. Allison C. Alberts, Ronald L. Carter, William K. Hayes, Emilia P. Martins, 2004-03-03 In what is certain to be the key reference on iguanas for years to come some of the world's leading experts offer a clear and accessible account of the latest research on the evolution behavioral ecology and conservation of these highly visible and increasingly endangered creatures much loved by professional herpetologists and hobbyists alike The book begins with an introduction by noted iguana biologist Dr Gordon Burghardt that examines the state of iguana research past present and future with an emphasis on social behavior Three major sections follow each opening with a synthesis by the volume editors who survey the current status and likely future direction of investigations in the pertinent area The first section focuses on different aspects of the taxonomic and morphological diversity of iguanas and includes a complete checklist of species In the second section contributors address the behavior and ecology of iguanas and provide compelling evidence that both may be far more complex than previously appreciated The third and final section highlighting the threats facing iguana populations today describes the broad array of innovative conservation strategies that will be needed to help ensure their survival Illustrated throughout with photographs distribution maps tables and figures this volume will be the definitive resource for

anyone professional or curious amateur interested in iguanas      *Planet Savers* Kevin Desmond, 2017-09-08 Protecting the planet is everyone's work But we all have our own heroes in whatever area we are working *Planet Savers* brings together the varied stories of the hundreds of movers and shakers that have spoken up throughout history and taken action to defend the world from pollution deforestation species loss and climate change From Theodore Roosevelt to Al Gore from Francis of Assisi to David Attenborough and from hundreds more men and women that you will know little if anything about Scientists artists business people priests lawyers poets politicians activists and more from every continent of the world Their work has enthused us about the natural world and warned us that we must do much more to preserve it The Indian woman who became the world's first environmental martyr the Baptist Reverend who asked What Would Jesus Drive the Quaker big game hunter who set up the first conservation organisation the Shakespearian actor who revolutionised organic gardening and the housewife whose campaign against toxic waste forced a President to act The book is a cornucopia of people who from time immemorial have put their careers reputations and lives on the line to protect our planet from its governing inhabitants the human race Today as thousands of species of animals and plants are faced with extinction thousands of years of indigenous knowledge is lost in the face of technological advance and we become more and more aware of the potential doomsday scenario of a warming world we need *Planet Savers* more than ever Our inspiration can be the 301 environmental lives portrayed in this book These people cared enough to do something about it *Planet Savers* is both a tribute and a catalyst a tribute to the people that loved the planet enough to want to act to save it and a catalyst for the people who will be inspired to act after reading it New *Planet Savers* are at work right now in rainforests and megacities in community centres and boardrooms at road protests and in courtrooms all over the world If this book has one great aim it is to inspire you the reader to join them It is a book that every home should own      **In the Heart of the Sea** Nathaniel Philbrick, 2001-05-01 From the

author of *Mayflower* *Valiant* *Ambition* and *In the Hurricane's Eye* the riveting bestseller tells the story of the true events that inspired Melville's *Moby Dick* Winner of the National Book Award Nathaniel Philbrick's book is a fantastic saga of survival and adventure steeped in the lore of whaling with deep resonance in American literature and history In 1820 the whaleship *Essex* was rammed and sunk by an angry sperm whale leaving the desperate crew to drift for more than ninety days in three tiny boats Nathaniel Philbrick uses little known documents and vivid details about the Nantucket whaling tradition to reveal the chilling facts of this infamous maritime disaster *In the Heart of the Sea* recently adapted into a major feature film starring Chris Hemsworth is a book for the ages      **Smaller Orders of Insects of the Galapagos Islands, Ecuador**

Stewart B. Peck, National Research Council Canada, 2001 This is a synthesis of both previously published information and abundant new data derived from field studies on Galagos insects The dynamics and patterns of the evolution ecology and distribution of the entire insect fauna are presented in general The core of the book is an account of the 495 species of insects in the smaller orders with detailed information on their distribution and bionomics      **Darwin's Finches** Kathleen

Donohue,2011-06-15 Two species come to mind when one thinks of the Galapagos Islands the giant tortoises and Darwin's fabled finches While not as immediately captivating as the tortoises these little brown songbirds and their beaks have become one of the most familiar and charismatic research systems in biology providing generations of natural historians and scientists a lens through which to view the evolutionary process and its role in morphological differentiation In Darwin's Finches Kathleen Donohue excerpts and collects the most illuminating and scientifically significant writings on the finches of the Galapagos to teach the fundamental principles of evolutionary theory and to provide a historical record of scientific debate Beginning with fragments of Darwin's Galapagos field notes and subsequent correspondence and moving through the writings of such famed field biologists as David Lack and Peter and Rosemary Grant the collection demonstrates how scientific processes have changed over time how different branches of biology relate to one another and how they all relate to evolution As Donohue notes practicing science today is like entering a conversation that has been in progress for a long long time Her book provides the history of that conversation and an invitation to join in Students of both evolutionary biology and history of science will appreciate this compilation of historical and contemporary readings and will especially value Donohue's enlightening commentary [The Evolution of Culture in Animals](#) John Tyler Bonner,2018-06-05 Animals do have culture maintains this delightfully illustrated and provocative book which cites a number of fascinating instances of animal communication and learning John Bonner traces the origins of culture back to the early biological evolution of animals and provides examples of five categories of behavior leading to nonhuman culture physical dexterity relations with other species auditory communication within a species geographic locations and inventions or innovations Defining culture as the transmission of information by behavioral rather than genetical means he demonstrates the continuum between the traits we find in animals and those we often consider uniquely human **NIH Library Booklist** ,1961 [Proceedings of the California Academy of Sciences](#) ,2010 Vol 25 is composed entirely of the Alice Eastwood semi centennial publications no 1 18 of the California Academy of Sciences **Ethnic Conflict and Indoctrination** Irenäus Eibl-Eibesfeldt, Frank K. Salter,1998 Violent ethno nationalist conflicts continue to mar the history of the current century yet no satisfactory answer to the question of why humans are susceptible to indoctrination by ideologies that lead to inter group hostility has so far been found In this volume an international team of leading scientists from many different fields approach this complex issue from a biological perspective treating indoctrinability as a predisposition that has its roots in humanity's evolutionary past **Pacific Discovery** ,1983 *The Triune Brain in Evolution* P.D. MacLean,1990-01-31 This is MacLean's major work on the evolutionary development of the human brain In its evolution the human forebrain expands along the lines of three basic formations that anatomical and biochemically reflect an ancestral relationship respectively to reptiles early mammals and late mammals MacLean describes this as the Triune Brain Amazon com viewed July 29 2020 *Indoctrinability, Ideology and Warfare* Irenäus Eibl-Eibesfeldt,1998-10-01 Violent ethno nationalist conflicts continue to mar the history of the

twentieth century yet no satisfactory answer to the question of why humans are susceptible to indoctrination by ideologies that lead to inter group hostility has so far been found In this volume an international team of leading scientists from many different fields approach this complex issue from a biological perspective treating indoctrinability as a predisposition that has its roots in humanity s evolutionary past **Catalog of the Latin American Collection** University of Texas at Austin. Library. Latin American Collection,1969 **Arrivals of Life to the Galápagos** Guillermo Paz-y-Miño-C,Avelina Espinosa,2024-05-01 In this book Guillermo Paz y Mi o C and Avelina Espinosa synthesize the events connecting the accidental discovery of the Gal pagos Islands by Tom s de Berlanga in 1535 with Charles Darwin s exploration of the archipelago in 1835 Herman Melville s sketches of The Encantadas or Enchanted Isles of 1856 and the geopolitics to control Baltra Island or The Rock where the United States established a military base from 1942 to 1946 during World War II These themes are intertwined with discussions about the historical cartography of the Gal pagos Islands the geology of the archipelago the hypotheses about the origins of the Gal pagos terrestrial and marine organisms and comparisons between Gal pagos and other archipelagos particularly Hawai i Offering over 250 figures and diagrams this work will appeal to a broad audience including professors in academia college instructors study abroad and international field trip leaders with destination Gal pagos science writers and policymakers Behavior and Neurology of Lizards Neil Greenberg,Paul D.
