Galaxy Atom As Above So Below:

The Conspiracy Rhetoric of Mankind Paul J. Linke, 2012-09 When we think we learned something new we are quite proud of it But it wears off quickly for an unknown reason So what is wrong with what we do When you start to think about the things you learn and what the reason or purpose actually is then you have to wonder sometimes is it really something new we just learned Because having in mind to learn something new can be quite exhausting at times Maybe we have to start to think about this in a different way and take a different approach in discovering new things It is like a treasure hunt imagine that we are all pirates looking for an adventure or treasures Obviously our life is about searching for something but most of the time we don't even know what we are looking for We do this quite instinctively maybe we are preprogrammed in a way and we are not aware of it But when you find out who we are then everything seems to make sense Our entire world Universe stands on myth and mythology including our history making us wonder if it is real Lets look at life in a different way Learn more about our history maybe we can learn from old things our ancestors already new and then set that aside and try to find your own way You most certainly will see things with different eyes This is what our life is all about it is a soul search where the experience we have along the way is the reward treasure In Australia the Aboriginal people are most likely a candidate for such an idea They go on a regular Walkabout which literally means looking for something They might find something which can be worth bringing home as an idea for which the whole community can benefit from This is what a walkabout is all about looking for something which is useful and has a value in the community After all we are constantly occupied by making a living or providing for our needs The westerners actually practice the same thing we call them the Backpackers People who go and see other parts of the world enjoy the diversity and beauty of nature as well as other cultures and traditions Yes we can learn something old have a lot of fun and it can be quite rewarding This book was taking shape based on an ironic thought How much knowledge there is and we know so little How come we know so little We know all the most complicated things there can be but we know very little of what life is about What is the cause for all things How does it all work What is the reason And last but not least How do we fit into everything Is it possible that we have taken valuable information from ancient Greek knowledge but ignored one of their most important practices the philosophy of all things Has everything to us become scientific or important because sciences can explain the real world Have we forgotten that this real world we live in comes from a mystical source something unseen Something we call a different dimension because we can't possibly explain it It is such an exotic source that it would take a lot of ancient knowledge to discover the truth Do you want to discover the truth This book might have some answers **As Above, So Below** Franklin Coolport, 2020-02-07 Some strange tales from around the world can they hold an element of truth **Waves of The Sea** Philip Rose, 2015 Thoughts on what has been called The Ancient Wisdom and on some of those thoughts which have occupied the minds of men over the centuries This book is a collection of short writings dating from 2006 when I was 81 years old and

which I privately published over the next eight years as a series of small booklets They proved quite popular and I was asked to collect them into a single volume This is it The Seven African Powers of Creation: Orisha Homeschool Edition ~The Philosophy of Physics, Astronomy & Khemistry BlackHomeschoolAcademy,2013-01-16 A Philosophical look at the African Making of the Universe Covering theories of physics chemistry astronomy Excellent for Homeschool conversations and for answering some of those tough questions like what is a Blackhole Who are the Orisha What are their stories How were they used for generations to explain the complexities of science and to accurately depict modern scientific concepts

planets can have scientifically measurable far reaching effects in a number of realms The Reincarnation of Edgar Cayce presents new evidence that this energy can transform DNA potentially making ESP telekinesis levitation and other paranormal activities as common as breathing and usher in the Golden Age promised by every major spiritual tradition in human history Readers will come away with a deeper understanding not only of the life and work of both Wilcock and Cayce but with a broader sense of the many forces seen and unseen at work in the universe today **The Class of 2010** Al Raines,2008-09 The first non fiction Title from Al Raines designed to look and feel like a CD will rock the first generation of this new millenium Voices will be found Paths will be found And will be found the Zeitgist of the 21st Century The Spirit Of The Age is here are you ready to rock with Class MMX FOR ALL YOU TEENAGERS OUT THERE There has never been more young people at one time in one place in all of human history may this book be your lighthouse when storms gather around your ship And may you change our HISTORY for ALL TIME Houses of the Horoscope Alan Oken,2009-09-01 Every astrologer needs a good understanding on the astrological houses and Houses of the Horoscope An Introduction provides a practical and valuable sourcebook Alan Oken masterfully guides you through the concepts of the meanings and the nature of the twelve astrological houses He provides a core description of the twelve areas of life delineated by the astrological house system The energy of each of the planets in the houses tells us where on earth that planets energy lands and what area of our life it highlights He gives a masterful analysis of how the astrological signs on the house cusps and the planets ruling the signs on houses express the nature of each house The houses describe both the area of life expressed and aspects of the self in the horoscope The planets are the what of your life The signs the how of your life The houses are the where of your life Alan Oken provides masterful guidance to understanding the astrological houses and their interaction with the other elements of the horoscope Transcending the Speed of Light Marc Seifer,2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the

speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe Alan Oken's Complete Astrology Alan Oken,2006-01-01
