Game Show Pb 2001:

Baseball and the Blame Game John Billheimer, 2007-07-16 Most baseball fans know what links Fred Merkle Fred Snodgrass Mickey Owen and Bill Buckner It s a pantheon of public failure They would be harder put to say what links Eric Byrnes Tony Fernandez and Babe Ruth though these players made misplays every bit as egregious In this smart highly readable history of scapegoating John Billheimer identifies the elements that combine to condemn one player to a life sentence while another gets a wrist slap for the same offense As it turns out the difference between a lower case e in some forgotten box score and a lifetime of ignominy can hinge on a number of factors including timing geography reputation misunderstanding media bias and just plain bad luck

Making Democracy Fun Josh A. Lerner, 2024-02-06 Drawing on the tools of game design to fix democracy Anyone who has ever been to a public hearing or community meeting would agree that participatory democracy can be boring Hours of repetitive presentations alternately alarmist or complacent for or against accompanied by constant heckling often with no clear outcome or decision Is this the best democracy can offer In Making Democracy Fun Josh Lerner offers a novel solution for the sad state of our deliberative democracy the power of good game design What if public meetings featured competition and collaboration such as team challenges clear rules presented and modeled in multiple ways measurable progress such as scores and levels and engaging sounds and visuals These game mechanics would make meetings more effective and more enjoyable even fun Lerner reports that institutions as diverse as the United Nations the U S Army and grassroots community groups are already using games and game like processes to encourage participation Drawing on more than a decade of practical experience and extensive research he explains how games have been integrated into a variety of public programs in North and South America He offers rich stories of game techniques in action in children s councils social service programs and participatory budgeting and planning With these real world examples in mind Lerner describes five kinds of games and twenty six game mechanics that are especially relevant for democracy He finds that when governments and organizations use games and design their programs to be more like games public participation becomes more attractive effective and transparent Game design can make democracy fun and make it work

Agents for Games and Simulations Frank Dignum, Jeffrey Bradshaw, Barry G. Silverman, Willem van Doesburg, 2009-12-21 Research on multi agent systems has provided a promising technology for implementing cognitive intelligent non playing characters However the technologies used in game engines and multi agent platforms are not readily compatible due to some inherent differences in concerns Where game engines focus on real time aspects and thus propagate efficiency and central control multi agent platforms assume autonomy of the agents Increased autonomy and intelligence may offer benefits for a more compelling gameplay and may even be necessary for serious games However problems occur when current game design techniques are used to incorporate state of the art multi agent system technology A very similar argument can be given for agent based social simulation This volume contains the papers presented at AGS 2009 the First
